Getting Started

Each unit in Inside Reading features

- > Two high-interest reading texts from an academic content area
- > Reading skills relevant to the academic classroom
- > Targeted words from the Academic Word List

High-interest Texts

READING 1

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. How would you define success?
- 2. Are all famous people successful? Are all successful people famous? Give examples to support your opinion.
- 3. Name some people you consider successful. Why do you consider them successful?

Discussion questions activate students' knowledge and prepare them to read.

Read

This article discusses important information about how to be successful. It defines success and explains what it takes to achieve it.

WHAT IS . SUCCESS?

hat is success? is it wealth? Fame? Power? We tend to think of success as something unusual, something that requires special talents to achieve. That's

- s because stories in the media about successful business executives, professional golfers, glamorous movie stars, best-selling authors, and powerful politicians lead us to believe that only a few special people are successful. We may
- not hear about them, but ordinary people can be successful, too. Success is about reaching for something—and getting it. It is about having something you didn't have before. It is about attaining something that is valued by others.

15 Success begins with a clear goal, and attai ambition. Ambition is the energy that drives people to work hard, to learn more, and to seek opportunities to advance themselves. Some people have a clear goal, but they lack the ambition to make their dream come true. Other people have great ambition but no

High-interest readings motivate students.

ing that goal requires in context.

66 UNIT 5

Reading Comprehension

- A. Mark each sentence as T (True) or F (False) according to the information in Reading 1. Use your dictionary to check the meaning of new words.
- 1. Stories generated by the media demonstrate that ordinary people can be successful.
- 2. Family plays a major role in influencing a child's level of ambition.
- 3. The teen years often coincide with a fear of failure and a lack of ambition.
- ___ 4. Positive learning experiences in the early years can inhibit persistence.
- 5. Dynamic people are aware that they must take effective action to attain
- 6. Despite their backgrounds, professional people are the most likely to
- ___ 7. Meeting the needs of today may dominate the thoughts of a young adult who grew up in a poor family.
- 8. People seeking success might ask colleagues to assist them.
- ___ 9. One way to prepare for success is to exploit opportunities to learn through

Comprehension activities

help students understand the text and apply the targeted academic vocabulary.

xplicit Reading Skill Instruction

READING SKILL

Identifying Time and Sequence Words

LEARN

Understanding the *order of events* in a story is often essential for understanding the story, especially a mystery such as Reading 1. The order of events can be shown in several ways:

- Sentences in a paragraph usually describe actions in the order that they happened.
- Time words such as Monday, March, summer, or 1989 tell when actions took place.
- Words such as before, after, soon, first, next, meanwhile, then, finally, and subsequently can show the order of events.
- Phrases such as three days later, the next year, and at the same time also show time order.

APPLY .

- A. With a partner, use time clues and logic to figure out the order in which these events in Reading 1 took place. Number them from 1 to 9.
- __ A detective arrives.
- __ The tall man hears voices downstairs.
- ___Susan calls the police.
- Susan realizes they have forgotten their tickets.
- __ The tall man watches Susan and Eduard drive off.
- ___ Eduard tells the servant how to open the safe.
- ___ The tall man stuffs the jewelry into the red bag.
- ___ Susan concludes that someone is inside.
- __ The tall man climbs out of the window.

84 UNIT 6

Explicit reading skills provide the foundation for effective, critical reading.

Practice exercises enable students to implement new reading skills successfully.

READING SKILL

Identifying Time and Sequence Words

APPLY

- A. Scan the first four paragraphs of Reading 2. Answer the questions in complete sentences. Include the time words or phrases used in the Reading.
- 1. When did Sherlock Holmes do his detective work?
- 2. When do the police send an ME and a CSI team?
- 3. When do the CSIs take photographs in relation to other tasks?
- B. Number these tasks from 1 to 7, in the order in which they are done by the CSI team.
- ___ dust objects for fingerprints
- __ take photographs
- ___ send evidence to a forensics laboratory
- __ present their evidence in a court of law
- __ look for drops of blood or strands of hair
- __ label the evidence
- __ consult with the police chief

REVIEW A SKILL Identifying Examples (See pp. 52-53)

What kind of examples are listed in paragraph 4?

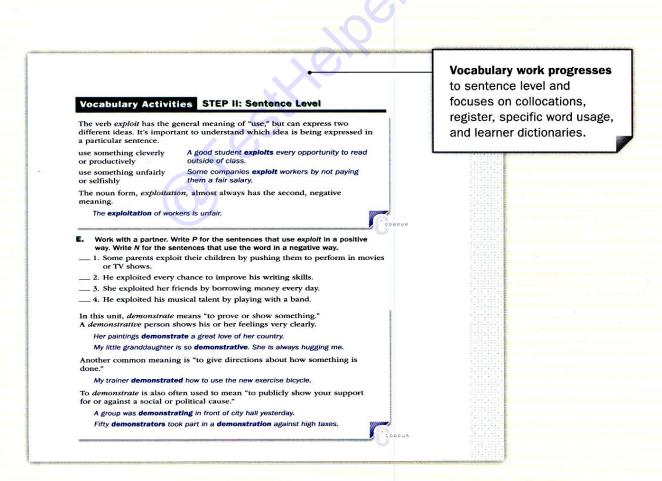

What kind of examples are listed in paragraph 5?

Recycling of reading skills allows students to apply knowledge in new contexts.

The Academic Word List in Context

Based on a corpus of 3.4 million words, the **Academic Word List** (**AWL**) is the most principled and widely accepted list of academic words. Compiled by Averil Coxhead in 2000, it was informed by academic materials across the academic disciplines.

Vo	ocabulary Activi			word level activities focus on meaning, derivations, grammatical features, and

READING 1

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. Do you know how to ride a bicycle? Who taught you to ride? What was the hardest thing to learn?
- 2. What are some reasons that people ride bicycles?
- 3. If you could change or improve bicycles, what would you want to do?

READING SKILL

Previewing

Most good readers spend a few minutes *previewing* before they begin to read. Previewing a book or article means looking it over to get a general idea of what it will be about. It allows you to recall what you already know about a topic, and think about what you are going to learn.

Preview Reading 1, below, by answering these questions. Discuss your answers with a partner.

- 1. Read the summary printed above the article. In a few words, it tells what the article will be about. What do you expect to learn about in the article?
- 2. Look at the pictures and captions. What information do they give you about the topic?
- 3. Read the title. You already know that the article will be about bicycles, but what does the word "history" suggest? Read the bold print subheadings at the beginnings of many paragraphs. What information do they give you about the topic? Check (</) the kind of information that might be in the article.
- ___ when the bicycle was invented
- ___ a description of the first bicycle
- ___ changes in the bicycle over time
- ___ famous bicycle races
- ___ how to use bicycles for exercise
- ___ who invented the bicycle
- how people reacted to the invention
- how bicycle tires are made

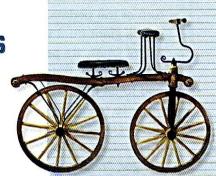

Read

This article from a popular technology magazine tells about the many changes in bicycles during the past 200 years.

000

The History of Bicycles

he bicycle was not invented by one **individual** or in one country. The creation of the modern bicycle took nearly 100 years and the work of many **individuals**. By the end of those 100 years, bicycles had **revolutionized** the way people traveled from place to place.

EARLY BICYCLES

Bicycles first appeared in Scotland in the early 1800s, and were called velocipedes. These early bicycles had two wheels, but they had no pedals. A rider sat on a pillow and walked his feet along the ground to move his velocipede forward.

Soon a French inventor added pedals to the front wheel. Instead of walking their vehicles, riders used their feet to turn the pedals. However, pedaling was hard because velocipedes were very heavy. The **frameworks** were made of solid steel tubes, and the wooden wheels were covered with steel. Even so, velocipedes were popular

Because velocipedes were so hard to ride, no one thought about using them for transportation. People didn't ride velocipedes to the market or to their **jobs**. Instead, people thought velocipedes were just toys.

among rich young men, who raced them in Paris parks.

SOME CHANGES ARE MADE

Around 1870, American manufacturers saw that velocipedes were very popular overseas. They began building velocipedes, too, but with one difference. They made the frameworks from hollow steel tubes. This alteration made velocipedes much lighter, but riders still had to work hard to pedal just a short distance. In addition,
 roads were bumpy, so steering was difficult. In fact, most riders preferred indoor tracks where they could rent a velocipede for a small fee and take riding lessons.

THE HIGH WHEELER

A **subsequent** change by British engineers **altered** the wheels to make pedaling more efficient. They saw that when a rider turned

the pedals once, the front wheel turned once. If the front wheel was small, the bicycle traveled just a small distance with each turn. They reasoned that if the front wheel were larger, the bicycle would travel a greater distance with each turn of the pedals. So they **designed** a bicycle with a giant front wheel. They made the rear wheel small. Its **primary** purpose was to help the rider balance. Balancing was hard because riders

had to sit high above the giant front wheel in

order to reach the pedals. This meant they were in danger of falling off the bicycle and **injuring** themselves if they lost their balance. Despite this **inherent** danger, "high wheelers" became very popular in England.

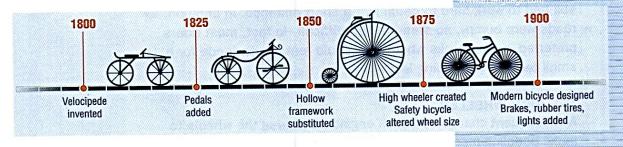

A SAFER BICYCLE

American manufacturers once again tried to **design** a better
bicycle. Their goal was to make a safer bicycle. They **substituted**a small wheel for the giant front wheel and put the driving
mechanism in a larger rear wheel. It would be impossible for a
rider to pedal the rear wheel, so engineers **designed** a system of
foot levers. By pressing first the right one and then the left, the
rider moved a long metal bar up and down. This turned the rear
wheel, and the bicycle moved forward. Because the new safety
bicycle **minimized** the dangers **inherent** in bicycle riding, more
and more people began using bicycles in their daily activities.

THE MODERN BICYCLE IS BORN

The British **altered** the **design** one last time. They made the two wheels equal in size and created a mechanism that used a chain to turn the rear wheel. With this final change the modern bicycle was born.

Subsequent improvements, such as brakes, rubber tires, and lights, were added to make bicycles more comfortable to ride. By 1900, bicycle riding had become very popular with men and women of all ages. Bicycles revolutionized the way people traveled. Today, millions of people worldwide ride bicycles for transportation, enjoyment, sport, and exercise.

Reading Comprehension

Mark each statement as T (True) or F (False) according to the information in Reading 1. Use your dictionary to check the meaning of new words.

- ___ 1. Many individuals took part in creating the modern bicycle.
- ____ 2. The first bicycle revolutionized travel in Scotland and overseas.
- ____ 3. Early velocipedes had frameworks made of solid steel tubes.
- 4. American manufacturers substituted hollow steel tubes for the solid tubes.
- ___ 5. People in Paris paid a fee to ride velocipedes to their jobs.
- ___ 6. The primary purpose of the giant front wheel was to help the rider balance.
- ____ 7. American manufacturers designed a bicycle with a small rear wheel that was inherently safer.
- 8. The modern bicycle was born when British engineers subsequently altered the wheels again and made them equal in size.

Vocabulary Activities STEP I: Word Level

- A. Read this passage about the Tour de France, a world-famous bicycle race. In each sentence, circle the one word or phrase in parentheses () that has the same meaning as the underlined word in the sentence. Compare your answers with a partner. Then take turns reading the sentences to each other using the circled words.
- 1. The course for the Tour de France is <u>altered</u> (measured / changed) marked) every year, but it is always about 4,000 kilometers, or 2,500 miles.
- 2. The course is <u>designed</u> (*located/expected/planned*) to travel through towns, up steep mountains, and across flat lands.
- 3. Riders come from all over Europe as well as from <u>overseas</u> (*islands / abroad / oceans*) to take part in the 22-day race.
- 4. The race is divided into 20 stages, or parts. The rider who wins one stage has the honor of wearing a yellow Tour shirt in the <u>subsequent</u> (*final/longest/next*) stage.
- 5. The rider who has the fastest race time in all of the stages is the overall winner. Lance Armstrong is the only <u>individual</u> (*person / man / foreigner*) to win seven Tour de France competitions.
- 6. The <u>framework</u> (*mechanism / structure / wheel*) of modern racing bicycles is made of lightweight steel, aluminum, titanium, and carbon fiber tubes.
- 7. The recent use of lightweight frameworks brought about <u>revolutionary</u> (*unwanted / unfair / great*) changes in the 100-year-old race.
- 8. Teams pay an entrance <u>fee</u> (payment/tax/salary) to join the Tour de France. The fees create the prize money paid to the winning teams.
- 9. Riders must be good athletes to meet the physical demands that are an <u>inherent</u> (unexpected / natural / dangerous) part of a long race.
- 10. If a rider is <u>injured</u> (sick/tired/hurt), he tries to <u>minimize</u> (lessen/hide/endure) the pain so he can stay in the race.

11. If the pain is too bad, the coac (help / take out / replace) the in	h can assign a teammate to <u>substitute for</u> njured rider.

Vocabulary Activities | STEP II: Sentence Level

Word Form Chart			
Noun	Verb	Adjective Adverb	
revolution	revolutionize	revolutionary	

The central meaning of *revolution* is "turning" or "changing." It can refer to one thing rotating around a central point, like the Earth's revolution around the sun. It can also mean "changing or trying to change the political system by violent action."

In this unit, *revolution* is used to mean "a complete change in methods, opinions, etc., often as a result of progress."

Bicycles led to a revolution in transportation.

Bicycles revolutionized the way people traveled from place to place.

Bicycles were a revolutionary idea.

- E. In your notebook, rewrite these sentences two ways. Use a different form of revolution in each sentence.
 - 1. The addition of sound changed the way motion pictures told stories. (noun, verb)

The sound **revolution** changed the way motion pictures told stories. (noun)

The addition of sound revolutionized the way motion pictures told a story. (verb)

- 2. The jet engine caused a change in air travel. (verb, adj.)
- 3. Alfred Nobel created a new substance that he called "dynamite." (noun, adj.)
- 4. The discovery of X-rays changed medical science. (noun, adj.)

The verb *substitute* means to replace one thing for something different. The noun form *substitution* refers to the process of making a replacement. The noun form *substitute* refers to the person or thing that will be used to replace something.

The team captain substituted Ernesto for the injured player.

He made the substitution because the injured player was in pain.

The substitute went on to win the game.

The word *substitute* is commonly used for a teacher or player who takes someone else's place.

We had a substitute in math class today.

- Where is the engine?
- How much do they cost?
- ___ What are they used for?
- How many Segways are there in Paris?

Read Read

This newspaper article poses questions about the future of personal transport.

Segway Into the Future

For nearly two hundred years, individuals worldwide have been riding bicycles for transportation, enjoyment, sport, and exercise. In 2001, the Segway, a revolutionary new vehicle, was introduced. The inventor imagined that the Segway might someday replace bicycles. Would this be possible? How does a Segway compare to a bicycle?

WHAT IS A SEGWAY?

Both Segways and bicycles are **designed** to carry one rider. However, Segway riders do not sit on a seat. Instead, they stand on a platform while they are riding. The platform is the floor of a strong metal **framework**. A post with handles for the rider to hold is attached to the front of the platform. A wide rubber wheel is attached to each side of the platform. Except for these two wheels, there are no mechanical parts on a Segway. Like a bicycle, it has no engine. However, unlike a bicycle, a Segway has no brakes, no pedals, no gears, and no steering mechanism.

HOW A SEGWAY MOVES

A Segway uses a computer system that is **designed** to respond to the **inherent** ability of riders to maintain their balance. For example, without thinking about it, a rider actually leans his body slightly forward when he expects to move forward. When the rider expects to stop, he leans his body slightly back. When the rider thinks about moving left or right, he leans left or right. The computer system checks the rider's body movements about 100 times every second. Instantly, the Segway moves forward, stops, or turns in response to every slight change in the rider's balance. It is easy to learn to ride a Segway because it responds to the rider's natural movements.

HOW A BICYCLE MOVES

30 In contrast, it is hard to learn to ride a bicycle. The rider works constantly to stay balanced. She turns the pedals with her feet to make the bicycle move forward. She presses the brake levers to make the bicycle stop. To

alter her direction, the rider moves the handle bars left or right. If a bicycle rider leans too far to one side, the bicycle
will subsequently fall over.

Riding a bicycle is also hard work. A bicycle can travel as far as a rider can keep pedaling. It can go very fast if the rider has enough energy to pedal hard. For example, in the annual Tour de France bicycle race, riders travel more than 100 miles a day at speeds greater than 30 miles per hour.

A Segway race would not be very interesting. A Segway can't go very far, and it can't go very fast. A Segway is powered by a battery that limits it to traveling 24 miles (39 kilometers) on one battery charge. And it can travel no faster than 12.5 miles (20 kilometers) per hour. Being battery-powered, not pedal-powered, the rider gets almost no exercise, but Segways are fun. **Overseas** and at home, they are popular with tourists. Visitors to over 200 cities, including London, Athens, and Bangkok, can pay a **fee** to take a guided city tour on a Segway.

BICYC مرجع زبان ابرانیان	LES AND SEGWA	YS COMPARED
	Bicycles	Segways
Riders	One	One
Power	Pedaling	Battery
Top speed	30+ mph	12.5 mph
Range	Unlimited	24 miles per battery charge
Indoors/Outdoors	Outdoors	Indoors and outdoors
Easy to learn	No	Yes
Easy to balance	No	Yes
Provides exercise	Yes	No
Provides transportation	Yes	Limited

HOW SEGWAYS ARE USED

Segways can do things that bicycles cannot do. For instance, Segways are useful in **jobs** that normally require workers to do a lot of walking, such as delivering mail, inspecting farms, or patrolling buildings at night. An extra benefit is that **individuals** who cannot comfortably walk because of poor bealth or **injury** can **minimize** their walking but still be able to work if they can ride a Segway.

Segways are useful in other kinds of **jobs**, too. Pizza restaurants, pharmacies, and other small businesses have **substituted** Segways for trucks to make neighborhood deliveries. Police departments around the world have been putting officers on Segways instead of in cars or on motorcycles. The officers can patrol neighborhoods to keep them safe from crime. In many countries, security guards on Segways patrol airports, train stations, amusement parks, and other public places. Beijing public safety police patrolled on Segways during the 2008 Olympics.

WHY SEGWAYS ARE NOT USED MORE

- However, few people are buying Segways for their own use. One reason may be that they are expensive. Another may be that people fear being laughed at for buying a "toy." A **primary** reason, however, may be that people do not understand what a Segway is, and they are afraid that it is dangerous. Some cities have even passed laws that allow Segways to travel only on sidewalks. The cities are concerned that Segway riders will cause accidents if they ride in the streets. Other cities allow Segways only in street bicycle lanes. They are concerned that people on the sidewalk might be **injured** by a Segway. Meanwhile, many cities are creating new bicycle paths and street traffic lanes to encourage people to ride bicycles.
 - Will Segways ever replace bicycles? Probably not, but they can do certain **jobs** that bicycles cannot do. Segways are hard-working vehicles that we are likely to see more of in the future.

Reading Comprehension

Mark each statement as T (True) or F (False) according to the information in Reading 2. Use your dictionary to check the meaning of new words.

- ___1. The Segway's framework consists of a platform and a post with handles.
- _____2. The driver can alter the direction of the Segway by leaning to the left or right.
- ____3. The Segway was primarily designed for individuals who cannot walk comfortably.
- ___4. Workers have been injured while riding Segways on their jobs.
- ____5. If the driver leans forward, the Segway subsequently slows down.
- ____6. People seem to have an inherent fear of electric vehicles.
- ____7. For a fee, people can take a tour on a Segway in some cities overseas.
- ____8. Segways can substitute for trucks to make neighborhood deliveries.
- ____9. Segways can minimize the walking that some jobs require.

Vocabulary Activities STEP I: Word Level

A. Use the target vocabulary in the box to complete this story. Use the words in parentheses to help you.

	alter	individual	an inherent	revolutionized	
	designed	injured	minimize	subsequent	
	framework	had a job	primary	substituted	
I	n 1901, Glenn Cur	tiss was 23 years	old and	A 40	
man	ufacturing and sel	ling bicycles. He h	nad	love of speed. H	Ie

wanted to find a way to _______bicycles so they could go faster than a rider could pedal them. Glenn ______an engine that

a tomato can for a carburetor. He attached the engine to the
drive mechanism of a bicycle. However, the engine did not make the bicycle go
much faster, despite the loud noise it made. A engine that
Glenn built was too heavy, and the bicycle was hard to balance. Riders often tipped
over and themselves. The heavy weight of the engine was the
problem he had to solve. After many tries to
(9. lessen) the weight, he solved the problem by making the
stronger. He began racing his "motorcycle." In 1907, Glenn set
a speed record. He went 136 miles per hour, faster than any in in
the world had ever traveled. Glenn's invention bicycle riding.
A word analogy shows the relationship between two sets of words. To solve an analogy, you must identify how the words in the first set are related. Here are some examples.
apple : fruit example An apple is an example of a fruit. pretty : lovely synonym Pretty and lovely have similar meanings. young : old antonym Young and old have opposite meanings. bicycle : ride action Ride is the action when you use a bicycle. room : house part A room is part of a house.
To finish an analogy, think of a word to complete the second set of words that has the same relationship as the first set.
apple : fruit AS carrot :
An apple is an example of a fruit, so the missing word is <i>vegetable</i> . <i>Carrot</i> is an example of a <i>vegetable</i> .
You say an analogy like this: "Apple is to fruit as carrot is to vegetable."
B. With a partner, use the target vocabulary in the box to complete these analogies. Then write the type of relationship each analogy has.
Relationship
1. garden : flower AS crowd : individual part
2. car : damage AS person :
3. save : spend AS increase :
4. nation : country AS abroad :
5. write : check AS pay :
6. false : true AS last :
7. bus : vehicle AS bus driver :
8. before : after AS earlier :

C.	With a partner, decide if these lines from advertisements were written before 1900 to sell early bicycles or after 2001 to sell modern Segways. Mark an advertisement B for bicycles or S for Segways.
-	Hollow steel tubes substituted for solid tubes to minimize the weight.
	Lean forward and watch this revolutionary vehicle go!
	Individuals can alter their speed by just turning the pedals.
	Used overseas to patrol the Beijing Olympics.
	Avoid injuries. For a small fee, learn to ride on an indoor track.
	Inherently easy to drive. Primary power is from batteries.
	You thought high-wheelers were great? Try the subsequent design!
On fra	ramework is a structure upon which other parts are built or attached. a bicycle, the wheels, pedals, and handlebars are attached to the steel mework. Sometimes, framework refers to the basis or foundation of mething.
	The frameworks of early velocipedes were made of solid steel tubes.
	A good education forms the framework for a successful career.
	that they support on the left. Take turns making sentences with the information. The framework of a human body is the skeleton.
	1. a human body a. steel beams
	2. many governments b. an interesting plot
	3. a skyscraper c. the number 10
	4. the metric system d. a constitution
	_5. a good book e. the skeleton
bu	alter something means "to make something different in some way, it without changing it completely." If you alter something, you have ade an alteration.
So	me things that you might alter include items of clothing, plans, or opinions.
E.	weekend. Which things can be altered on a borrowed bicycle? Write A for each item you could alter.
-	_ the speed of the bicycle the size of the wheels
_	_ the color of the framework the direction the bicycle turns
	_ the height of the seat the speed that the wheels turn
-	_ the design of the bicycle the mirrors on the handlebars

Vocabulary Activities STEP II: Sentence Level

Word Form Chart					
Noun	Verb	Adjective	Adverb		
design designer	design	designed			
individual individuality	individualize	individual individualized	individually		

The noun individual means "person." The plural is individuals.

There were 200 individuals in the research study.

The adjective individual means something intended for one person.

Each bowl contained an individual serving of rice.

Individually means to perform an action one person or object at a time.

She washed each glass individually.

To individualize something means to make it special for each person.

The teacher **individualized** the assignment by giving each student a different topic to write about. We had **individualized** topics.

Individuality refers to what makes a person unlike any other person.

Twins may show their individuality by wearing different clothing.

- F. The Pinewood Derby is a car race sponsored by the Boy Scouts of America. The cars are small—just seven inches long. Rewrite these sentences about the Pinewood Derby to include the word in parentheses. Discuss your sentences with a partner.
- 1. Each boy works by himself to make his own cars. (individually)
- 2. First each boy makes a plan of his car on paper. (design, verb)
- 3. He wants to make his car look like no other cars in the derby, so it will be special. (*individualize*)
- 4. He can show his unique personality in many ways. Some boys plan their cars to look like a snake or a hot dog, for example. (individuality, design)
- 5. To build the car, the creator traces his plan on a block of wood and carves out the shape. Then he attaches the wheels and paints his car. (designer, design)
- 6. On the day of the race, the Boy Scouts roll their cars down a sloped board one at a time. The fastest car down the board wins a prize. (*individually*)
- 7. The judges give separate prizes for the funniest car, the scariest car, and other categories. (*individual*, adj.)
- 8. Every car is a winner. The contest is planned to show every boy's special qualities. (*designed*, verb; *individuality*)

- **G.** In your notebook, rewrite each of these sentences to include the words in parentheses (). Share your sentences with a partner or small group.
- 1. Great changes in transportation have taken place in the last 200 years. (revolutionary)

Revolutionary changes in transportation have taken place in the last 200 years.

- 2. Farmers replaced animals with tractors to pull their plows. (substituted for)
- 3. Airplanes made traveling across oceans easier and faster. (overseas)
- 4. Jet airplanes made the time of flights shorter. (minimized)
- 5. No one walks anymore. People travel mostly on wheels. (primarily)
- 6. The first airplane was made of wood covered by cloth. (framework)
- 7. Segways rely on the natural ability of riders to maintain their balance. (*inherent*)
- 8. Early trains were powered by steam. Then changes were made in their plans so they could be powered by diesel engines. (subsequent/alterations/designs)
- H. Self-Assessment Review: Go back to page 1 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

Writing and Discussion Topics

With a partner or small group, share ideas about the following topics. Then have each person write a paragraph about one of the topics.

- 1. Imagine that you work as a police officer in a small city. Your department has purchased a Segway for each officer who patrols the city streets. Yesterday was your first day patrolling on your Segway. Use your imagination and write a story about how you used the Segway, what you liked, and what problems you had.
- 2. Reading 1 ends with, "Today, millions of people worldwide ride bicycles for transportation, enjoyment, sport, and exercise." Describe examples of each of these uses.
- 3. The Segway was not designed to be used for sport; however, some people believe that certain team sports could be adapted for players riding Segways. What sports could be adapted to use Segways? How would the players in each sport use them?

Fighting Diseases

In this unit, you will

- read about the causes and effects of malaria in sub-Saharan Africa.
- read about sources of new medicines.
- review previewing a reading text.
- increase your understanding of the target academic words for this unit.

This journal article includes information from the website of the Centers for Disease Control and Prevention (CDC), the principal public health agency in the United States.

606

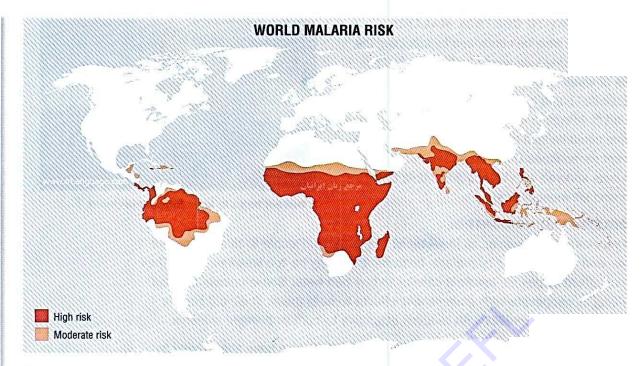

THE BATTLE AGAINST MALARIA

alaria is a serious health problem. It is a leading cause of death in many countries. It occurs mostly in tropical and subtropical parts of the world, including parts of Africa, Asia, South America, Central America, and the Middle East. The place most intensely affected by malaria is Africa south of the Sahara Desert. About 60% of the world's malaria cases and 90% of malaria deaths occur there. Even though the causes of malaria in this region are well understood, international health agencies are finding that controlling it is still an enormous and difficult task.

THE MALARIA CYCLE

Malaria is passed from mosquitoes to people and from
people to mosquitoes in a cycle of events that repeats over
and over. The malaria cycle begins with tiny parasites.
These parasites **reside** in the bodies of *Anopheles*mosquitoes. These deadly parasites cause malaria. When a
female mosquito bites a human, the mosquito draws off
blood. It also leaves malaria parasites in the human's skin.

These parasites quickly multiply inside the human and cause the individual to feel sick. If another mosquito bites a human who is sick with malaria, parasites from the human enter the body of the mosquito. When that mosquito bites another human, it will leave parasites in the other human's skin. In the malaria cycle, humans get parasites from mosquitoes and humans also give parasites to mosquitoes.

EMERGENCY MEDICAL CARE NEEDED

Becoming infected with malaria is a **medical** emergency. The first symptoms—or signs—of malaria are fever, chills, sweating, **intense** headache, and muscle pains. Nausea and vomiting often **accompany** these symptoms. Immediate

medical treatment must be a **priority** for people who are infected. They must take medicines that will kill the parasites. If **medical** treatment is started soon enough, sick individuals can be cured. If it is not, malaria can cause serious illness or even death.

ONE WAY TO CONTROL MALARIA

Malaria in tropical Africa could be controlled in two ways. First, it could be
controlled by killing the parasites that cause the illness. If every infected
person quickly took malaria medicine, most would be well in a few days.

Mosquitoes could not get malaria parasites from healthy individuals, so malaria
would not spread. Unfortunately, many people live in far-away villages without
access to quick medical care. Another problem is that the ability of quinine
(the primary medicine used against malaria) to kill parasites has declined over
time. There is hope, however, for new drug combinations. One, called ACT, is
being used successfully to treat people who have malaria.

ANOTHER WAY TO CONTROL MALARIA

Malaria could also be controlled by stopping the mosquitoes. One way would be to get rid of the pools of water where they lay their eggs. Also, insecticide¹ could be sprayed in wet areas and around buildings to kill mosquitoes. Finally, people could be told to sleep under bed nets to prevent mosquitoes from biting them at night. Bed nets sprayed with insecticide would both stop and kill mosquitoes.

A bed net helps to keep mosquitoes away.

PROBLEMS FACING CONTROL

It is very difficult, however, to **implement** these plans. People in this region are poor—and made poorer by malaria because they may be too weak to work. They cannot afford to pay for **medical** care or to buy bed nets. Some people may be unwilling to **cooperate** with government efforts to help them. Their old beliefs about illness may **conflict** with modern attempts to cure or prevent malaria.

There are other problems, too. Health **ministries** may not have the money to build clinics or hire trained **medical practitioners**. They may not have the money to buy insect poisons and pay a **labor** force to spray regularly. And the frequent rainfall in tropical and subtropical regions would make it impossible to get rid of pools of water where mosquitoes lay eggs.

A recent discovery by **medical** scientists may offer a solution to many of these problems. In 2009, the **Ministry** of Health in Senegal arranged for scientists to visit three villages. A tropical illness called "river blindness" was common in these villages. The people were given the medicine ivermectin to treat it. Two weeks after the people had taken the medicine, the scientists found many dead mosquitoes. They discovered that when a mosquito bit a person who had recently taken ivermectin, the mosquito died. It was poisoned by the medicine in the person's blood. Now scientists wonder if malaria could be controlled by **implementing** a program to give this medicine to people every month. They need to find out if taking *ivermectin* every month will be safe. They also are waiting to see if there will be a **decline** in malaria cases in these villages. If it is safe and effective, this medicine could help stop the spread of malaria in sub-Saharan Africa.

insecticide: a poison that kills insects

Reading Comprehension

Mark each statement as T (True) or F (False) according to the information in Reading 1. Use your dictionary to check the meaning of new words.

- ___ 1. Malaria occurs mostly in tropical and subtropical parts of the world.
- ___ 2. Deadly malaria parasites reside in the bodies of mosquitoes.
- ____ 3. Intense coughing and sneezing often accompany the fever of malaria.
- 4. Old beliefs may conflict with modern ways to cure or prevent illness.
- ___ 5. Getting fast medical attention after becoming ill is a priority.
- ___ 6. Sleeping under bed nets would lead to a decline in malaria.

- ____ 7. Health ministries in some countries often cannot afford to implement plans to control malaria.
- ____ 8. Most people in tropical Africa have easy access to medical practitioners.
- 9. Educated people are not willing to cooperate with government plans to help them.
- —10. A large labor force would be needed to spray insecticide regularly.

READING SKILL

Finding the Main Idea

LEARN

The *topic* of an article refers to what the article is about. The *main idea* of an article goes one step further. The main idea includes the topic and also what the writer wants to say about the topic. For example:

Topic Main idea

malaria several ways to control malaria

The main idea of an article is usually stated in the first paragraph, often in the first or last sentence. Sometimes it is stated in the last paragraph, which often summarizes the article. The main idea may be a full sentence or just a few words.

Each paragraph in an article contributes its own facts, definitions, and examples that help explain the main idea of the article. This means that each paragraph has its own main idea. Often it is in the first sentence of the paragraph.

APPLY

Reread the first paragraph of Reading 1. Find the sentence that tells you the main idea—what the writer wants to say about malaria—and circle it. Then write the most important part of the sentence here, as the main idea.

Reread the paragraphs below. Find the sentence that includes the main idea. Compare the main idea to the three choices (a, b, or c). Circle the one that best states the main idea.

PARAGRAPH 2

- a. The malaria cycle begins with tiny parasites.
- b. Anopheles mosquitoes are deadly.
- c. Parasites quickly multiply.

PARAGRAPH 4

- a. Malaria can cause death.
- b. Becoming infected is a medical emergency.
- c. Sick people must take medicine.

PARAGRAPH 7

- a. The people of the region need education about malaria.
- b. Plans to prevent malaria are difficult to implement.
- c. Malaria makes people poorer because they cannot work.

Vocabulary Activities STEP I: Word Level

A. Practitioner is a formal wor profession. With a partner,	d to describe someone wh match these practitioners	o practices a specific with their descriptions.

A *conflict* (noun, pronounced CON-flict) is a disagreement or a difference in ideas or plans. It can be serious or not, depending on the context.

Two nations had an armed **conflict** that lasted five years.

Ms. Ellis had a scheduling **conflict**. She had two meetings at 9 a.m.

To *conflict* (verb, pronounced con-FLICT) means "to happen at the same time" or "to be in disagreement." The adjective form is *conflicting*.

Her staff meeting **conflicts** with a sales meeting. Two professors had **conflicting** ideas about history.

- **D.** Which of these pairs of newspaper headlines have conflicting information? Discuss with a partner why they conflict or don't conflict.
 - 1. a. HEALTH MINISTRY REPORTS A DECLINE IN MALARIA
 - b. MALARIA NUMBERS INCREASE THIS YEAR
 - 2. a. GOVERNMENT IMPLEMENTS NEW HEALTH PROGRAM
 - b. NEW HEALTH PROGRAM PUT INTO SERVICE
 - 3. a. STAFF TO ACCOMPANY PRIME MINISTER ON OVERSEAS TRIP
 - b. PRIME MINISTER TO GO OVERSEAS ALONE
- E. The noun *labor* refers to hard or difficult work. The verb is also *labor*. With a partner, discuss what these people might be doing when they are laboring. Which people are probably paid for their labor? Which ones probably receive no money for their labor?

1. a student

5. a housewife

2. a farmer

6. a poet

3. an auto mechanic

7. a musician

4. a cook

8. a gardener

Vocabulary Activities | STEP II: Sentence Level

Word Form Chart					
Noun	Verb	Adjective	Adverb		
intensity intensification	intensify	intense intensive	intensely intensively		

The adjective *intense* refers to something that is strong or extreme. Something *intensive* suggests a strong focus of effort, power, etc. The verb *intensify* means to increase in strength. Other forms of *intense* have related meanings.

People have developed an Intense fear of malaria.

Doctors have intensified their efforts to control the disease.

They have started an intensive program to educate people.

Some common collocations: intense fear/anger/hunger/headache/odor/light, intensive program/care/study/effort/therapy

- F. Rewrite these sentences to include a form of intense.
- The common cold often causes strong feelings in schools.
 Students who have a cold often cause intense feelings in the classroom.
- 2. Teachers strongly dislike having sick children in their classes.
- 3. They say that children with severe coughs belong at home.
- 4. A sick child in class strengthens the chances that other children will get sick.
- 5. Our school's strong health program urges students to stay home if they are sick.

The *priority* of something refers to its importance or value in relation to other things. It is usually accompanied by an adjective.

My children are my highest priority in life.

Hospitals give patients with minor injuries the lowest priority.

When no adjective accompanies the word, it means simply *important*. If something is not important, it is not a priority.

Time is a priority here.

In this situation, time is important.

Color is not a priority.

Color is not important in this situation.

To prioritize things (goals, tasks, etc.) means to list or do them in the order of importance.

CORPUS

- **G.** Imagine that you work with the international organization Doctors Without Borders. Your team has just arrived in a country where most of the people are sick with malaria. With a partner, prioritize these actions—that is, rank them for importance. Write 1 for the highest priority, 2 for the next highest, etc. Give reasons for your prioritization.
- ___ spraying homes with insecticide
- giving food to sick people
- __ cutting down tall grass
- __ getting rid of pools of water
- __ giving medicine to sick people __
- ___ teaching people to wash their hands

Word Form Chart					
N	oun	Verb	Adjective	Adverb	
resident	residence				
residents	residences	reside	residential	residentially	
(people)	(places)				

To *reside* somewhere is to live somewhere or make your home somewhere. A *resident* is a person who lives in a particular place. The plural is *residents*. The place where a person lives is his or her *residence*. The adjective *residential* refers to places where people live.

Most people in Shanghai reside in apartment buildings.

All of the residents of my village work nearby.

We'll be moving to a new residence next month.

Residential property is expensive in big cities.

H. Rewrite this memo to include forms of the words priority, intense, and reside. Try to use other target words from this unit also. Be prepared to present your work in class.

To:

The Village Rescue Team

From: Relief camp director

Re:

People living in villages affected by yesterday's earthquake

The strong earthquake yesterday morning injured many people who live in nearby villages. The earthquake also destroyed many homes.

The first thing we have to do is take care of the injured people. Next, we need to set up tents where people can live until their homes are rebuilt. There is plenty to eat here, so finding more food is not so important right now.

I have asked the village leader to decide which village services should be restored and in what order. His list will help us plan our schedule.

As more people come to the relief camp, our work will probably get more difficult. Help each other and try to make the best of this very difficult time.

Before You Read

Discuss the answers to these questions in a small group.

- 1. What medicines do you take when you are sick? How well do they work?
- 2. Did your parents or grandparents have some old-fashioned ways to treat illnesses? Did those treatments work?
- 3. What advertisements have you seen for medicines on TV or in magazines? What kind of promises do they make?

Read

This article from a popular science magazine describes some of the sources for new medicines.

Searching for New Medicines

ver time, new diseases develop that cannot be cured with the medicines we have. Also, many medicines that once cured common diseases sometimes lose their power to cure. For these reasons, modern drug companies are constantly looking for new medicines to help doctors cure both new and common diseases. One place that drug companies are looking is in the rainforests of the world. Scientists believe that new plants from the rainforests or simple medicines from rainforest peoples might be sources for future miracle drugs.

FINDING A CURE FOR MALARIA

Four hundred years ago, just such a miracle drug was found to cure malaria. In 1633, a fortunate event occurred. A man from Spain went to Peru to teach the native people. While he was teaching, he learned something. The village healer—the only medical practitioner the people had ever known—was making a powder from the bark¹ of the cinchona tree. The healer used this powder to cure malaria. The man brought some of this miracle powder home to Europe, where malaria was a serious disease at the time.

where malaria was a serious disease at the time.

Europeans began using the bark to cure malaria. Soon

Europeans implemented overseas searches for sources of the tree bark.

After many years, scientists identified the ingredient in the tree bark that

cured malaria. It was quinine. By 1827, quinine was commercially produced and became the primary medical treatment for malaria throughout the world. By the 1960s, however, quinine's ability to kill the malaria parasite had declined because the parasite was becoming resistant to it.

About this time, another fortunate event **occurred**. Scientists in China were digging up ancient cities. One city was a place where people had **resided** 2,000 years earlier. The scientists discovered that the ancient people had used a plant, called wormwood, to cure fevers. Scientists collected living samples of the plant to test. They found that wormwood contained

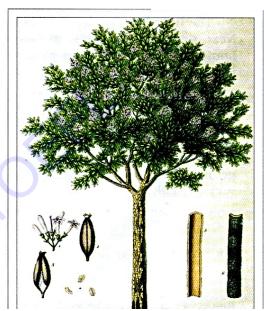

Illustration of the cinchona tree and its flowers, fruit, and bark

¹ bark: the hard outer covering of a tree

artemisinin. This chemical killed malaria parasites. Today,
artemisinin is used in various mixtures with other drugs to treat people who have malaria.

THE HISTORY OF ASPIRIN

Aspirin is another ancient medicine. Its history dates back over 2,000 years, when ancient Greek physicians made a tea from willow bark to ease pain and lower fever. People continued to use willow bark as a home remedy for centuries. Modern scientists identified *salicylic acid* as the special ingredient in the bark that eased pain and fever. Soon, drug companies were making aspirin tablets containing salicylic acid. Today, aspirin is one of the most widely used drugs in the world. Around 100 billion aspirin tablets are produced each year.

A vase with an image of an ancient Greek physician.

A MODERN MIRACLE DRUG

Not all **medical** histories are centuries old. The story of *taxol* is an example of how miracle drugs are still being found in the world's forests. In 1966, scientists discovered a powerful chemical in the bark of the Pacific yew tree. This chemical could stop cell growth. They believed it would be useful in treating the unnatural cell growth of cancer. Several years later, taxol was being used in **intensive** treatments for certain kinds of cancer.

SEARCHING THE RAINFORESTS

Scientists think that many medicines may still be hidden in the rainforests of the world. As a result, over 100 companies that manufacture drugs are searching for new rainforest plants and testing them for possible **medical** use.

Unfortunately, access to these rainforest plants is rapidly disappearing. Logging companies are cutting down the rainforest trees and selling the wood. Commercial developers are laboring hard to clear the land for houses, farms, towns, and roads. Clearly, the priorities of the scientists conflict with the priorities of the loggers and the developers. The scientists want time to find plants that might cures diseases. The loggers and developers want to make money. They do not want to wait for the scientists to look for plants.

WILL CURES BE LOST?

Experts believe that about 50,000 types of plants, animals, and insects disappear every year because rainforests are being destroyed. Scientists fear that when rainforest species disappear, many possible cures for diseases will disappear with them. They also fear that when rainforests disappear, the villages of native people who **reside** in the rainforests will also disappear. When the people leave, their healers also leave. These **practitioners** are the only individuals who know the secrets of healing sick people with forest plants.

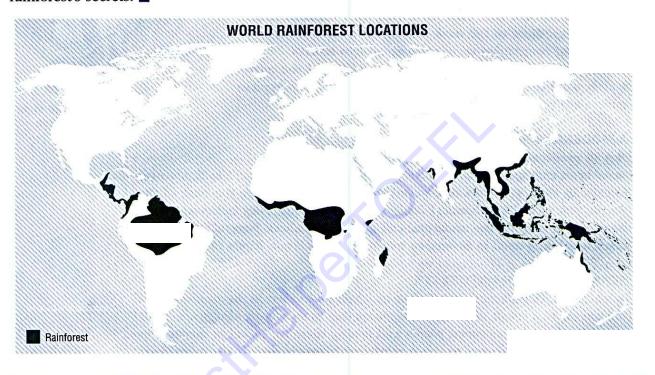

THE SEARCH IS ON

In fact, most modern drugs made from plants came from simple cures that village healers created from nearby plants. Also, some scientists say that over 70 percent of promising anti-cancer drugs originally came from rainforest

plants. As a result, modern drug companies are sending scientists,

accompanied by local translators, to work cooperatively with village healers. The scientists want to learn their secrets before those secrets are lost forever. Drug companies are also sending teams of workers into the rainforests to gather plants to test. If company scientists find a useful cure in a plant they test, they will identify the chemicals in the plant. Then, the company can manufacture a medicine that is chemically identical.

Before rainforests disappear completely, scientists want to gather as many **medical** secrets as possible. Soon, however, it may be too late to learn the rainforest's secrets.

Reading Comprehension

Mark each sentence as T (true) or F (false) according to the information in Reading 2. Use your dictionary to check the meaning of new words.

- ____1. In 1633, Indians residing in Peru treated malaria with a powder made from tree bark.
- ____ 2. Europeans had access to quinine over 2,000 years ago.
- ____ 3. The discovery of artemisinin occurred in the 1960s.
- ___ 4. Taxol is now used in the intensive treatment of malaria.
- ___ 5. Drug companies are implementing searches in the rainforests for new medicinal plants.
- ___ 6. Logging companies are cooperating with scientists by cutting down trees.
- ____ 7. The priorities of rainforest loggers conflict with the priorities of scientists.
- ____ 8. Translators accompany scientists into the rainforests to help scientists learn secrets from village healers.
- ____ 9. As rainforests disappear, the number of people living there will decline.

READING SKILL

Finding the Main Idea

LEARN

Sometimes the title of an article can help you determine its main idea. Be sure to pay attention to the words in the title.

The main idea of an article, or of a paragraph within an article, is not always stated clearly in one sentence. Sometimes you have to add or remove words.

APPLY

Answer these questions about the main idea of Reading 2 and the main ideas of the paragraphs.

- 1. Does the title Searching for New Medicines help you find the main idea of the article in the first paragraph? What is the main idea? Write it here in your own words.
- 2. The main idea of paragraph 2 is its first sentence. Take out the unnecessary words and write the main idea here.
- 3. Complete the main idea of paragraph 3:

 The ancient people of ______ had used _____
- 4. Complete the main idea of paragraph 4:

 Aspirin was first used
- 5. Complete the main idea of paragraph 5:

 Taxol is an example of
- 6. Complete the main idea of paragraph 7:

 Access to
- 7. Write the main idea of paragraph 8 in your own words.

Vocabulary Activities STEP I: Word Level

One person accompanies another person when they go somewhere together.

My brother will accompany me to Indonesia.

I will be accompanied by my brother.

Vocabulary Activities STEP II: Sentence Level

To *cooperate* with someone means that you will work together to do a job. The noun form is *cooperation*. The adjective is *cooperative* and the adverb is *cooperatively*.

Doctors **cooperated** with scientists to develop a new drug. They worked **cooperatively**. It was a **cooperative** effort. Their **cooperation** resulted in an effective new medicine.

CORPUS

F. Imagine that you are the Minister of Health in a country where malaria is a serious problem. In your notebook, write a letter to Dr. Long, who is the Minister of Health in a neighboring country. Suggest three ways that your two countries could cooperate to save people's lives.

The verb *implement* means "to start using a plan, system, etc." The noun *implement* means "tool."

COMPUS

- **G.** In your notebook, list examples of implements for writing, eating, cutting, and cleaning. List as many examples as you can. Discuss your ideas with a partner.
- H. Self-Assessment Review: Go back to page 17 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

Writing and Discussion Topics

With a partner or small group, share ideas about the following topics. Then have each person write a paragraph about one of the topics.

- 1. Reading 1 describes the cycle of malaria: from mosquito to person and back to mosquito. Describe another cycle of malaria: how malaria intensifies poverty and how poverty intensifies malaria.
- 2. What are some things that people can do to keep themselves healthy? What are some things that people can do to feel better if they get sick?

They Know What You Want

In this unit, you will

- read about strategies people use to market products.
- read about how products are named.
- review finding the main idea.
- increase your understanding of the target academic words for this unit.

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. Where do you see advertisements? Think of as many types of places as you can. Where do you see the most ads?
- 2. Has an advertisement ever persuaded you to buy a product? Describe the ad and the product.
- 3. If you invented a new product, what do you think would be the best way to introduce it to buyers?

Read

This introduction to a marketing textbook discusses the different ways that marketing reaches customers.

They Know What You Want

ith her shopping list in hand, a supermarket customer is facing the challenge of selecting a breakfast cereal for her family. The shelves are stocked with as many as 200 varieties. Should she buy wheat, corn, rice, bran, or oat cereal? Sweetened or plain? With added vitamins? With a plastic toy in the box for her kids? Or should she buy the one she has a discount coupon for, or the one with the funny ad on TV, or the one that is on sale?

INFLUENCING SHOPPERS' CHOICES

The shopper's ultimate choice is likely to be determined by some factor other than taste.

Marketers create clever ways to persuade shoppers to buy one product instead of another. Often these have little to do with the food inside the boxes. Instead, they are only to attract shoppers.

DEFINING MARKETING

15 Marketing is a company's plan for selling a product. A marketing plan, administered by a marketing director, includes what to name the product, how to advertise it, how to price it, how to package it, and how to convince customers to buy it. In short, the goal of marketing is to channel a shopper's choices toward a single, specific product.

A marketing plan often begins with a survey to determine who is most likely to buy a certain type of product. Factors such as the sex, age, education, and income of future customers are considered. Then, a marketing team designs a plan aimed at a specific sector of the population, the group that they think is most likely to buy the product.

SELLING A NEW PRODUCT

Selling a cereal, a garden tool, a ballpoint pen, and a designer wristwatch will obviously call for different marketing techniques. Good health may sell cereals but not pens; while humor may sell pens, but not watches. Reliable performance sells garden tools and pens, but not cereals. Rich people buy expensive watches. Students buy pens. Marketing teams must consider such factors when they design a marketing campaign.

Suppose that a company has developed an **innovative** new product: a powder made from dried fruit. When mixed with warm water, the powder becomes a creamy fruit sauce for babies. Although babies will be the ones to eat the product, it is their parents who will buy it. The company's marketing plan will be aimed at the parents, specifically the mothers.

SELECTING A SLOGAN

A survey indicates that most mothers have two top priorities: 1. They want their babies to be healthy; 2. They want to be good mothers. Marketers use this information to create a name for the new baby food: Healthy Start.

⁴⁵ They also create a marketing slogan: *Give your baby a Healthy Start*. This slogan has both an **explicit** and an **implicit** message. It **explicitly** directs a mother to feed a Healthy Start meal to her baby. It also implies that this will make her a good mother because she will be giving her baby a healthy start in life.

ADVERTISING THE NEW PRODUCT

The marketing team then decides how and where to sell Healthy Start baby fruit. They must decide where to publish advertisements and what the ads should say. Maybe the ads will invoke the authority of a famous baby doctor to emphasize the health appeal. The ads will certainly emphasize things like good taste, easy preparation, and high nutrition. Maybe the ads will include coupons for free samples.

OTHER CONSIDERATIONS

Maybe the marketing team will try something **innovative**, like offering a Healthy Start college scholarship to a lucky winner. The team must also decide if the focus will be on **domestic** sales or if the baby food will be

exported to foreign countries. A design company is already designing an attractive package for the product. The marketing team will test the name, slogan, ads, and packaging by showing them to mothers and **surveying** their responses.

Finally, the new product will be placed on supermarket shelves. If the marketing was effective, mothers will select Healthy Start from the dozens of baby foods on the shelves.

Reading Comprehension

Mark each sentence as T (True) or F (False) according to the information in Reading 1. Use your dictionary to check the meaning of new words.

- ____1. A marketing director administers a marketing plan.
- ____ 2. A marketing plan includes ways to convince shoppers to buy a product.
- ____3. Sex, age, income, and education are some of the factors that divide the population into different sectors.
- ____4. A survey of mothers indicates that they want to be happy and want their babies to be smart.
- ____5. A marketing slogan can have both an explicit and an implicit message.
- ____6. Ads published in magazines might invoke the authority of a famous woman who is also a mother.
- ____7. Marketing teams only think about domestic sales of their products and not about exporting them.
- ____8. Offering a scholarship would be an innovative way to sell a new product.

READING SKILL

Scanning

LEARN

Students often need to find specific information from a text that they have already read. Instead of rereading the entire text, you can scan the article to find the information you need. Scanning means quickly passing your eyes over a text to notice specific things.

Think about what to scan for in order to find specific information.

Word Form Chart						
Noun	Verb	Adjective	Adverb			
innovation innovator	innovate	innovative	innovatively			

An innovation is the creation of something new, such as a machine, method, style or idea. To innovate is to introduce something new. A person who creates the innovation is an innovator. The adjective innovative can describe the person or the creation.

The computer was an amazing **innovation**. It led to other **innovative** products.

E. Complete this story using different forms of <i>innov</i>	vate.
Marketers know that (1) adve	ertising is one way
to get the attention of buyers. This means that effecti	ive marketers try to
(2)when they create a marketing	g plan. One
(3)created a process to print ad-	s on the shells of
eggs. Egg farmers did not want to pay for this (4)	
Grocery stores didn't either. Finally, a TV station agree	eed to pay to have
their programs advertised on eggs.	
It's too soon to know if this (5)	will successfully
sell other products. One shopper complained, "Don't	t (6)
with my eggs! I have to eat them!"	

When a person or evidence persuades you, then you are *convinced*. The arguments or evidence was *convincing*.

I read a **convincing** article about climate change. I'm **convinced** it's real.

The witnesses at the trial were **unconvincing**. I'm still **unconvinced** that they saw what happened.

CORPUS

- **F.** Restate these sentences in your notebook, using the form of convince in parentheses. Compare sentences with a partner.
- 1. Health professionals believe that obesity is a serious problem. (are convinced) Health professionals are convinced that obesity is a serious problem.
- 2. They want people to change the way they eat. (convince)
- 3. They have good evidence that junk foods are to blame. (convincing)
- 4. Food companies advertise in a believable way that junk foods will make us happy. (convincingly)
- 5. Children are especially easy to persuade. (convince)
- 6. Even if an ad shows something impossible to believe, children think it is real information. (*unconvincing*)
- Food companies do not believe that they are to blame for children's obesity. (unconvinced)
- 8. They believe it is the parents' responsibility to control their children's diet. *(unconvinced)*

To export something means to send it to another country and sell it there. An export is the product that is sold. An exporter is a person in the business of exporting things.

Brazil exports coffee around the world.

Tea is one of China's most important exports.

Exporters look for inexpensive ways to transport their goods.

Exported and exporting can be used as adjectives.

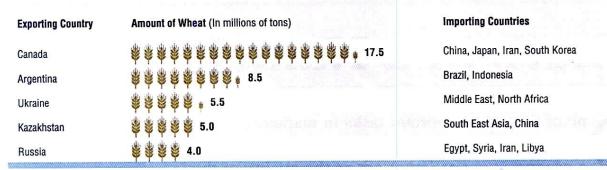

Many of Mexico's **exported** goods go to the United States.

People in the exporting business need to speak several languages.

CORPUS

G. The chart lists a few countries in the world that export wheat. On a separate piece of paper, answer the questions about the chart in full sentences. Use the given form of export.

FIVE WHEAT EXPORTING COUNTRIES (2010)

- 1. Which countries imported wheat from Argentina? (exported)
 Argentina exported wheat to Brazil and Indonesia.
- 2. Which of these countries sent the most wheat? (largest exporter)
- 3. Which country sent wheat to Egypt? (exported)
- 4. Which countries were selling wheat to China? (exporting)
- 5. How much wheat did Ukraine send overseas in 2010? (exported)
- 6. What is one thing that Canada sends overseas to Japan? (exports, noun)

To *publish* something means to make it available to the public. Copies of books, magazines, newspapers, music, and computer software are some things that are published. A *publisher* is a person or company that produces the work.

The Los Angeles Times newspaper is published every day.

H. Look at the title page of this book and on the back of that same page. What is the name of the publisher of this book? In what year was the book published?

Before You Read

Read these questions. Discuss your answers in a small group.

- Many automobiles are named for animals, such as Cougar or Jaguar. Would you buy an automobile named Turtle? How about Elephant? Why or why not?
- 2. What factors would you consider if you were responsible for naming a new product?
- 3. Does the name of a new product help you decide whether to try it? Why or why not?

Read

This excerpt from a marketing textbook discusses the factors that go into choosing a good name for a new product.

What's in a Name?

ne of the most important tasks in marketing a new product is giving it a name. In marketing, the quality of a product is not as important as the quality of the name it is given. This is because marketing is not about the product; it is about *selling* the product. Marketers use strategies such as attractive packaging, catchy slogans, and other clever ways to **convince** consumers to buy their product. The most powerful marketing strategy, however, is giving a product a powerful name.

RULE 1

of computers, there were several competing brands on the market, including Apple II, Commodore Pet, IMSAI 8080, MITS Altair 8800, and Radio Shack TRS-80. In those days, most buyers knew very little about computers, so they were not able to judge the quality of one over the other. As a result, they rejected the computers with complex names. Instead, they chose the brands that **invoked** something familiar. They chose, of course, the Apple II.

RULE 2

The name must also be easy to pronounce. If customers can't pronounce the name of a product, they won't buy it. A short name is easier to remember and to pronounce. According to research done by Strategic Name Development consultants, the best names have three or fewer syllables, such as Tums (antacid tablets), Xerox (copiers), or Cheerios (cereal). Many well-known names are longer, of course, such as Mercedes-Benz (automobiles) and Coca-Cola (soft drinks), so length is not the only factor.

RULE 3

²⁵ A product name should be unique. It shouldn't sound like the name of any other product, especially a competing product. Shoppers tend to confuse Breyer's Ice Cream with Dreyer's Ice Cream and Rolex (watches) with Rolodex (desk indexes), for example.

RULE 4

In addition, an effective name should hint at what the product is used for. For example, Sleepeez is a sleeping medication and Windex is a window cleaner. A name should also be appropriate for the type of product it represents. Names of medicines should sound medical, names of foods should sound tasty, and names of **domestic** cleaning products should sound hard-working.

RULE 5

An effective name also includes words, or parts of words, that are positive and inviting.
 Sometimes, the product name sounds like another descriptive word that has a positive meaning. The pain reliever Aleve, for example,
 sounds like "relieve." Band-Aid (a small plastic bandage) sounds a bit like "bandage" and includes the word "aid." Frequently, names of products aimed at high-income consumers implicitly advertise luxury. Consider the names
 of these cruise ship companies: Crystal, Princess, Royal Caribbean, and Celebrity.

RULE 6

The letters within names are important, too. A **survey administrated** by the above consultants asked English speakers about their reactions to various letters of the alphabet. The results showed that people associate the letters C, S, and B with something traditional, but associate the letters Q, V, X, and Z with something **innovative**. Additionally, people in the **survey** associated certain letters with one **sex** or the other. They considered the letters F, L, V, and W feminine, but the letters M, X, and Z masculine. It is not clear how those **surveyed** might react to the automobile names Volvo, Mazda, or Lexus.

A product name should . . .

- 1. be easy to remember
- 2. be easy to pronounce
- 3. be unique
- 4. hint at what the product is for
- 5. include positive words or word parts
- 6. contain effect letters
- 7. translate well into other languages
- 8. have no negative associations

RULE 7

Marketers must also consider how a product name will translate in other languages if the product is **exported**. A famous example of this occurred when the Chevrolet Nova automobile was **exported** to Argentina in the 1970s. Some people predicted that it would sell poorly because in Spanish the two words "No va" mean "It doesn't go." Fortunately, "nova" (a bright

star) is the same word in both Spanish and English and the car sold well.

RULE 8

Finally, a name must not generate negative associations in the minds of consumers. Many words have an **implicit** message as well as an **explicit** meaning. Why, for example, has no car manufacturer named a car the Elephant? Elephants are big, strong, and dependable, but they are also slow-moving, huge, and eat a lot.

70 There used to be a weight-loss product called Ayds. It disappeared once AIDS became a serious illness worldwide.

Corporations put forth great effort to find the right name for a new product. They often hire consultants who specialize in creating product names. Working with the principles above, they create several possible names. Then, they **channel** the names through one or more focus groups. These groups are made up of individuals drawn from the **sector** of the population that is most likely to buy the target product, such as, sports fans, frequent travelers, or senior citizens. When a focus group meets, they freely discuss what they like or don't like about the possible names.

Once the right name is chosen, advertisements are widely **published** to introduce the new product to the buying public. Only time will tell if the important marketing decisions made earlier will be effective in selling the product.

Reading Comprehension

Mark each sentence as T (True) or F (False) according to Reading 2. Use your dictionary to focus on the meaning of new words.

dictionary to focus on the meaning of new words.
1. A powerful name helps convince consumers to buy a product.
2. Early computer buyers chose a brand name that invoked high-tech innovation.
3. The names of domestic cleaning products should sound hard-working.
4. Many words have an implicit message as well as an explicit meaning.
5. A survey administered by naming consultants showed that product names spelled with an X are considered innovative.
6. A product name must be changed if the product is exported to other countries.
7. High-income car buyers would be likely to buy a luxury car named Elephant.
8. Naming consultants channel possible product names through focus groups

drawn from the sector of the population most likely to buy the target product.

C. Imagine that you are meeting with clients who are important to your advertising business. Everyone wants to be polite. With a partner, match the *implicit* statement on the left with the *explicit* message that has the same meaning.

1. Excuse me for yawning.	a. Don't open that window
2. It's a little cold in here.	b. You made a mistake.
3. Let me review the costs.	c. I don't know the answer
4. Shall we break for lunch?	d. That's too much money.
5. I want to think about that.	e. I'm bored. / I'm tired.
6 Is this date correct?	f. I'm hungry.

Vocabulary Activities STEP II: Sentence Level

Domestic refers to the home and family or to a home country. It can be used in many different contexts. The adjective is domesticated.

Those items are necessary to satisfy his family's basic domestic needs.

Domestic postal rates are lower than overseas rates.

My country exports 25% of domestically grown fruits and vegetables.

Scientists say that domesticated animals live longer than wild animals.

CORPUS

- D. Rewrite these sentences in your notebook using a form of domestic. Compare sentences with a partner.
- 1. Few families can afford to hire someone to help with household chores.

 Not all families can afford to hire someone to help with **domestic** chores.
- 2. Farmers often have many tame animals, such as sheep and goats.
- 3. Every summer our store has a sale on products for the home.
- 4. You should arrive at the airport two hours before flights within the country.
- 5. Coffee must be imported from other countries because it is not grown here.

To *administer* means to control and manage the giving of something. For example, a doctor administers medicine to patients, or a teacher administers a test to students.

The most common usage of this word family, however, is for business and politics:

administrator

a manager in a company, organization, or government

administration

the work done by administrators

the administration

the group of people managing an organization or

government

The school **administrator** was pleased with the success of the innovative programs she has implemented across the city.

The director oversaw the administration of the new safety rules.

The administration has been criticized for wasting taxpayers' money.

Administrative refers to the work of administering services, or office work in general. Administratively is the adverb.

The chief of police has an **administrative** role in the police department. My brother is the **administrative** assistant for the whole department.

The fire department is administratively separate from the city government.

CORPUS

E. Read the chart showing some of the employees of Black's Button Company. Then answer the questions that follow in your notebook. Include the form of administer indicated in each sentence.

Name	Title	Area of Responsibility
Jerry Green	Plant Manager	safety and maintenance of the factory
Marie Brown	Administrative Assistant	secretary to Fred Black
Fred Black	Chief Executive Officer	operation of the entire company
Ellen White	Marketing Director	marketing
Jane Gray	Human Resources Director	employment office

- 1. What does Marie Brown do? (*administratively*) She assists Mr. Black **administratively**.
- 2. Who is Fred Black? (administrator)
- 3. What does Ellen White do? (administrative responsibility)
- 4. What does Jane Gray do? (administers)
- 5. What does Jerry Green do? (administration)
- F. Which of the jobs in the chart in activity E would you be best at? Why? What are your administrative strengths and weaknesses? In your noteboook, write a short paragraph in which you explain your answers. Be prepared to present your work in class.
- G. Self-Assessment Review: Go back to page 33 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

Writing and Discussion Topics

With a partner or small group, share ideas about the following topics. Then have each person write a paragraph about one of the topics.

- 1. Reading 2 mentions several rules for naming a product. Think of some successful products whose names do not follow these rules. Why do you think they are successful anyway?
- 2. Describe an advertisement that you like from a magazine. What sector of the public do you think is the target market? How does this ad try to convince the target market to buy the product? Is it innovative in some way? If so, how?
- 3. Think of the many ways that a product could be advertised, such as on TV or in a magazine, for example. What are the advantages of each way?

ldentifying People

Read these questions. Discuss your answers in a small group.

- 1. Do you have a nickname? Who calls you by this name?
- 2. If you had a problem at school or at your job, who would you ask for help?
- 3. Name some people in your neighborhood that wear uniforms.

Read Read

This excerpt from a sociology textbook discusses group membership.

Who Are You?

Imagine that you read the following story in your local newspaper.

Yoshi Tanaka was injured at the Pacifica Café when the chair he was sitting on broke. Angelo Manzoli said his career is ruined. Carlos Armada claimed that Tanaka was to blame. Fred Katz said his crew helped transport the 450-pound man to a hospital. Ahmed Nadel said Tanaka was not seriously hurt.

Who are these people? If we give each a title, the **ambiguous** story becomes easier to understand.

Sumo wrestler Yoshi Tanaka was injured at the Pacifica Café when the chair he was sitting on broke. His trainer, Angelo Manzoli, said his career is ruined. Carlos Armada, owner of the café, claimed that Tanaka was to blame. Fire Chief Fred Katz said his crew helped transport the 450-pound man to a hospital. Physician Dr. Ahmed Nadel said Tanaka was not seriously hurt.

GROUPS

Throughout our lives, and even during a single day, we are part of many groups. These groups might include a family, an orchestra, a team, a business, a school, a country, or even a temporary group such as the people affected by a café accident.

TITLES

Within a group, titles help **differentiate** one person from another. Each person is an **integral** part of many different groups, so each person has many titles. For instance, a man might be an engineer, a husband, a father, a son, a brother, the coach of his son's baseball team, a tennis club member, a conservative voter, and an Internet chat room visitor. The title *engineer*

defines his status within the **context** of employment. The titles *husband*, father, son, and brother define his status within the **context** of family.

ADDRESSING OTHERS

Titles also provide guidelines **whereby** people know how to address others. At work, the engineer's co-workers call him Jim, but people who phone his company will ask to speak to Jim Wilson. His wife calls him Honey, and his children call him Dad. His mother still calls him Jimmy, a childhood nickname, and his brother affectionately calls him Jimbo. The baseball team kids call him Coach Wilson. His tennis partner calls him Wilson. Mail he receives from his political party is addressed to Mr. James Wilson. On the Internet, he's known as J.W.

CULTURAL DIFFERENCES

Rules for how people address each other vary from one culture to another. In Japanese culture, for example, only family and close friends call someone by his or her given name. It is considered rude to call someone by just his family name. A family name must be followed by the title -san, so Mr. or Ms. Tanaka is known as Tanaka-san. When addressing someone of

a higher status, often no name is used. Instead this person is addressed by his or her title, such as

teacher or company president.

JOB TITLES

The title company president clearly refers to the leader of a company. Among its employees, a company differentiates between the types of workers via job titles like lab technician, secretary, or department supervisor. A person's job title also serves as an index (or measure) of his or her status within the company. Employees with a higher status are usually paid a higher salary. Similarly, if an employee earns a raise in salary, he or she is often given a new job title.

LEADERS' TITLES

The leader of a group of people almost always has a title. For instance, clubs have presidents, teams have captains, committees have chairmen or chairwomen, stores have managers, fire

55 departments have chiefs, and schools have principals. Every civil leader has a title, too, though these vary somewhat depending on a country's system of government. These titles include prime minister, president, governor, sultan, and king. When official meetings convene, the leaders are addressed in a formal style, such as

Madam President or Governor Ramos.

END AND MAN AND DESIGNATION OF THE SECURITY	ACTO CONTRACTOR MARCHINE DE AVANTA	
TITLE	LOCATION	POSTED
President Construction	Dubai	1 day ago
Secretary Marketing	New York	2 days ago
Lab Technician Pharmaceutical	Tokyo	5 days ago
Accounts Manager Advertising	London	1 week ago
Art Director Publishing	Frankfurt	2 weeks ago
Analyst Media	Madrid	3 weeks ago

Chancellor Angela Merkel and Prime Minister Sheikh Hasina

INHERITED TITLES

Some titles are acquired by inheritance. These include the royal male titles king, emperor, and sultan and their analogous female 65 titles queen, empress, and sultana. Leaders of tribes and clans may inherit titles such as khan, sheikh, and chief. A given name plus the inherited title usually constitute their public names, such as King Faisal or Queen Elizabeth. Often they are addressed in special ways, like Your Highness.

MILITARY TITLES

70 Titles are especially important in the military, where authority is channeled from top to bottom via a strict chain of command. A common ranking system in armies begins at the top with the title field marshal or general, and ends with the lowest rank of soldier.

Titles are important tools that help us understand the status of members 75 within human groups.

Reading Comprehension

Mark each sentence as T (true) or F (false) according to the information in Reading 1.

Use your dictionary to check the meaning of new words. ____1. The acquired title king for a man is analogous to the title queen for a woman. _ 2. The title engineer defines a person's status in the context of family. ___ 3. Titles provide guidelines whereby people know how to address others. ____4. Each person is an integral part of many different groups. ___ 5. Titles are somewhat important in the military. ____ 6. Companies differentiate between types of workers via job titles. ____7. When official meetings convene, civil leaders are addressed in a formal style. __ 8. A given name plus an inherited title constitute the public name of Queen Elizabeth. ___ 9. The titles *field marshal* and *general* are ambiguous.

_10. A job title is an index of an employee's status in a company.

READING SKILL

Identifying Examples

LEARN

One way that writers make their ideas clear is by giving examples. Sometimes an entire text is made up of examples, with each paragraph giving a different kind of example to support the main idea of the reading. There might also be several examples within one paragraph to help explain the ideas in that paragraph.

Reading 1 uses examples in both of these ways. You can identify examples in a text by looking for certain signals. Here are some common words and phrases that signal examples:

for example including

for instance these include such as one is...

like

there are many kinds of...

another is...

APPLY

Refer to Reading 1 to answer these questions.

- 1. What kinds of examples are discussed in the paragraph titled "Groups"?
- 2. What words are used to introduce the examples in the paragraph titled "Groups"?
- 3. What signal words are used in the paragraph titled "Cultural Differences" to introduce the examples?
- 4. What signal words are used in the paragraph titled "Job Titles" to introduce the examples?
- 5. What signal words are used in the paragraph titled "Leaders' Titles" to introduce the examples?

REVIEW A SKILL Scanning (See p. 36)

Scan Reading 1. How many times does the word *president* occur? Scan the paragraph titled "Addressing Others". How many different names does the engineer have?

via whereby

In 1849, thousands of people went to California in search of gold, hoping to get rich. Levi Strauss, a cloth salesman, went there, too. He hoped to get rich, but in a different way. When the gold miners complained that their pants tore easily, Strauss made them pants out of strong denim cloth. The men liked the pants, but the pockets kept tearing. This _______ a problem, but a tailor had an idea ______ the pockets could be made stronger with copper rivets.

Strauss and the tailor soon became rich—not from gold, but from inventing jeans.			
For the next 100 years, jeans were worn mostly by farme	ers or factory workers. In		
the 1950s, young people began wearing jeans. As a grou

Vocabulary Activities STEP II: Sentence Level

To differentiate one thing from another means "to create a difference between them," or "to see the difference."

Universities differentiate between sports for men and sports for women.

It's hard to differentiate one brand of coffee from another.

The noun form is differentiation.

Differentiation between military ranks is shown by stripes on uniform sleeves.

CORPUS

- E. In your notebook, rewrite these sentences to include the given form of differentiate.
 - 1. In most cultures, given names show a difference between males and females. (differentiate)
 - 2. Often there is no change in the civil titles of males or females. (differentiation)
 - 3. Civil titles help separate ordinary citizens from people in authority. (differentiate)

Something that is *ambiguous* is not clear in meaning, often because there is more than one possible meaning. For example, the newspaper headline "Hospital Begins Operations" is *ambiguous*. The *ambiguity* is caused by the word "operations," which has more than one meaning. "Operations" can refer to either medical surgery or services.

The headline can be rewritten to clarify the writer's meaning. Two *unambiguous* headlines are "Hospital Begins Surgery" and "Hospital Opens for Service."

CORPUS

- **F.** Read these ambiguous newspaper headlines. Each has two meanings. With a partner, discuss why they are ambiguous. Then in your notebook, write two unambiguous sentences that show the two meanings.
 - 1. President Enjoys Visiting King

The president enjoys going to visit the king.

The president enjoys having the king visit him.

- 2. Rare Monkey Eats Carrots and Flies
- 3. Bus Riders Miss Planes
- 4. Entertaining Actors Can Be Expensive
- 5. Biting Frogs Found Harmful

To convene means "to meet or come together, usually for an official or formal meeting." The noun form is convention.

The parliament convenes each morning at 10 a.m.

I'll attend a medical convention in Tokyo next month.

Convention can also mean a tradition or a standard way of behaving.

The Western convention is for a married woman to take her husband's surname.

Something conventional is traditional or standard, while something unconventional is unusual and often disapproved of.

Teenagers sometime surprise adults with unconventional ideas.

You should dress conventionally when you apply for a job.

CORPUS

- **G.** Write the answers to these questions in your notebook. Write in full sentences and use the word in parentheses.
 - 1. Describe a common wedding tradition practiced in your family. (conventionally)
- 2. Describe how students at your school address their teachers. (conventional)
- 3. Describe where students at your school gather for meetings. (convene)
- 4. Describe a standard way that people greet each other. (convention)

Whereby means "by which" or "because of which." It is a formal way to connect two ideas. The first idea describes an action and the second part shows the result of the action.

Nancy went on a strict diet, whereby she lost 35 pounds.

Note that whereby connects two full clauses.

H. In your notebook, complete each of these sentences with a full clause t begins with the word whereby. Use the story about Yoshi Tanaka at the of Reading 1 as a source of ideas.			
1.	Yoshi Tanaka's chair broke, whereby he <u>fell on the floor</u> .		
2.	His manager saw tears in Yoshi's eyes, whereby the manager knew		
3.	The owner of the cafe claimed that Yoshi was to blame, whereby the owner avoided		
4.	Fred Katz's crew lifted Yoshi onto a fire truck, whereby they were able		
5.	A hospital technician took X-rays, whereby the doctor		

The style of something is the way that it is done, designed, or presented.

I don't like the style of that shirt.

Her style of writing is very easy to follow.

Style usually refers to things that are created, such as a style of art, architecture, music, singing, dancing, writing, etc.

Something that is *in style* is currently popular. Something that is *out of style* is no longer popular. Fashionable clothes are said to be *stylish*.

The verb to style means to arrange someone's hair in an attractive way.

I had my hair cut and styled yesterday.

On a separate piece of paper, write a sentence about someone's style of doing something that you like. Tell why you like it. Write another sentence about someone's style of doing something that you do not like. Tell why you do not like it. Choose from these topics: teaching, cooking, singing, talking, playing a sport, or choose one of your own.

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. What jobs or social roles require people to wear special clothing?
- 2. What clothes do you associate with royalty (kings and queens, etc.)?
- 3. A flag is one symbol of a nation. What are some other things that can be used as symbols of a nation?

Read

This excerpt from a social science textbook is about the significance of clothing in a culture.

Symbolic Clothing

undreds of years ago, umbrellas were symbols of power and authority. Kings, sheikhs, popes, and other rulers believed that owning these sunshades added to their importance. The more umbrellas a ruler acquired, the more he impressed others; and, by analogy,

sthe bigger his umbrellas, the more power the owner appeared to have. It seems odd to us today that such an everyday object could have once been used to **differentiate** rulers from ordinary people. Yet at that time, an umbrella was an unambiguous symbol of

umbrella was an **unambiguous** symbol of power. Similarly, contemporary cultures

today employ many common items, including clothing, as symbols of social status.

IN UNIVERSITIES

The academic cap and gown is one example of symbolic clothing. Hundreds of years ago, university students were required to

- wear long, black robes. Today academic robes are usually worn only for graduation ceremonies, along with a special cap. Many universities have developed their own traditional style and color of cap and gown.
- For example, at some universities, students wear a close-fitting cap topped by a flat square. A tassel, which is a bundle of long silk strings, hangs from the square. By convention, students begin the graduation ceremony with the tassel hanging from the left side of the square. Once a university administrator declares that the students have
- ²⁵ officially graduated, they move their tassels to the right side of the square to indicate their new change of status. Graduating students also wear collars or sashes of cloth over their gowns, whereby their field of academic specialization is indicated via color. These colors vary among universities

and countries. For example, in Spain a gold cloth symbolizes medicine, while in the United States a green cloth symbolizes medicine.

IN CIVIL COURTS OF LAW

For example, in the civil courts of law in many countries, judges wear long robes, usually black, that cover their ordinary clothing. The robes identify the judges' role in the courtroom and symbolize their authority to administer justice. The gavel that judges rap to convene court and maintain order is another such symbol of authority. In Britain and in most Commonwealth nations, judges and certain court officials also wear white wigs that symbolize their roles.

AMONG ROYALTY

Similarly, the ceremonial clothing of kings and queens is symbolic of their royal status. The most common symbol of royal status is a crown. The crown is placed on the head of the new monarch during a formal ceremony. He or she usually wears a beautiful cape made of fur, feathers, or delicate material for the event.

WEDDING SYMBOLS

A wedding, too, is a change-of-status ceremony. Traditional clothing is usually an integral part of the ritual. In a conventional Western wedding, the bride wears a long, white dress. She also wears a white veil on her head and carries a bouquet of flowers. Her clothing and various accessories (which may be hidden) constitute traditional goodluck items that a bride should wear. These include "something old, something new, something borrowed, something blue, and a lucky penny in her shoe." An important part of the ceremony is the exchange of wedding

rings. These circles of gold or silver have no ending, and symbolize the lifetime relationship the bride and groom are about to begin.

The symbolism of the white wedding dress is so strong that brides from many non-Western cultures have chosen to include such a dress in their weddings. An Asian bride, for example, might wear a red gown during a traditional wedding ceremony and then change into a **stylish** white wedding dress for the celebration that follows.

UNIFORMS

A uniform identifies the occupation and status of many workers. In the civil sector of society, for example, police officers and fire fighters wear uniforms. So do waiters and waitresses, airline pilots and cabin stewards, and nurses and dental assistants. With the exception of fire fighters, these people could do their jobs just as efficiently in ordinary clothing. A uniform, however, serves two important purposes. First, a uniform differentiates these workers from other people. A uniform is one way whereby the workers can be easily identified by others. Second, a uniform

is a symbol of authority, which gives people confidence in the workers. Another item of clothing that is **somewhat** of a uniform is the tall, white hat worn by chefs. This hat **conventionally** symbolizes the chef's position of authority in the **context** of a restaurant kitchen.

Military personnel, too, wear uniforms, but different types. One type is for everyday wear, and another is the formal uniform worn for military ceremonies. A third type is worn in battle. Military uniforms serve several symbolic functions. First, the various decorations on a uniform jacket and hat are indexes of a member's rank in the
 military. Second, uniforms encourage members of a group to acquire

military. Second, uniforms encourage members of a group to acquire a sense of unity and pride. Finally, in the **context** of a battle, uniforms become symbols of the nation the soldiers are defending.

Symbolic clothing can symbolize many things, including authority, nationality and change of status. Often the original significance of the clothing has been forgotten or has changed over time, yet societies continue to respect the conventional symbolism. Other clothing, such as the white wedding dress, became symbolic somewhat recently, yet is still considered traditional. The objects and clothing that become important symbols in a culture are determined by the special meaning that people give them.

Reading Comprehension

Mark each sentence as T (true) or F (false) according to the information in Reading 2. Use your dictionary to check the meaning of new words.

- 1. Hundreds of years ago, the umbrellas that kings, sheikhs, and popes acquired became indexes of their high positions in society.
- ____2. Sometimes ambiguous symbols of power are used to differentiate between rulers and ordinary people.
- _____ 3. The gavel that judges rap to convene sessions in a civil court of law is a symbol of the nation they represent.
- ____4. Graduating students wear collars or sashes over their academic gowns, whereby they indicate their change of status via color.
- _____5. A long white dress and a white veil constitute the wedding clothing of a traditional Western bride.
- ___ 6. In some cultures, the Western wedding dress is becoming an integral part of non-Western weddings.
- ____ 7. In the context of a battle, uniforms become symbols of military rank.
- ____ 8. The symbolism of some ceremonial clothing is somewhat recent.

An *index* is an indication or a measurement of something.

The consumer price **Index** shows changes in the prices of products over time.

The *index* of a textbook helps readers locate information in the book.

Check the **index** of your science text to see if it covers cell division.

Note: Indexes is the common plural form, but sometimes indices is used.

- В. Read these statements about an imaginary country. What might each statement be an index of? Discuss your answers in a small group.
 - 1. Most people live to be 75 years old or more.

This might be an **index** of good medical care in the country.

- 2. Most children of the residents go to college.
- 3. Almost every adult of working age has a job.
- 4. Ninety percent of the adults vote in elections.
- When something is an integral part of a whole thing, it means that it is a necessary or required part. Complete these sentences. Refer to the information in Reading 2. Compare answers with a partner.
 - 1. In some cultures, ______ is an integral part of the ceremonial clothing.
 - 2. Changing the ______ is an integral part of a graduation ceremony.
 - is an integral part of a Western wedding.
 - ____ has become an integral part of some non-Western weddings.

Vocabulary Activities STEP II: Sentence Level

	Word F	orm Chart	
Noun	Verb	Adjective Adverb	
context	contextualize	context contextualized	

One meaning of *context* is the "circumstance or situation in which something occurs."

A judge's robe is a symbol of authority only in the **context** of a courtroom.

Context can also refer to the words and ideas in a text that help readers understand new or ambiguous words. Good readers use context clues to help them understand new or ambiguous words in a text. It is hard to learn new words in a list because the words are not contextualized.

In Reading 2, the context clues—academic clothing, graduation ceremony, cap—help you understand what the word "tassel" means.

- **D.** Write a sentence describing the appropriate clothing to wear in each of these contexts. Use the word *context* in your sentence.
 - 1. interviewing for a job

It would be appropriate to wear a suit in a business context.

- 2. attending a wedding as a guest
- 3. eating dinner at an informal restaurant
- 4. attending a nephew or niece's high school graduation ceremony
- 5. going hiking in the mountains
- E. Each of these words has more than one meaning. Consult your dictionary to find the different meanings. Then write a sentence in your notebook that provides a context explaining one meaning of each word. Compare sentences in a small group.
 - 1. refrain

The guitarist sang the verses of the song and asked the audience to sing the **refrain** after each verse.

- 2. game
- 3. orange
- 4. gag
- 5. pale

The verb *constitute* means "to make up or form something." The adjective form is *constituent*.

Nine players constitute a baseball team.

The **constituent** parts of a business suit are a fitted jacket and matching pants.

- In your notebook, write sentences that tell the constituent parts of each of these things. Compare your answers with a partner.
 - 1. a textbook

3. a computer

2. an orchestra

4. a burger

The verb *acquire* means "to obtain or gain something." You can acquire something physical (books, property, etc.) or abstract (knowledge, a skill, a habit, etc.).

I acquired an antique violin recently.

I acquired a good education in my small-town school.

The noun form is acquisition.

The violin is my most valuable acquisition.

The acquisition of a second language is not easy.

CORPUS

- **G.** In your notebook, write a short paragraph about a real or imaginary trip that you took to a foreign country. Name at least four things that you acquired on your trip. Include the word acquisition. Be prepared to present your work in class.
- **H.** Self-Assessment Review: Go back to page 49 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

Writing and Discussion Topics

With a partner or small group, share ideas about the following topics. Then have each person write a paragraph about one of the topics.

- 1. What are some other groups of people (not described in this unit) that wear uniforms or special clothing? Describe what they wear and why.
- 2. Describe a special ceremony that you attended, such as a wedding or graduation. Describe who took part in the ceremony and what they wore. Were any symbols a part of the ceremony?
- 3. What are some reasons why sports teams wear uniforms?

UNIT LANGE

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. How would you define success?
- 2. Are all famous people successful? Are all successful people famous? Give examples to support your opinion.
- 3. Name some people you consider successful. Why do you consider them successful?

Read

This article discusses important information about how to be successful. It defines success and explains what it takes to achieve it.

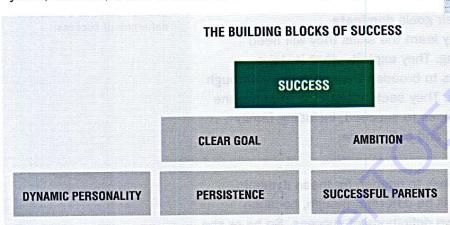

20 clear goal to work toward. They start one scheme after another but never seem to find success.

THE NEED FOR PERSISTENCE

All children begin life with great ambition. Consider the ambition that babies **demonstrate** as they try to sit up, crawl, and walk. Despite repeated failures, they keep trying until they succeed.

What makes them keep trying? Persistence. This is the ability to focus on a task despite interruptions, obstacles, and setbacks. Persistence is strong throughout childhood. During the teen years, however, a fear of failure or a fear of being laughed at by

others for trying to "be somebody" may **Inhibit**, or stop, their persistence. As a result, many teens seem to just quit trying.

THE ROLE OF PARENTS

If parents are **aware** that a lack of ambition is common in teenagers, they may be able to minimize it by providing **positive** learning experiences in the early years. For example, parents can encourage their young children to take on challenges, praise them for trying, and comfort them if they fail. One of the strongest influences on a person's ambition is the family. It is not a **coincidence** that successful parents tend to raise successful children. However, is this due to heredity or upbringing? Evidence suggests that both play a **role** in determining ambition.

THE ROLE OF ECONOMIC STATUS

The economic status of a family also influences a person's level of ambition. Young adults who grew up in poor families may be more focused on meeting the needs of today rather than reaching for the dreams of tomorrow. Or they may have great ambition but lack the means to reach their goals. In contrast, ambition may be unnecessary for those who grew up in rich families because, at least financially, they are already successful. Not surprisingly, ambition seems to **coincide** most often with middle-class status.

MIDDLE CLASS

Although financially secure, middle-class
50 families may not feel socially secure. This
status anxiety fuels the ambition needed to
reach for success.

THE ROLE OF PERSONALITY

Despite their backgrounds, it is people with dynamic personalities who are most likely to succeed. These are people who don't wait for things to happen; these are people who take effective action to make things happen. With their eyes on the future, their goals dominate

the choices they make. They learn the skills they will need

through education or training. They exploit—that is, take advantage of—opportunities to broaden their knowledge through experience and observation. They seek assistance from anyone who might further their chances to succeed, including family members, friends, coaches, and colleagues.

Each person has a different definition of success.

ATTAINING SUCCESS

And finally success is very likely to happen for these dynamic people. For each person it will be different, though, because individuals generate their own definitions of success. So he or she will get the job, win the race, earn the diploma, start the business, or climb the mountain—and the goal will become a reality.

Reading Comprehension

- **A.** Mark each sentence as *T* (True) or *F* (False) according to the information in Reading 1. Use your dictionary to check the meaning of new words.
- 1. Stories generated by the media demonstrate that ordinary people can be successful.
- ___ 2. Family plays a major role in influencing a child's level of ambition.
- ____ 3. The teen years often coincide with a fear of failure and a lack of ambition.
- ___4. Positive learning experiences in the early years can inhibit persistence.
- ____ 5. Dynamic people are aware that they must take effective action to attain success.
- 6. Despite their backgrounds, professional people are the most likely to succeed.
- 7. Meeting the needs of today may dominate the thoughts of a young adult who grew up in a poor family.
- ____ 8. People seeking success might ask colleagues to assist them.
- ____ 9. One way to prepare for success is to exploit opportunities to learn through observation.

Vocabulary Activities STEP II: Sentence Level

The verb coincide means "to happen at the same time as another event." It can also be used to refer to two ideas or opinions that agree.

The release of Disney's new film was scheduled to **coincide** with the first day of vacation.

Voters could not re-elect a mayor whose views did not coincide with theirs.

The noun form is *coincidence*. It refers to the surprising fact of two or more similar things happening at the same time by chance. The adjective form is *coincidental*.

By **coincidence**, Junko and Mariko came to the picnic wearing identical outfits. It was a **coincidence** that they had identical outfits.

It was also coincidental that their husbands were wearing identical shirts.

CORPUS

- **F.** For each of these sets of sentences, circle the one sentence that describes a coincidence. Then, write a sentence in your notebook explaining what the coincidence is, using the word coincidence or coincidental.
- 1. a. Mr. Romano had spaghetti for lunch. His wife made spaghetti for dinner.
 - b. Mr. and Mrs. Romano had spaghetti for dinner.

By **coincidence**, Mr. Romano had spaghetti for lunch on the same day that his wife made spaghetti for dinner.

- 2. a. Dmitri got on a bus to go downtown. His friend Pavlo was on the same bus.
 - b. Maria and Lupe got on a bus and they both went downtown to go to work.
- 3. a. Barry and Larry are twins. Their birthdays are on March 1.
 - b. Sue and Lou are neighbors. Their birthdays are on June 1.
- 4. a. A family has five children. Each child's last name is Rodriguez.
 - b. A basketball team has five players. Each player's last name is Rodriguez.

	Word For	A CONTRACTOR OF THE PARTY OF TH	Adverb
Noun	Verb	Adjective	Adverb
dominance domination	dominate	dominant	4 No. 100

The verb *dominate* means "to have strong control over something" or "to be the most important part of something."

My father dominated our lives when my brother and I were small.

The huge brick fireplace dominated the living room.

CORPUS

G. Complete this paragraph, using different forms of *dominate*. Compare your work with a partner.

The term "alpha male" is used in the science of animal behavior. It refers to the (1) ______ male in a group of animals, such as wolves.

This term can also apply to people. Among humans, the alpha male tries to (2) _____ all of the other males in his social group; for example, his colleagues in the workplace. In the animal world, males may fight to attain (3) _____ over others. A human male may also "fight," but with words and actions that prove he is superior. Often the male who (4) _____ others is friendly and has clear goals, so others like having him as their leader.

To be aware means "to know about or realize something." The opposite is to be unaware. The noun form is awareness.

Jon was aware that everyone was watching him.

Jon had no awareness that his name was called.

Jon seemed unaware of the audience's applause.

- H. In your notebook, complete these sentences about successful people. Use your own ideas. Compare sentences with a partner.
 - 1. A successful teacher is aware that . . .
- 2. During the race, marathon runners may be unaware that . . .
- 3. Someone who is applying for a job must be aware of . . .
- 4. To write a successful book, an author must have an awareness of . . .

Before You Read

Discuss your answers to these questions in a small group.

- 1. What is your definition of personality?
- 2. Do you know people who constantly talk about themselves? Why do you think they do that?
- 3. What are some things that famous people do that you don't approve of?

Read

This excerpt from a psychology textbook discusses a personality trait called narcissism and the characteristics of people with this type of personality.

I Love Me

Tarcissus was the name of a character in an ancient Greek story. According to the story, he was very much in love with his own good looks. He drowned in a pool of water when he leaned over too far, to admire his handsome reflection. There is a personality trait named for Narcissus. It is called a "narcissistic personality." People with this type of personality have great love for themselves, and this **coincides** with a strong need to be admired by others.

NARCISSISTIC BEHAVIOR

Most people who have a narcissistic personality are very ordinary people. However, they think of themselves as being very important and special. As a result, they often try to exploit others. They expect other people to give them constant attention and to obey their commands. In a restaurant, for example, a narcissist might expect to be seated immediately. He might demand a better table, a special salad, or a sharper knife. Narcissists demand attention from everyone, including their family, friends, colleagues, and even strangers.

On the other hand, narcissists can demonstrate great charm. They smile a lot. They gossip and tell jokes. They generate excitement with their lively chatter. They like to talk about themselves and often dominate the conversation with stories about their exploits. In these stories they tend to greatly exaggerate their talents and personal attainments.

In fact, when narcissists describe their **attainments**, they are likely to be lying. Lying is typical behavior for narcissists, who often try to impress people with false claims about things they own or people they know. They brag that their golf clubs are identical to the ones used by **professional**

golfers. They claim to be best friends with the mayor and the police chief and the bank president.

ROOTS OF NARCISSISM

This kind of talk seems to reflect great self-confidence and self-esteem. However, psychologists suggest that this behavior results not from self-love, but actually from fear of failure and the subsequent shame it would bring. Some say that narcissism results if parents do not comfort young children when they have been disappointed or have failed to attain something. The children view this as punishment and try to avoid future failure. As a result, they never learn to deal with disappointment or failure.

Narcissists can demonstrate great charm. They gossip and tell jokes.

Other psychologists have a slightly different theory. They believe that a narcissistic personality arises when parents try to protect children from disappointment and failure by satisfying all of their demands. This **generates** in the children a lifelong pattern of expecting that they will always get what they want.

HOW NARCISSISTS SEE OTHERS

Narcissists do not see other people as human beings but rather as objects that have no feelings or needs of their own. Narcissists believe that the **role** of other people is to satisfy their needs and to admire them. For this reason, narcissists seldom have truly close friends. Instead, they surround themselves with people they consider worthy of their greatness.

NARCISSISM IN CELEBRITIES

Oddly, the narcissistic traits that we find so annoying in ordinary people are the same traits that attract us to many entertainers and professional athletes. A recent study found that celebrities as a group are more narcissistic than other people. However, it is not fame
 that makes celebrities narcissistic; it is the other way around. They were first narcissistic and were then drawn to careers that would earn them admiration from others.

They are very aware of the applause of their fans.

They see it as a positive message that they are loved and admired. But they may also exploit the media to get attention. For example, they wear show-off clothes and date gorgeous partners. They marry and divorce again and again. They buy expensive cars and drive too fast. Whatever they do, the media report it because the dynamic personalities of the celebrities, and their apparent lack of inhibitions, seem exciting.

Celebrities are often more narcissistic than other people.

NARCISSISM IN ALL OF US

All of us have some narcissism, and that's good. Self-love is what motivates people to nourish and protect their bodies, to improve their minds, to learn new skills, and to discover the world in which they live. It is what gives 70 people the self-confidence to share a relationship with others and the ambition to reach for success. However, the self-love of those with a narcissistic personality type is so excessive that it overshadows everything else in their lives.

Reading Comprehension

Mark each sentence T (True) or F (False) according to the information in Reading 2. Use your dictionary to help you understand new words.

- ___ 1. Narcissists demand attention from everyone, including colleagues and strangers.
- ___ 2. A narcissist might try to exploit people because she believes she is very important.
- ___ 3. A narcissist is aware of other people's failures and demonstrates great concern.
- ___ 4. Narcissists often lie about what they have attained and dominate conversations with stories about themselves.
- ___ 5. Psychologists believe that narcissistic behavior coincides with self-esteem.
- ___ 6. Psychologists believe that parents play a role in generating narcissism in their children.
- ___ 7. Celebrities get attention from the media because their behavior makes them seem uninhibited.
- ___ 8. Professional athletes become narcissistic as a result of their careers.

Vocabulary Activities STEP II: Sentence Level

The verb *exploit* has the general meaning of "use," but can express two different ideas. It's important to understand which idea is being expressed in a particular sentence.

use something cleverly

or productively

A good student **exploits** every opportunity to read

outside of class.

use something unfairly or selfishly

Some companies exploit workers by not paying

them a fair salary.

The noun form, exploitation, almost always has the second, negative meaning.

The exploitation of workers is unfair.

- **E.** Work with a partner. Write *P* for the sentences that use *exploit* in a positive way. Write *N* for the sentences that use the word in a negative way.
- ____1. Some parents exploit their children by pushing them to perform in movies or TV shows.
- ___ 2. He exploited every chance to improve his writing skills.
- ___ 3. She exploited her friends by borrowing money every day.
- ___ 4. He exploited his musical talent by playing with a band.

In this unit, *demonstrate* means "to prove or show something." A *demonstrative* person shows his or her feelings very clearly.

Her paintings demonstrate a great love of her country.

My little granddaughter is so demonstrative. She is always hugging me.

Another common meaning is "to give directions about how something is done."

My trainer demonstrated how to use the new exercise bicycle.

To demonstrate is also often used to mean "to publicly show your support for or against a social or political cause."

A group was demonstrating in front of city hall yesterday.

Fifty demonstrators took part in a demonstration against high taxes.

F.	Complete this paragraph, using different forms of demonstrate. Compare you	r
	work with a partner.	

Although most na	rcissists live ordinary lives, it is possible for	a narcissist
to become the coa	ch of a professional athletic team. What a gr	reat way to
(1)	his or her importance. These coaches	
(2)	their power by demanding absolute of	pedience from
their players. They	may order punishment for any (3)	of
disobedience. If a	player (4) any behavior	that could destroy
team unity, the coa	ach may remove him or her from the team.	
To inhihit an actio	on means "to stop it or to decrease it."	

To inhibit an action means "to stop it or to decrease it.

Fear of failure Inhibited him from participating in the race. Antibiotics **inhibit** the growth of bacteria.

The noun form, inhibition, refers to the feeling of embarrassment or fear that stops someone from speaking freely or acting freely. The adjective forms are inhibited and uninhibited.

Most actors don't mind acting silly because they are uninhibited. They have no Inhibitions. Most other adults have a hard time acting silly. They are too inhibited.

- G. Read this story. Then, in your notebook, rewrite the sentences using different forms of inhibit. Be prepared to read your sentences aloud or discuss them in a small group.
 - 1. Last year, Ahn went to Canada because the economic slowdown in his home country reduced his professional opportunities.
 - 2. Adjusting to a new country was hard. He was too shy to make friends with his colleagues. He worried that his English was poor.
 - 3. He wanted to feel more free when he spoke, so Ahn decided to join an English class.
 - 4. His teacher told the students, "Try to lose your shyness and negative feelings. It's okay to make mistakes."
 - 5. The teacher understood why the students were embarrassed. He made them feel more comfortable, and soon the students were laughing and talking, learning English, and making friends.
- H. Self-Assessment Review: Go back to page 65 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

Writing and Discussion Topics

With a partner, share ideas about each of the following topics. Then have each person write a paragraph about one of the topics.

- Imagine you would like to work as a salesperson. What qualities are important for someone in this position? What would you say about yourself that would be truthful yet emphasize your positive qualities? Write a letter to an imaginary company that describes your qualities and asks about job opportunities.
- 2. Can a narcissistic person also be a successful person? What qualities do narcissistic people have that might help them be successful? What qualities might inhibit their success?
- 3. Sir Winston Churchill said this about success: "Success is the ability to go from one failure to another with no loss of enthusiasm." Do you agree or disagree? Give an example to support your opinion.

Read 🛈

This chapter from a book of true crime stories tells how the police solved a case of theft.

🌘 🙆 🌘 www.ruanguage.com

Solving a Crime with Science: A True Story

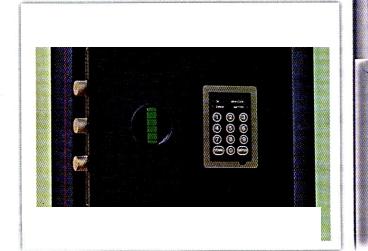

t was 7:30 in the evening. Millionaire Eduard Arellano and his wife Susan were late. They had tickets for a play at a nearby theater, so they were rushing to leave the house. They set the security alarm, locked the front door of their 16-room mansion, and sped away in their BMW.

A tall man watched them drive off. He removed a key from a red cloth bag that he carried and used it to unlock the front door. Once inside, he turned off the security alarm.

The tall man knew that Eduard and Susan would be gone for hours. He would have plenty of time to do his job. He went directly to an upstairs bedroom. He pushed open a wall **panel** and used a code to open a hidden

safe. Inside the safe were trays of sparkling rings, necklaces, and earrings.

As soon as Eduard and Susan arrived at the theater, they realized that they had forgotten the tickets. Susan insisted that they return home to get them. When they arrived home, she was surprised to find the front door unlocked and the alarm system turned off. "Someone has been in here," Susan concluded. "I'm calling the police." She was told that a police detective would be at the site in a few minutes.

When the tall man heard voices downstairs, he knew he had to leave at once. He quickly stuffed the jewelry into the red bag. Then he opened a window and climbed down to a flat roof. From there he jumped to the grass and ran off.

Minutes later, the police **detective** and a team of crime scene investigators (CSI) arrived. The **detective** searched the house. Only one room showed signs of a crime. In an upstairs bedroom he found an open window and an empty safe, but no thief. He **consulted** Eduard and Susan, but only the jewelry seemed to be missing.

The **detective** was puzzled. At other **sites**, a thief opened nearly every drawer in the house searching for valuables. To the **contrary**, this thief seemed to know exactly where to find valuables. He also knew how to unlock the front door and open the safe. It seemed **logical** that the thief knew the house. The **detective** asked Eduard and Susan many questions. He asked about their servant. He wanted to know the **specific** time they had returned home. Could Eduard and Susan be lying? What **motive** would they have for faking a theft? Could the servant be guilty?

Meanwhile, the CSIs were upstairs checking the bedroom for fingerprints and searching for evidence—signs that might help solve the crime. They found a button by the open window, and they **detected** a tiny red thread near the safe. They put these pieces of evidence into envelopes and **taped** them shut. Then they searched the garden.

The next day, the **detective** drove to the home of the servant. There in a trash bin the **detective** found a grass-stained shirt with a button missing. In a

closet he found a red cloth bag—but no jewelry. The servant was arrested and taken to the police station, where ne was fingerprinted.

Subsequent tests done at a police laboratory **established** that the grass stains on the shirt matched the type of grass at the mansion. The button came from the same shirt. Lab tests further **established** that the red thread matched the cloth of the red bag. And the servant's fingerprints matched fingerprints from the crime **site.** In each **instance**, the evidence pointed to the servant's guilt.

Authorities accused the servant of theft, and

65 he confessed to the crime. He described where he had hidden the jewelry. He said that he was motivated to steal because he needed money. He added, however, that Mr. Arellano had told him how to do it. Mr. Arellano said they could both make money. The servant could sell the jewelry and Eduard could be paid for his losses by his insurance company.

At a court trial, the servant was found guilty and sentenced to five years in prison. **Technically**, Eduard was guilty, too, and he was sentenced to prison for his role in the crime. Good **detective** work and modern science helped solve a crime.

Reading Comprehension

Mark each sentence as T (True) or F (False) according to the information in Reading 1. Use your dictionary to check the meaning of new words.

- ____1. Contrary to what Susan expected, the front door was unlocked and the alarm was turned off. She concluded that someone was inside.
- ____ 2. A detective asked Eduard and Susan many questions. For instance, he asked about the specific time they left the house.
- ____ 3. It seemed logical to the detective that the thief knew the house.
- ____4. Technically, Eduard and the servant were both guilty of a crime.
- ___ 5. The thief found money in a hidden wall panel.
- ___ 6. CSIs put the jewelry in an envelope and taped it shut.
- _____7. The detective consulted with Susan and Eduard about the shirt that the CSIs found at the crime site.
- ____8. The crime lab established that the red thread matched the cloth of the red bag.
- ____9. Authorities accused the servant of theft. His motive was to make money.

READING SKILL

Identifying Time and Sequence Words

LEARN

Understanding the *order of events* in a story is often essential for understanding the story, especially a mystery such as Reading 1. The order of events can be shown in several ways:

- 1. Sentences in a paragraph usually describe actions in the order that they happened.
- 2. Time words such as *Monday*, *March*, *summer*, or *1989* tell when actions took place.
- 3. Words such as before, after, soon, first, next, meanwhile, then, finally, and subsequently can show the order of events.
- 4. Phrases such as three days later, the next year, and at the same time also show time order.

APPLY

A.	With a partner, use time clues and logic to figure out the order in which these
	events in Reading 1 took place. Number them from 1 to 9.

- ___ A detective arrives.
- ___ The tall man hears voices downstairs.
- ___ Susan calls the police.
- Susan realizes they have forgotten their tickets.
- ___ The tall man watches Susan and Eduard drive off.
- __ Eduard tells the servant how to open the safe.
- __ The tall man stuffs the jewelry into the red bag.
- ___ Susan concludes that someone is inside.
- ___ The tall man climbs out of the window.

B. For each sentence, decide which action happened first and which happened second. Mark them 1 and 2.	
They realized that they had forgotten the tickets as soon as they arrived at the theater.	
— They were surprised to find the front door unlocked — when they arrived home.	
— He knew he had to leave — when he heard voices downstairs.	
He climbed out of the window after emptying the safe.	
— He waited for them to drive away	2 000
before unlocking the door.	A STATE OF THE PARTY OF THE PAR

6. He looked scared.	
7. He got on a bus at the corner.	

A motive is a reason for an action. The word is often used, as it is in this unit, to refer to the reason someone commits a crime.

Jim needed money fast. That was his **motive** for robbing the store.

There are other, equally common usages of motive and its forms. The verb motivate means "to cause someone to act in a particular way," or "to make someone want to do something."

Desire to attend the music academy motivated her to practice every day.

The promise of a raise can motivate employees to work harder.

The noun form is motivation. It refers to the reason for doing something, or a positive feeling about doing something.

The employees showed a lot of motivation and finished the project quickly.

Someone who feels eager to do something is motivated. Someone who does not feel eager to do something is unmotivated.

Despite interesting lessons and good teachers, some kids remain unmotivated.

- Write one or more sentences in your notebook according to the directions. Share your sentences with a small group.
 - 1. Teachers can motivate their students in many ways. Describe how a teacher once motivated you.
 - 2. Describe how advertisements can motivate people to do something.
 - 3. Some people seem to always act kind (or mean). Describe what their motive might be for acting kind (or mean).

Establish is commonly used to mean "to start something," like "establish a new school." In the context of this unit, however, establish is used to mean "to learn facts that prove something is true."

Detectives established that the murdered man owed money to many people.

- In your notebook, write sentences that answer the questions. Use a form of establish in each sentence. Refer to Reading 1 for information.
 - 1. What did the detective find out when he searched the house?
 - 2. What did the tall man learn when he watched Eduard and Susan drive away?
 - 3. What did Susan learn when she tried to open the door to get the tickets?
 - 4. What did the laboratory tests show about the servant's fingerprints?

The adjective *specific* means "detailed" or "exact." It can also be used to refer to something particular rather than general. The adverb form is *specifically*. The verb form is *specify*. The specifics is a phrase that means "facts" or "details."

The newspaper reporter wanted to know the specifics of the crime.

- **G.** Read these sentences about what the police do after a crime has occurred. Rewrite the sentences in your notebook, using the form of *specific* in parentheses.
 - 1. The police ask many definite questions, like the victim's name and age. (specific)
 - 2. They need to know what happened. (specifics)
 - 3. They want to know the details about when the crime happened. (specifically)
 - 4. They want witnesses to tell exactly what they saw. (specify)
 - 5. They hope witnesses can give them particular information about the crime. (*specific*)

The noun *logic* refers to the use of reasoning to decide if something is possible or correct.

Instead of using logic to solve the puzzle, he tried guessing.

A logical decision or idea is reasonable and sensible. A decision that is based on guessing, feelings, or unreasonable conclusions is illogical.

It did not seem **logical** that a man would buy a car and then sell it the next day.

It seemed **illogical** for him to buy a car one day and sell it the next.

CORPUS

H. Read this story. Then, in your notebook, write five sentences about the facts in the story. Use forms of establish, logical, and motive. Be prepared to read aloud or discuss your sentences in a small group.

Mr. Able, a jewelry store owner, claims he was robbed of \$1 million in jewels. He sued his insurance company when the company refused to pay him for the loss. Mr. Able said that one rainy winter day, a robber ran into the store carrying a gun and an umbrella. The robber kept the gun pointed at Mr. Able as he tied up his hands. Then the robber opened the safe in the back room and took all 536 pieces of jewelry. He stuffed them into a suitcase and ran out the door.

The insurance company's lawyer had a contrary point of view. He concluded that the details of Mr. Able's story are technically impossible. The lawyer said that the tape in the store's surveillance camera would show what really happened and prove that Mr. Able was lying. The tape shows the robber entering the store wearing a raincoat and carrying an umbrella—but they are not wet. He is not carrying a suitcase. The tape shows Mr. Able helping the robber tie his hands. The robber disappears into a back room for just 14 seconds, and then leaves the store carrying a suitcase. The suitcase is too small to hold 536 pieces of jewelry. The robber leaves nearly \$20,000 cash in the safe. The lawyer claimed that a friend pretended to rob Mr. Able for a share of the insurance money. His reason—he wanted to get rich quick.

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. What does a detective do?
- 2. How can a science laboratory be used to help solve a crime?
- 3. Is it possible for someone to commit a "perfect" crime that leaves no clues? Why or why not?

Read

This online magazine article discusses the role of scientific laboratory analysis in helping the police solve crimes.

FORENSIC SCIENCE

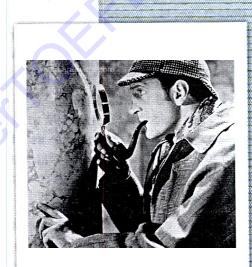

herlock Holmes, a fictional detective of a century ago, was one of the first to use forensic science—the scientific analysis of physical evidence

- to solve crimes. Holding a big magnifying glass, Holmes inspected crime scenes for footprints, broken glass, hair—anything that might help identify the person who committed the crime. In today's world, Holmes might be
- 10 a CSI, or crime scene investigator.

Today, when a crime is reported—a murder, for instance—the police immediately send a medical examiner (ME) and a CSI team to the crime site. The ME and CSIs will be part of a panel of technical experts in the investigation.

MES AND CSIS

15 At the crime scene, the ME examines the body of the victim and looks for wounds or marks that might be related to the crime. The ME also takes many photographs of the body. The body is subsequently taken away for a detailed examination that will **establish** the cause and time of the victim's death.

Actor Basil Rathbone as Sherlock Holmes Meanwhile, CSIs first take hundreds of photographs of the crime site. Next they check the site for fingerprints. Most fingerprints form when sweat or another oily substance on a fingertip leaves an invisible imprint on a glass, tabletop, or other object. CSIs dust a black powder on objects at the crime site to make these prints visible. The CSIs then look for drops of blood, strands of hair, pieces of ripped cloth, or other evidence that might link someone to the crime site.

FINDING TRACE EVIDENCE

"Every contact leaves a trace," according to an **authority** in forensics. This means that whenever a crime involves physical contact, the criminal either leaves something at the **site**, takes something from the **site**, or both. This might be any number of substances, including hair, animal fur, sand, grass, and fibers from clothing or carpeting. Such trace evidence is usually difficult to **detect**, so, like Sherlock Holmes, CSIs rely on handheld magnifying glasses to examine the crime scene. CSIs might even vacuum the entire area to collect tiny samples. They carefully

THE FORENSICS LABORATORY

label each piece of evidence as they collect it.

The collected evidence is then sent to a forensics laboratory. There, forensic scientists will analyze it to **establish** how and when the murder took place, where it took place, and who did it. Sometimes the evidence will even show why it took place; that is, the **motive** for the killing.

Among all the evidence found at the **site**, fingerprints are **conclusive**. This is because no two people have the same fingerprints. Fingerprints from a crime scene are analyzed by computer to determine if they match the prints of a known criminal or crime suspect—a person who might be guilty of a crime.

DNA is another **conclusive** means of identification because each person's DNA is unique. DNA is contained in cells of the body, so that evidence of hair, blood, tears, sweat, or other bodily fluids found at a crime scene can be used to link a **specific** person to the crime. Like fingerprints, DNA samples are analyzed by computer to determine if they match the DNA of a known criminal or a suspect.

Voices, too, are unique. Samples of voices from security camera **tapes**, telephone answering machines, or other recording devices can be scanned electronically. A printout of the scan will show patterns of highs and lows, rhythm, and volume that can be compared to patterns of a suspect's voice. However, **authorities** have **contrary** opinions about using voiceprints for identification.

Some argue that voices can change over time as people age or suffer illnesses, so old voiceprints are not always reliable.

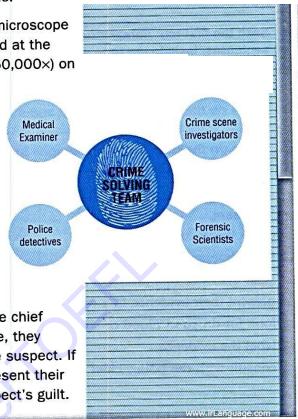

In the laboratory, forensic scientists use an electron microscope to scan samples of the substances that were collected at the crime scene. Then they enlarge the samples (up to 150,000×) on a visual display unit. This allows them to easily

compare those samples with samples found at another location or on a suspect's clothing.

Forensic laboratories have on file the shoe print patterns of thousands of kinds of shoes. These can be compared to shoeprints found at a crime scene to **establish** the size and kind of shoes worn by a suspect. If the shoeprint was made in a soft material, like mud, the lab may be able to tell the

material, like mud, the lab may be able to tell the height and weight of the person by the depth of each step and the distance between steps.

After all of the evidence has been analyzed, the police chief consults with panel members. Based on the evidence, they determine if it is logical to accuse and arrest a crime suspect. If it is, members of the panel may later be asked to present their forensic evidence in a court of law as proof of a suspect's guilt.

Reading Comprehension

Mark each sentence as T (True) or F (False) according to the information in Reading 2. Use your dictionary to check the meaning of new words.

- 1. Holmes inspected a crime site for anything related to the crime; for instance, footprints, broken glass, or hair.
- 2. CSIs are part of a panel of technical experts in a forensic investigation.
- ___ 3. Forensic laboratories establish when and where a murder took place by taking hundreds of photographs.
- 4. To identify footprints, forensic laboratories consult files of footprints of known criminals.
- ____ 5. CSIs use handheld magnifying glasses to detect trace evidence at crime scenes.
- ___ 6. Authorities have contrary opinions about using fingerprints for identification.
- ___ 7. DNA analysis can conclusively establish the motive for a crime.
- 8. Samples of a suspect's voice can be compared to voice samples from surveillance tapes or telephone answering machines.
- 9. A suspect will be arrested if, based on the evidence, it seems logical that he or she committed the crime.
- ___10. Fingerprints found at a crime scene can be linked to a specific individual if they match the individual's fingerprints.

READING SKILL

Identifying Time and Sequence Words

APPLY

- A. Scan the first four paragraphs of Reading 2. Answer the questions in complete sentences. Include the time words or phrases used in the Reading.
- 1. When did Sherlock Holmes do his detective work?
- 2. When do the police send an ME and a CSI team?
- 3. When do the CSIs take photographs in relation to other tasks?
- B. Number these tasks from 1 to 7, in the order in which they are done by the CSI team.
- __ dust objects for fingerprints
- __ take photographs
- ___ send evidence to a forensics laboratory
- __ present their evidence in a court of law
- __ look for drops of blood or strands of hair
- __ label the evidence
- __ consult with the police chief

REVIEW A SKILL Identifying Examples (See pp. 52-53)

What kind of examples are listed in paragraph 4?

What kind of examples are listed in paragraph 5?

Vocabulary Activities STEP I: Word Level

The adjective *technical* refers to the knowledge of machines, materials, and processes used in science and industry.

Forensic scientists use their **technical** skills to analyze crime scene evidence.

This unit also uses the adverb *technically*, which means "according to an exact interpretation of a law or a fact."

You can't come in yet. It's only 9:58. **Technically**, the store doesn't open until 10:00.

Another common use of the word *technical* is to refer to words and concepts related to a particular subject.

"Stress" is a **technical** word used in engineering.

A. Complete the story with the words from the box.

technical assistance	technical person	logic	site	
technical explanation	technical words			

My computer printer wasn't working right, so I called the company hotline for

(1) ______. The guy on the phone gave me a

(2) _____ of the problem. I said, "Stop!

You're using too many (3) _______. I'm not a

(4) ______ ...

So he said, "See the button that says ON? Just push that."

- **B.** With a partner, complete these sentences with your own ideas. Share your ideas with the class.
 - 1. "I know your 21st birthday is tomorrow, but today you are technically..."
 - 2. "The sign says three lemons for one dollar. Technically, one lemon would cost..."
 - 3. "Waiter, a fly fell into my soup." "I'm sorry, but the restaurant is not technically responsible for..."
 - 4. "I see the sign that says No Parking, but technically I'm not parked, I'm just..."
- C. With a partner, decide who has the authority to punish someone who breaks the rules or laws in these situations.
 - 1. in a soccer game
- 3. in a city
- 5. in an office

- 2. in a classroom
- 4. in a family
- 6. in a store

An authority is a recognized expert in a field. The adjective form is authoritative.

Professor West is an authority on the history of crime.

He wrote an authoritative book titled Crime in Nineteenth Century Britain.

An authority is also a person or group that has the power to make rules or laws.

The city transportation authority wants the bus company to add new routes.

Authority (noncount noun) refers to the power that such a person or group has.

Parental authority today is not as strong as it was in the past.

- When police detectives need special information to solve a crime, they consult an authority. With a partner, match the authorities on the left with their areas of special knowledge. Take turns making sentences with the information. Look up unfamiliar words in your dictionary.
 1. ornithologist

 a. birds
 An ornithologist is an authority on birds.
- ____2. zoologist
- b. weather
- ___ 3. graphologist
- c. animals
- ___ 4. toxicologist
- d. handwriting
- ____ 5. meteorologist
- e. poisons

Vocabulary Activities STEP II: Sentence Level

Word Form Chart				
Noun	Verb	Adjective	Adverb	
detective detection detector	detect	detectable		

E. Complete this paragraph by using a form of *detect* in each blank. Compare work with a partner.

A polygraph is a machine that	is often called a "lie (1)	" It is
used by some (2)	when they question suspects.	The polygraph
is based on the belief that, if a per-	son is lying, his or her body will r	eact with
(3)physical ch	nanges, such as increased blood pr	ressure and
heart rate. The machine (4)	these changes and r	ecords them.
If the polygraph shows that physic	cal changes occurred when the sus	spect answered,
the (5)conclu-	des that the suspect is lying. How	ever, polygraph
tests are only 70-90% accurate. Th	is means that 10-30% of those test	ted might
escape (6)eve	en if they are guilty—or they migh	t be considered
guilty even though they are innoce	ent.	

An instance is an example or case of a particular kind of occurrence.

Yesterday's bank robbery was another **instance** of crime in the neighborhood.

For instance is a common phrase that means, "for example."

Bank security was poor. For instance, the cashiers had no warning alarms.

F. Match each sentence on the right with the example that goes with it on the left. Use for instance to join the sentences, and write them in your notebook. Compare answers with a partner.

Bank security was poor. For instance, there was no guard at the door.

- <u>d</u> 1. Bank security was poor.
- a. one was wearing a black ski mask.
- ___ 2. The robbers were armed.
- b. none had a specific job to do.
- ___ 3. The robbers didn't plan very well.
- c. each robber had a gun or a knife.
- ____4. The robbers covered their faces.
- d. there was no guard at the door.
- ___ 5. The robbers did not seem very smart.
- e. the note said GIV ME YOR MONEE.

The verb conclude has the general meaning of "end" or "finish." It can also mean "to reach a decision after thought or study." The adjective conclusive refers to something that is definitely true.

The lawyer concluded his summation of the case and calmly sat down.

The jury concluded that the suspect was guilty.

His fingerprint on the knife is conclusive proof that he is guilty.

The noun form is *conclusion*. It is used in some common expressions:

reach a conclusion

make a judgment after careful consideration come to a conclusion make a decision after careful consideration jump to conclusions make a judgment based on feelings, not facts

- G. Read these statements about a crime. In your notebook, answer each question that follows, using a form of conclude. Be prepared to read aloud and explain your answers in a small group.
 - A valuable painting was stolen from a popular art museum.
 - Jim's fingerprints were found on the wall where the painting had been.
 - Jim said he didn't steal the painting. A polygraph test showed that he was not lying.
 - · His friend, Dave, said that Jim was with him at the time the theft took place.
 - The painting was found in Dave's house. It had Dave's fingerprints on it.
 - 1. Who did the police decide was guilty?
 - 2. What did the police decide about the fingerprints on the wall? Why?
 - 3. What evidence proved who was guilty?

H- Imagine that you are Hosun Kim, a private detective (rather than a police detective). You help companies solve problems. You have just received an email offering you a job. After you investigate Ms. Park, write in your notebook an "email" to Mr. Lee telling him what you found. Include forms of the words detect, consult, motive, and conclude. Share your email with a partner or small group.

Dear Mr. Kim,

I am in charge of medical claims for the ABC Insurance Company. We have an unusual case and want to hire you to help us.

Ms. Jenny Park has requested payment of \$500,000. She says that she cannot walk and that she is unable to work. She says she had to hire someone to take care of her children and to do other domestic jobs. We are certain that she is perfectly healthy. Please investigate her situation for us. We will pay for your time and your expenses to prove that she should not be paid \$500,000.

Sincerely, Jack Lee Chief Claims Investigator for ABC Insurance

Self-Assessment Review: Go back to page 81 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

Writing and Discussion Topics

With a partner or small group, share ideas about the following topics. Then have each person write a paragraph about one of the topics.

- 1. Find an article in a newspaper or news magazine that describes a crime. Describe what happened.
- 2. What qualities should a good police detective have? Why?
- 3. In some countries, the media are given access to information about crimes as the specifics become available. In other countries, the media may not publish or broadcast information about a crime investigation. Which do you think is the better way? Why?

The Fast-Food Revolution

In this unit, you will

- read about the fast food revolution and the subsequent expansion of franchises.
- review identifying examples.
- increase your understanding of the target academic words for this unit.

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. Think about the last time you ate in a fast-food restaurant. What did you eat? Besides the food, name three good things about your experience.
- 2. Why do some people dislike fast-food restaurants? Do you agree with their complaints?
- 3. Why do you think there are so many fast-food restaurants?

Read

This online magazine article discusses the many reasons behind the worldwide expansion of fast-food restaurants.

The Fast-Food Revolution

Maurice and Richard McDonald made a lot of money with their restaurant, but they grew tired of the stresses of ownership. The brothers were tired of searching for

replacements when their cooks and waitresses quit. They were tired of replacing broken dishes and glassware and lost silverware. Before abandoning their successful

silverware. Before **abandoning** their successful business, however, they decided to try a new system of preparing and serving food.

- Their remodeled restaurant **contrasted** with the original. It served just hamburgers, cheeseburgers, french fries, and drinks. Paper wrappers and paper cups replaced the dishes and glassware. Silverware wasn't needed because the restaurant didn't serve any food that required a knife, fork, or spoon to eat. The professional cooks were gone, too. Instead, food
- preparation was divided among several workers, each with a specific task. One worker fried the hamburgers; another wrapped them in paper; a third cooked french fries; and another poured drinks. There were no servers. Customers ordered food and paid for it at a counter. Then they carried their own food to a table. This new system was like a factory assembly line.

20 Increasing the speed of food preparation increased the kitchen's **output** and lowered its costs. The system revolutionized the restaurant business and introduced the term "fast food."

ANOTHER FAST-FOOD RESTAURANT IS BORN

Carl Karcher heard that a nearby restaurant was 25 selling cheap, albeit top-grade hamburgers for 15 cents. He was charging 35 cents for burgers in his own restaurant. When he visited the McDonald's restaurant, he was astonished to see dozens of customers waiting in line to buy 15-cent

30 burgers while the assembly-line kitchen staff efficiently prepared their food. He acknowledged that this new restaurant system was a good business model. In 1956, Karcher opened his own fast-food restaurant and named it Carl's Jr.

An early McDonald's restaurant

Around this time, Ray Kroc, a salesman who sold milkshake machines to 35 restaurants, also visited the new McDonald's restaurant. Kroc was impressed by its food preparation system. He persuaded the McDonald brothers to sell him the authority to build more McDonald's restaurants across the United States. By 1960. Kroc had opened 250 of them. A decade later, there were nearly 3,000 restaurants in the McDonald's restaurant chain, all owned by one corporation.

THE GROWTH OF A NEW INDUSTRY

40 The fast food industry grew because it was born at the right time. One factor was that the U.S. economy was expanding. The young people in the 1950s were an optimistic generation. They were inclined to believe that they would be successful in life if they worked hard.

Another important factor that led to the enormous growth of the fast food 45 industry was the automobile. New technology had made automobiles dependable, affordable and easy to drive. People bought new automobiles and wanted to go places. A national highway system, expanded during the 1950s, enabled U.S. families to drive long distances. They needed

gasoline stations where they could refuel their vehicles and 50 restaurants where they could eat. In time, hundreds of new gasoline stations were built along the highways. These were complemented by new fast-food restaurants where travelers could eat a quick meal.

THE MODEL SPREADS

The McDonald's food service model was widely copied in 55 these new restaurants, often by inexperienced owners who wanted to get rich quickly. Some of the new restaurants failed, but many succeeded. Like McDonald's, some even expanded into nationwide chains with hundreds of restaurants throughout the country. Among the

A popular fast-food chain in Japan

contemporary start-ups in the 1950s and 1960s were Burger King, Wendy's, Domino's Pizza, and Kentucky Fried Chicken (KFC).

These restaurants and others that copied the McDonald's system revolutionized the food-service business. The successful chains of restaurants that were created soon inspired other kinds of retail businesses to form their

- own national chains. Clothing stores, movie theaters, car rental agencies, bookstores, shipping services and hotels are just a few of the businesses that established nationwide chains. By the 1970s, the chain store business model was rapidly spreading overseas to other countries, where domestic companies created their own nationwide business chains.
- Although many people worldwide rejected the idea of globalization, business chains were soon overlapping their national borders. National chains became international chains. By 2010, overseas businesses had become common in many countries around the world. A model for fast-food restaurant service helped to revolutionize business throughout the world.

Reading Comprehension

Mark each sentence as T (True) or F (False) according to the information in Reading 1. Use your dictionary to help you understand new words.

- ___ 1. Maurice and Richard McDonald abandoned their restaurant because the output was low and it did not make enough money.
- ___ 2. Their original restaurant used glassware for drinks. In contrast, the new restaurant used paper cups.
- ___ 3. McDonald's hamburgers were top-grade but very expensive.
- ___ 4. In the decade between 1960 and 1970, McDonald's expanded to around 3,000 restaurants nationwide.
- ___ 5. Among the contemporary start-ups of the 1950s and 1960s were Domino's Pizza and Wendy's.
- ___ 6. In the 1950s, people were optimistic, albeit inclined to worry about the economy.
- ___ 7. This generation rejected fast foods because they acknowledged the new food preparation system was not efficient.
- ___ 8. Many roadside stops included the complement of a gas station and a fast-food restaurant.
- ____ 9. Many business chains are overlapping U.S. borders into other countries.

READING SKILL

Reading Numerical Tables

LEARN

Numerical tables can provide a lot of information in a small space. The information is usually arranged in rows and columns, which makes it easy to read and to compare facts. To preview a table or chart:

100 UNIT 7

- 1. Read the title to see what kind of information is given.
- 2. Read the labels at the top of each column.
- 3. Note the date of the table so that you will know how recent the information is.

APPLY

Read the table. Then, use the information to answer the questions below.

2011 Fast-Food Franchises				
Restaurant	Start-Up Year	Franchises Worldwide	Countries With Franchises	
KFC	1952	11,000	60	
Pizza Hut	1958	10,000	90	
Burger King	1954	12,200	73	
McDonald's	1955	31,000	122	

With a partner, find answers to these questions in the chart.

- 1. What year did Burger King start up?
- 2. How many countries have a Pizza Hut restaurant?
- 3. Which restaurant has the most franchises worldwide?
- 4. Which restaurant started most recently?

abandon

The verb *complement* is related to the word "complete." It is used to refer to things that go well together because, together, they make something complete or better. The adjective form is *complementary*.

Caramel corn is delicious. The sweet caramel complements the salty popcorn.

In this unit, complement is also used to mean "a set or group."

It takes a complement of eight workers to run this restaurant.

Note: Be careful not to confuse *complement* with *compliment*. To compliment someone means "to praise or express admiration for someone."

The customer complimented the waiter for his excellent service.

- F. Circle the word that correctly completes each sentence. Compare answers with a partner.
 - 1. This picture frame and that painting (compliment / complement) each other.
 - 2. Maria was grateful for her teacher's (complimentary / complementary) remarks.
 - 3. The tan shirt (compliments / complements) the brown suit.
 - 4. Business partners should have (complimentary / complementary) skills so that one can manage the finances and the other can manage the employees.

Vocabulary Activities STEP II: Sentence Level

The phrase *in contrast* is used to show the difference between <u>two</u> people, objects, or events.

Desserts do not provide vitamins. **In contrast**, fruits and vegetables are vitamin-rich.

Use the phrase to contrast with when showing a difference between two things.

The sweet chocolate contrasted nicely with the salty pretzel.

Albeit (pronounced all–BE-it) is more common in written language than in speech. It is used to show a difference within <u>one</u> person, object, or event. Albeit is similar to "but" or "although."

The French fries were delicious, albeit greasy.

- G. In your notebook, write sentences about fast-food restaurants, using each pair of items and the words in parentheses. Compare sentences with a partner.
 - 1. wash glasses / throw away paper cups (in contrast)

Restaurants wash glasses. In contrast, fast-food places throw away paper cups.

- 2. the burger was good / the burger was small (albeit)
- 3. broken chairs / shiny new tables (contrast)
- 4. a parent's idea of a good lunch / her child's idea of a good lunch (contrasting)
- 5. soft drinks \$1.25 / water free (in contrast)
- 6. the tiny salad / the enormous hamburger (contrast)

When you *abandon* something, you leave it because you don't want it or can't use it. Sometimes you give it up just temporarily.

The house finally collapsed after the owners **abandoned** it many years ago.

The snow was so deep that drivers had to **abandon** their cars and walk home.

To abandon a plan or a task means to stop before you have completed it.

I had to abandon my plans to travel last summer because I got sick.

When you *reject* something, you refuse to accept it. This verb is commonly used to refer to ideas or plans rather than objects. It is also often used to refer to people who are not accepted for jobs. The noun form is *rejection*.

Centuries ago, people **rejected** the idea that the earth revolved around the sun.

Brad offered to drive, but we all rejected the offer.

The University **rejected** Ted's application. He got a letter of **rejection** yesterday.

- H. Complete these sentences, in your notebook, with your own ideas. Use a form of abandon or reject in each one. Compare sentences in a small group.
 - 1. In fast-food restaurant parking lots, there are paper cups and wrappers . . .
 - 2. Babies are sensitive to new tastes, so they may . . .
 - 3. Some fast-food restaurants tried selling vegetable burgers, but . . .

Read these questions. Discuss your answers in a small group.

- 1. Do you know someone who owns a small business? If so, what kind of business is it?
- 2. What would be some good things about owning your own business? What would be some negative things?
- 3. How many retail business chains can you name? Take turns naming them.

Read

This excerpt from a business textbook defines what a franchise is and discusses the advantages and disadvantages of owning one.

Franchising

A t one time, all small retail businesses, such as clothing stores, restaurants, shoe stores, and grocery stores, were owned by individuals. They often gave the stores their own names:

- 5 Lucy's Dress Shop, Fred's Coffee Shop, Johnson Family Grocery. For some people, owning a business fulfilled a lifelong dream of independent ownership. For others, it continued a family business that dated back several generations.
- These businesses used to line the streets of cities and small towns everywhere. Today, in **contrast**, the small independent shops in some countries are almost all gone, and chain stores like The Gap, Starbucks, and 7-Eleven have moved in to replace

At one time, all small businesses were owned by individuals or families.

them. Most small independent businesses couldn't compete with the giant chains and eventually failed. However, many owners didn't **abandon** retail sales altogether. They became small business owners once again through franchises. The franchise system is a **contemporary** business model that has increasingly dominated the small business sector of retail trade over the last few **decades**.

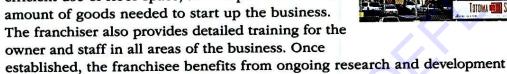

A FRANCHISE DEFINED

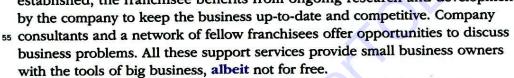

- ²⁰ A franchise is a legal and commercial agreement between an individual and a parent company. It gives the person permission to own one of the company's franchise outlets, to use the company name, and to sell the products or services of the company. A person must apply for a franchise; however, not all applicants are approved. Some may be **rejected** because of
- poor financial histories, for example. If approved, the new business owner (the franchisee) must pay a large start-up fee to the company (the franchiser) and agree to follow its regulations. These regulations require complete uniformity in all of its franchises. This means that the franchiser establishes the rules for the appearance of the store, both inside and
- outside. It means the franchisee can sell only the products or services of the parent company. It means that a "large coffee" must be the same size in every company franchise. It means that all restaurants in a franchise system must put the same number of pickles on their burgers, and use identical napkins, paper cups, and food wrappers. It also means that the franchisee
- 35 is graded regularly on its performance by the parent company.

Not all chain stores are franchises. Some are owned and operated by the parent company. In contrast, a franchise is owned by the franchisee. Restaurants are the most common franchises. On any city block you are likely to see at least one franchise restaurant, and often three or four. In 40 some shopping centers, the entire complement of stores is made up of franchises. Almost any kind of business can be franchised, including dental offices, hardware stores, hotels, gas stations, pet hospitals, tax consultants, fitness centers, cleaning services, movie theaters, and child care centers.

ADVANTAGES OF OWNING A FRANCHISE

Despite the restrictions, there are many advantages 45 to owning a franchise. The most important advantage is the support and assistance of the franchiser. For example, the franchiser can help a new owner find a good location, help plan an efficient use of floor space, and help decide on the 50 amount of goods needed to start up the business.

There are other advantages to owning a franchise. It helps to own a business with the name of a well-known corporation with an acknowledged 60 reputation for good service. Customers are inclined to shop at stores with familiar names, and more shoppers mean more sales. Also, individual franchises benefit from the output of expensive advertisements paid for by the company, which might overlap with local advertising by franchisees. When this happens, there is an extra benefit. Finally, the franchisees are not 65 employees of the company. They are business owners, motivated to work hard to make their businesses successful.

DISADVANTAGES OF OWNING A FRANCHISE

The major disadvantage of the franchise model is the close economic relationship among the many franchisees and the parent company. For instance, if one franchisee in the 70 system is found guilty of cheating customers, it reflects poorly on the other franchisees in the system. As a result, all the stores may lose customers. Similarly, if the company makes poor business decisions, the entire chain of franchises may be affected. Finally, the business owners 75 must share their profits with the parent company to pay for the many support services that the company provides.

SPREAD OF THE FRANCHISE MODEL

The success of the franchise system has led to a great expansion in the number of small businesses all over the model has spread rapidly to other countries. It has revolutionized retail business in many places, improved the **economic** status of individuals, and strengthened local **economies**. ■

Reading Comprehension

Mark each sentence as T (True) or F (False) according to the information in Reading 2. Use your dictionary to check the meaning of new words.

- ___1. Franchising is a contemporary business model that has dominated the small business sector for a few decades.
- 2. A franchisee's business is rarely graded by the parent company.
- ____3. In some shopping centers, the entire complement of stores is made up of fast-food restaurants.
- ___4. Companies provide services to their franchise owners, albeit not for free.
- ____5. There is a business advantage to owning a franchise with the name of a company with an acknowledged reputation for good service.
- ____6. Customers are inclined to shop at stores with familiar names.

1 in II S. dollars		

- 1. The start-up cost for each franchise is given as a range from the minimum cost to the maximum cost. Using the minimum costs, rank the franchises from the lowest to the highest start-up cost.
- 2. Using the maximum costs, rank the franchises from the lowest to the highest start-up cost.
- 3. Which franchise has the smallest range between its minimum and its maximum start-up costs? Which has the greatest range? Can you guess why there is a range in the start-up costs for each company?

4. Amounts in the millions, such as \$2,800,000, might be listed on a chart as \$2.8 million. We say this number as: "two point eight million dollars." With a partner, read aloud all of the start-up costs greater than one million dollars.

REVIEW	A SKILL	Identifying	Examples	(See pp.	. 52–53)
--------	---------	--------------------	----------	----------	----------

With a partner, identify the many examples related to franchising that are included in Reading 2 (such as the kinds of businesses that can be franchised).

Vocabulary Activities STEP I: Word Level
 A. To grade something is to rate it or rank it by some quality. With a partner, imagine that you work for a large fast-food corporation. Your assignment is to create grading standards that inspectors can use to grade individual franchise restaurants. Which of these would you include in your grading standards? The kitchen is clean. The french fries are crispy. There is soap in the restrooms. The workers live nearby. The workers wear clean uniforms. The cashier is friendly. Think of two more standards to add. What kind of grading standard would you have
for your list? Consider these possibilities:
Yes/No A, B, C, D, F Pass/Fail Excellent/Good/Poor
B. Use the target vocabulary in the box to complete this story. Use the words in parentheses to help you.
complement generation in contrast contemporary grade output expanded had an inclination specific
In 1916, a revolutionary new concept in retail sales was introduced in the United
States. The first self-service grocery store, named Piggly Wiggly, opened. Shoppers of
this were used to bringing a shopping list to a neighborhood
store and waiting while a clerk collected their groceries and measured out products
like flour and rice from big barrels, Piggly Wiggly customers
were given baskets and invited to serve themselves. They filled their baskets with
packaged flour and rice, canned goods, and other grocery items from the shelves.
Store sales increased enormously because customers to buy
more when they made their own selections. Soon Piggly Wiggly
into a chain of stores, and other markets copied the self-service model. The
supermarket was born, influencing not only the way people
shopped, but also other aspects of the food business. For example, food suppliers

The History of China	3:30-5:00

Vocabulary Activities STEP II: Sentence Level

To expand means "to grow or increase." The noun form is expansion. The adjective form is expansive. It means "covering a wide area."

The expansion of the library took nearly a year to complete.

People are happy with the expansive new parking lot at the store.

- E. Restate these sentences in your notebook, using the form of expand in parentheses.
 - 1. The McDonald's menu now includes salads. (has expanded)
- 2. By 2011, the network of McDonald's franchises covered 119 overseas countries. (expansive)
- 3. Recently, McDonald's growth has been faster overseas than in the United States. (has been expanding)
- 4. Many McDonald's franchises have added a children's play yard to increase their appeal to families. (*expand*)

	Word Fo	rm Chart	427
Noun	Verb	Adjective	Adverb
economy		economic	
economics	economize	economical	economically
economist		economy	

The noun *economy* refers to the operation of a country's money supply, industry, and trade. The term *the economy* is often used to refer to the financial situation of a particular nation. The adjective form related to this meaning is *economic*.

In a healthy economy, almost everyone who is able to work has a job.

The economy may be weakened by recent labor strikes.

Franchising has benefited the **economies** of many developing countries.

Economic growth has slowed in recent months.

Another common use of *economy* (noun) is to refer to the careful use of time, money, and materials. The verb form related to this meaning is *economize*. The adjective form is *economical*.

Fast-food kitchens are examples of **economy**: no food is wasted, no time is wasted.

A restaurant might try to economize by serving smaller portions.

It may not be economical for a store to stay open extra hours per day.

Economy is also an adjective form that is used to describe products.

Buy the giant **economy** size. You'll save money.

Economics is the science that studies systems of production, distribution, and use of goods and services. An *economist* is an expert in economics.

Professor Brown teaches **economics**. He is an **economist** as well as a business owner.

F.	Complete the paragraph, using forms of economy. Then compare your work with
	a partner.

Giant retail stores make a small profit on each item they sell, but	t they depend
on making a large number of sales. Their goods are (1)	priced
to attract customers. Shoppers are pleased that they can (2)	by
buying products in large, (3) sizes. They believe	that it is
(4) to buy more and pay a lower price. (5)	
have studied the effect of a giant store on the local (6)	of cities
where they are located. They believe that the (7)	_impact is
great. Many small stores are forced to close because they cannot con	mpete with the
giant retailers.	

If someone is inclined to do/be something, it means he or she is likely to do/be it, based on his or her nature, personality, or experience. The noun form, inclination, can also be used to express the same meaning, as in the phrase to have an inclination (to do something).

Steve is inclined to be very careful with his money.

He has an inclination to look for bargains whenever he goes shopping.

She'll probably learn the piano easily because she's very musically **inclined**. Note: *Incline* (noun, pronounced IN-cline) refers to a slope.

When parking on an incline, be sure to set your car's brake.

COAPUS

- **G.** In your notebook, write sentences that include these ideas. Use a form of *incline* in each.
 - people who are very hungry / eat too much
 People who are very hungry are inclined to eat too much.
 - 2. a teenager's eating habits / toward fast food
 - 3. people who can't swim / (not) own sailboats
 - 4. babies / cry a lot
 - 5. little sisters / copy their big sisters
- **H.** Self-Assessment Review: Go back to page 97 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

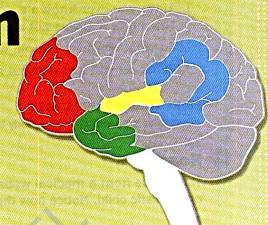

Writing and Discussion Topics

With a partner or a small group, share ideas about the following topics. Then have each person write a paragraph about one of the topics.

- 1. What are some changes that a fast-food restaurant might have to make when it opens a franchise in another country? Consider, for example, the food, the people, and the local customs.
- 2. Why are small, independent retail businesses inclined to disappear when franchise stores open nearby?
- 3. Many companies are now creating franchises in developing countries. Do you think these franchises help or hurt the economies of these countries? Explain your opinion.

Read Read

This article from a medical website blends information about autism with the story of one autistic child. Notice how the two stories are distinguished from each other.

THE AUTISM PUZZLE

utism is a little-understood brain disorder. It is marked by poor social and communication skills and by repetitive behavior. Meet two-year-old Shawn, who was just diagnosed with autism.

5 Shawn sits spinning the wheels of a toy car—spinning, spinning, spinning.

Shawn's parents have learned that spinning is not a typical **phase** of childhood. It is a common repetitive behavior of autistic children.

"Let's pretend we're cats," Shawn's three-year-old cousin suggests. "Meow," she says, walking on hands and knees. Shawn, also three now, flaps his hands in front of his face.

Most autistic kids can't pretend because they're not **capable** of imagining something that is not real. The **odd** hand-

15 flapping behavior is common in kids with autism.

"Let's go to the market," Shawn's mom says. Shawn, now four, hurries to the door and stands waiting. The market is noisy with recorded music and the clatter of shopping carts. Shawn covers his ears and is soon screaming. His mom **Infers** that the 20 noise hurts his ears.

Extreme sensitivity to loud or harsh sounds is common in autism. So is sensitivity to bright lights and various textures.

Six-year-old Shawn is watching a Sesame Street videotape.

"A B C," it sings. Shawn rewinds the tape and it repeats, "A B C."

15 His mother calls, "Shawn! Don't rewind the tape." He knows this isn't allowed, but he likes to see the same part over and over. "No rewind," he answers.

Like most autistic children, Shawn likes repetition, and he can't constrain his behavior. His language skills are poorly developed, and he doesn't speak in full sentences.

Shawn's school textbook asks this question: Which of these smells good? (a) a window (b) a flower (c) a lamp. Shawn lifts the book to his nose and sniffs. None of them smells at all, so he leaves the answer blank.

Schools usually fail to accurately assess the abilities of autistic children because classroom tasks are not appropriate for them. For instance, many autistic children are not able to link a printed word with something that is not real.

Shawn's family goes to visit Grandma and Grandpa. Shawn, now eight, rings the doorbell, opens the door, and walks in. "Hi, Shawn," says Grandma. He ignores her and turns on the TV. "Did you get wet in the rain?" Grandpa asks. "Yes. Rain," Shawn answers.

Like most autistic children, Shawn doesn't understand how to behave **appropriately** in social situations, and prefers to be alone. He answers questions that people ask, but doesn't understand the give-and-take of conversation.

Eleven-year-old Shawn is playing baseball. When it's his turn at bat, he hits the ball into the outfield. "Run!" yells the team coach. Shawn walks toward first base. Meanwhile, Brad picks up the ball and brings it to Shawn. Like all players on this special team, Shawn and Brad have autism.

Most participants on this team are boys. That's because kids with autism are predominantly male, with boys outnumbering girls by a ratio of 4 to 1. Autistic kids may have excellent physical skills, but they rarely participate in team sports because they don't understand the rules.

Shawn is doing math homework. He writes fast, and in less than five minutes he has solved 25 multiplication problems.

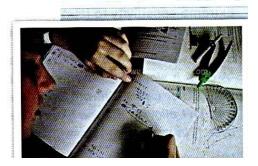

Some autistic children do well at school subjects, but most do not. Shawn is very bright, but not academically mature. His

speaking and listening skills are poor, but in school he is good at math and spelling. He enjoys looking at photographs, and he likes maps and calendars. He frequently writes letters to Grandma and Grandpa describing places his family has visited.

It's bedtime. Shawn showers and puts on pajamas. He brushes his teeth and climbs into bed. "I love you," says Mom, giving him a kiss. "I love you," Shawn repeats and ro closes his eyes.

Shawn is asleep. Finally, his handsome face and sturdy body relax.

Reading Comprehension

Mark each sentence as T (True) or F (False) according to the information in Reading 1. Use your dictionary to check the meaning of new words.

- 1. Shawn's parents at first thought that spinning was a typical phase of childhood.
 2. Autistic kids are not capable of imagining something that is not real.
 3. It is difficult for autistic kids to constrain their odd behavior.
- ___ 4. Shawn's mother inferred that he liked the loud music in the market.
- ___ 5. Autism seems to be linked to the sex of a child.
- __ 6. Autistic girls outnumber autistic boys by a ratio of 4 to 1.
- 7. Autistic kids seldom participate in team sports because they don't interact with other kids.
- 8. Schools are usually unable to assess the abilities of autistic children because classroom tasks are not appropriate for them.
- ___ 9. Autistic kids may be bright, but they are not academically mature.
- ___10. Autistic kids are predominantly male, so most of them have excellent physical skills.
- ___11. Autistic children can relax when they are sleeping.

LEARN

To infer is to use indirect information or evidence to come to a decision or a logical conclusion. Parents of an autistic child must often use inference to understand their child's behavior because the child may not be able to explain what he wants or what he doesn't like. For example, in Reading 1, there is a sentence:

In the market, Shawn covers his ears and is soon screaming. His mom infers that the noise hurts his ears.

Shawn's mother made an inference based on what she saw. Maybe she was correct, or maybe she wasn't, but it was a logical conclusion.

Read these excerpts from Reading 1. What can you infer from the information? More than one answer may be possible.

APPLY
1. "Let's go to the market," Shawn's mom says. Shawn hurries to the door and
stands waiting.
✓ a. Shawn understands his mother's words.
✓ b. Shawn obeys his mother.
c. Shawn is in a good mood today.
2. Shawn rewinds the videotape and it repeats, "A B C."
a. Shawn knows how to operate a tape player.
b. Shawn likes to sing along with the tape.
c. Shawn likes the ABC song.
3. "Which of these smells good?" Shawn lifts the book to his nose and sniffs.
None of them smells at all.
a. Shawn has a poor sense of smell.
b. Shawn can read.
c. Shawn expected the words to smell.
4. "Did you get wet in the rain?" Grandpa asks. "Yes. Rain," Shawn answers.
a. Shawn likes the rain.
b. Shawn likes Grandpa.
c. Shawn understands Grandpa's question.
5. "Let's pretend we're cats," Shawn's three-year-old cousin suggests.
a. Shawn's three-year-old cousin can talk.
b. Shawn's three-year-old cousin can pretend.
c. Shawn's three-year-old cousin has a cat.
REVIEW A SKILL Finding the Main Idea (See p. 21)

Each story about Shawn (except the last one) is followed by a paragraph that describes a typical behavior of autistic children. Make a list of the main ideas of each paragraph in your notebook.

A. Read this magazine article that gives advice to parents of autistic children. Use the target vocabulary in the box to complete the article. Compare results with a partner.

appropriate capabilities interact participate relax constrain mature phases task assess

Experts recommend that parents enroll young children with autism in a special
preschool class as early as possible. The goal is to help the children strengthen their
social and language skills during the formative of childhood
and learn classroom behavior before they enter kindergarten.
Each day, the children in games, songs, and play activities that
encourage them to with each other. Individual children are
assigned a daily, such as feeding the class pet, to help teach
responsibility. Parents are required to attend classes with their child to learn more
about autistic behavior. Observing their own child in a group setting allows them to
realistically the child's and limitations.
Parents also see techniques that the trained teachers use toa
child's unwanted behavior, such as hand-flapping. Telling a child to
(9. become less tense) by taking a deep breath is one technique parents learn. As the
children, they will remember this relaxation technique and
use it to constrain their own behavior without being reminded.
B. A link is a connection between two things. Certain behaviors are linked to autism because they are common or typical in most autistic people. Working with a partner, put a check (✓) next to the behaviors that are linked to autism, according to Reading 1.
a. spinning d. being sensitive to loud noises g. excelling at math
b. writing letters e. watching a videotape h. hand-flapping
c. pretending f. preferring to be alone i. liking repetition
C. A phase is a step or stage of development. With a partner, look at the phases of language development in children. Number them in the order they are likely to occur, with the first phase as 1.
a. one-word sentences ("Ball.") d. two-word sentences ("Mama look.")
b. babbling ("Dadadada") e. three-word sentences ("Daddy, read me.")
c. cooing ("Oooooooo") f. crying

The adjective *odd* refers to something that is unusual or inappropriate for a particular situation.

Some autistic kids have the **odd** behavior of hand-flapping.

Another meaning for *odd* applies to numbers. An odd number cannot be divided evenly by 2, such as the numbers 1, 3, 5, 7, 9, 11, 13, etc.

I always seem to have an odd number of socks in my drawer.

As a plural noun, odds refer to the chances of something happening.

The odds are one in a million that you will win the lottery.

I wouldn't give you good odds on finding a taxi at this hour of night.

CORPUS

D.	choices with a partner.			
	coffee with sugar	coffee with mustard	milk with honey	
	tea with honey	coffee with milk	milk with cola	
	tea with garlic	tea with lemon	hot chocolate with chili pepper	

Vocabulary Activities STEP II: Sentence Level

	Word Fo	orm Chart
Noun	Verb	Adjective Adverb
assessment reassessment	assess reassess	assessable

E. To assess something is to judge it or to form an opinion about it. Complete this paragraph about autism assessment by using a form of assess in each blank.

By age two, a typical child has developed many verbal and social skills, such
as speaking and interacting with others. If these skills are absent, the child's
doctor may suspect autism. There is not just a single test a doctor can use to
(1) a child for autism. Instead, the doctor looks for the presence
or absence of certain behaviors. Autism is (2) only by carefully
observing the behavior of a child, so the actual (3) may take
several hours. The doctor (4) the child's attempts to
communicate with his parents. He also looks for repetitive behavior, such as hand-
flapping, or sensitivity to sounds or textures. If the doctor's diagnosis is autism, he
may suggest a (5) by a second doctor to confirm the diagnosis.
Over the next several years the child will be (6) regularly to see
if he has made progress.

- F. A task is a small job, often one that is assigned by a teacher, parent, or boss. Using what you know of Shawn's skills from Reading 1, infer which of these classroom tasks will probably be difficult for him and which he will do easily. Write sentences in your notebook about each task.
- 1. writing about his vacation

Shawn can probably do this **task**. He often writes letters to his grandparents about places he visited with his family.

- 2. taking a spelling test
- 3. solving subtraction problems
- 4. working with a committee to plan a class party
- 5. giving an oral report

The adjective *appropriate* refers to something that is suitable, proper, or correct for a particular situation. People sometimes disagree about what is appropriate or inappropriate. The noun form is *appropriateness*.

What is appropriate to wear to a job interview?

Meg is appropriately dressed in a suit. Jeans and a T-shirt are inappropriate.

The interviewer commented on the inappropriateness of Sam's clothes.

As a verb, *appropriate* means "to decide to give something, especially money, for a particular purpose." The noun form is *appropriation*. This meaning is rather formal and official.

The university **appropriated** one million dollars for a new autism study. The business plan includes an **appropriation** for local charities.

G.	Read these short conversations. Some of Sam's responses are odd. Write a sentence about the appropriateness of Sam's reply using the word in parentheses.
1.	Mark: "Thank you for the birthday card."
	Sam: "How old are you?"
	(appropriate)
2.	Mark: "Are you coming to my party tonight?"
	Sam: "Thank you."
	(appropriate)
3.	Mark: "Can I borrow your pen?"
	Sam: "I know how to spell."
	(inappropriate)
4.	Mark: "Have you seen my brother?"
	Sam: "No."
	(appropriate)

Read

This journal article details some of the current research into autism and some possible causes for it.

Looking for Answers

utism is a neurological disorder that usually appears before a child's third birthday. It is marked by impaired language skills, impaired social skills, and repetitive behaviors.

RECENT INCREASE IN AUTISM

Recently there has been a dramatic and unexplained increase in the number of children diagnosed with autism. Medical scientists estimate an autism ratio of 1 in every 110 children in the United States. Other countries show similar high ratios: 1 in 160 in Australia, 1 in 250 in India, and 1 in 475 in Japan, for example. Scientists believe that

the differences among countries may reflect how children are evaluated rather than the actual proportion of children who have autism. These numbers are alarming to scientists because they do not know what causes autism and do not know how to cure it. Medical researchers have been looking for answers.

THE AUTISM SPECTRUM

Scientists use the term "autism spectrum" to refer to the range of abilities that autistic people display. At one end of the spectrum, individuals are severely 20 affected, while at the other end, individuals are only

Temple Grandin holds a doctorate degree. She also has autism.

mildly affected. Some individuals cannot speak; others are highly verbal. Some are overly sensitive to noise; others seem not to notice it. Some prefer to be alone; others want friends. Some even marry and have children. Some are unable to learn school subjects; others go on to earn a Ph.D. degree.

25 Indeed, each person with autism may have a unique set of traits.

LOOKING FOR CAUSES OF AUTISM

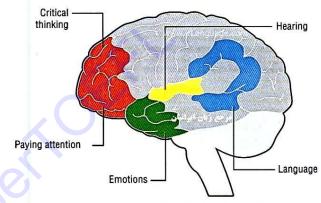

Although scientists agree on the traits that characterize autism, they have not yet found what causes autism. In the 1950s, autism was considered a psychological disorder, caused by "refrigerator mothers." Their personalities were thought to be so cold and uncaring that their children grew up unable to speak or **interact** with others. As research progressed, scientists realized that autism was actually a neurological, or brain, disorder. Studies have identified several areas of the brain that differ from the norm in autistic individuals. These areas involve emotions, critical thinking, learning, and paying attention. However, no one area seems to hold the key to autism.

Some researchers have **inferred** that faulty connections between areas of the brain may be responsible for autism. Or perhaps there are too many connections. That could cause an overload of messages within the brain.

Medical scientists have also explored brain chemistry. In a recent study,

researchers took blood samples from many
newborns. When some of these babies later
developed autism, the researchers tested
their early blood samples and found high
levels of four chemicals that influence the
early phases of brain development. However,
they have not been able to prove a direct
link between the chemicals and the autism.

There is strong agreement that genes, the carriers of inherited traits, play a role in autism. Research continues to explore
50 heredity as a cause. Recently, researchers found a link between autism and the age of the child's father, with the odds of parenting an autistic child increasing with older

Areas of the brain commonly affected by autism

fathers. It is also known that among autistic children, males **predominate** by a **ratio** of 4 to 1. Additionally, autism seems to run in families. Despite the strong evidence pointing to heredity, scientists haven't yet identified a single gene responsible for autism. Instead, they now think that hundreds of changes take place in a child's genes before birth. Some of these changes affect connections between brain cells. When genetic changes involve connections in the brain, autism can occur.

Scientists are also investigating environmental causes. They have looked into toxic metals in water and soil, harmful chemicals in household products, viruses, air pollution, and even television viewing, but have not found a consistent **link** to autism. Recently, some scientists have suggested that a combination of hereditary and environmental factors may cause autism.

TREATING AUTISM

Despite this extensive research, scientists so far have been unsuccessful in finding either a cause or a cure for autism. However, treatment, either through medication or training, has benefited many autistic children by helping them to **relax**, to **constrain** antisocial behavior, to **participate**70 socially, and to learn useful skills. Medication has worked for some children. However, it has not been widely used because it can have serious side effects. Other treatments that have worked for some children include

controlling the child's diet, providing the child with an animal to take care of, and encouraging self-expression through art. The ⁷⁵ Chinese use acupuncture and **relaxation** programs.

APPLIED BEHAVIOR ANALYSIS

A common training is Applied Behavior Analysis, which breaks down a **task** into tiny steps and rewards every small success with a bit of cookie or other treat. If a child does not speak, for example, the therapist will reward even a small sound a child makes when she asks him to repeat a word. It may take several sessions to get the child to utter a sound, and many more to get him to say a word, but each success is praised and rewarded. Many autistic children have improved greatly with such training, but others have not.

Whatever treatment parents decide is **appropriate**, they must be aware that children are most likely to benefit if they begin early. Delaying treatment until the child **matures** is a waste of valuable time. Parents must also recognize that not all treatments benefit every child, so they must regularly **assess** their child's behavior for signs of progress. Treatment that doesn't work is also a waste of time.

Meanwhile, scientists are still looking for answers to solve the autism puzzle. ■

Scientists have yet to solve the "autism puzzle."

Reading Comprehension

Mark each statement as T (True) or F (False) according to the information in Reading 2. Use your dictionary to check the meaning of new words.

- ____1. Researchers found four chemicals that influence the early phases of brain development.
- ____2. As a man gets older, the odds increase that he will parent an autistic child.
- ___3. There is strong agreement that heredity is the predominant cause of autism.
- ___4. Researchers have found a link between autism and television viewing.
- ____5. Medication has helped some autistic children constrain their behavior.
- 6. Children who participate in Applied Behavior Analysis learn a task one step at a time.
- ____7. Parents must regularly assess their child's behavior for signs that they are wasting time.

READING SKILL

Making Inferences

APPLY

Reread the paragraphs indicated. Then, write *D* for the ideas that are directly stated and *I* for those that you can infer. Write *N* if an idea is not directly stated or cannot be inferred. Discuss your answers in a small group.

PARAGRAPH 2

- <u>D</u> 1. Scientists do not know the cause of autism.
- ____ 2. There is no cure for autism.
- 1 3. Scientists cannot explain the recent increase in autism.
- ____4. Scientists are not sure how many children are affected.
- ____ 5. Scientists are alarmed.

PARAGRAPH 3

- ___1. A person who is mildly affected with autism is highly verbal.
- ____2. Some people with autism are very intelligent.
- ____3. Not all autistic people prefer to be alone.
- ___4. The term "autism spectrum" was recently created.
- ____5. Each autistic person may have a different combination of traits.

PARAGRAPH 4

- ___1. Autism is not a psychological disorder.
- ____2. A neurological disorder is a disorder involving the brain.
- ____3. Scientists are not certain if faulty connections within the brain cause autism.
- ____4. Scientists have abandoned their study of the brain.
- ____ 5. Several areas in the brain of autistic children differ from those in normal kids.

Vocabulary Activities STEP I: Word Level

A person who is *capable* of doing something has the necessary skills to do it. If he lacks these skills, then he is *incapable* of doing it. The words can also refer to objects.

Most autistic children are **incapable** of imagining something that is not real.

Passenger airplanes are **capable** of flying overseas without refueling.

A. With a partne incapable of o						
A blind persor	n is capable d	of listening to	music.

Vocabulary Activities STEP II: Sentence Level

Word Form Chart				
Noun	Verb	Adjective	Adverb	
maturation maturity immaturity	mature	mature immature maturational		

To *mature* refers to the process of becoming fully developed physically or mentally. If someone or something is *immature*, then development is delayed compared to others.

As boys mature, they become taller and more muscular.

Susan is ten, but she's so immature.

There are two noun forms:

maturation the process of developing or aging maturity the state of being fully developed

E. Read this paragraph. Then, complete it by using the correct form of *mature* from the chart. Compare answers with a partner.

A premature baby is one that is born before it	is fully developed. Because of its
(1), a premature baby is usua	ally placed in a hospital incubator
where it can continue to (2)	in a safe environment. A baby born
too soon has not had time for adequate (3)	of body systems
that are essential for life. The baby's (4)	lungs, for example, may
not be able to supply enough oxygen, so it will n	need help breathing. The baby will
remain in the incubator until it has achieved a sa	fe level of (5)
The baby will make steady progress, but its grow	th will be delayed compared to
that of a full-term baby. For example, a full-term	baby may sit up at six months of
age, but a premature infant may not reach this (6	phase for
several more months.	

Word Form Chart				
Noun	Verb	Adjective	Adverb	
predominance	predominate*	predominant	predominantly	

^{*}Note: There is no -ing form for this verb.

Predominance and its related word forms refer to being greater in importance, strength, number, or some other factor.

Tall players predominate in the game of basketball. They are predominant.

There is a predominance of brown-eyed people in the world.

Humans are predominantly brown-eyed.

F. Read the paragraph about Temple Grandin. Then, rewrite the sentences that follow in your notebook, using the form of *predominant* in parentheses.

Temple Grandin is autistic, yet she has a Ph.D. and is a university professor. Dr. Grandin has written several books about autism. Her superior verbal skills and intelligence have enabled her to analyze and describe how individuals with autism think. She writes, "I think in pictures. Words are like a second language to me. I translate both spoken and written words into full-color movies."

 Among high-functioning autistic individuals, most are visual thinkers. (predominance)

There is a **predominance** of visual thinkers among high-functioning autistic people.

- 2. Nouns are easiest because they are mostly things you can picture. (predominantly)
- 3. Most people are verbal thinkers in universities. (predominate)
- 4. Dr. Grandin was surprised by the number of people who think only in words. (predominance)
- 5. Seeing pictures in her mind is the way Temple Grandin creates ideas. (predominant)
- **G.** A *ratio* is a mathematical expression comparing the size or amount of two sets of things. Write a sentence in your notebook to express the ratios of these groups. Discuss your sentences in a small group.
 - 1. at birth: boys, 105; girls, 100

At birth, boys outnumber girls by a ratio of 105 to 100.

- 2. autistic children: girls, 1; boys, 4
- 3. adults who are colorblind: men, 15; women, 1
- 4. at age 65: women, 10; men, 7
- 5. people in my family: male, _____; female, _____
- 6. communication I receive: email, _____; phone calls _____
- 7. school time: hours in class, _____; hours studying, _____

	Word For	rm Chart	
Noun	Verb	Adjective	Adverb
participant participation	participate	participatory	

H. Read this description of an autism study. Then, complete the paragraph by using the correct form of *participate* in each blank. Compare answers with a partner.

Several young children are asked to (1)	in an experiment.
Half of the (2)are typical children, ar	nd half of the
(3)are autistic children. Their (4)	consists
of watching a scene in which two little girls are playing w	vith dolls. One of the
girls, Mary, puts her doll in a basket and leaves the room.	While she is gone, her
friend, Linda, takes the doll out of the basket and puts it	into the drawer of a
table. Then Mary returns. The children who are (5)	in the
experiment are asked, "Where will Mary look for her doll	?" The typical children
agree that Mary will look in the basket because that's wh	ere she left the doll.
However, the autistic children say that Mary will look in	the drawer because that's
where the doll is. This experiment demonstrates that auti	stic kids cannot imagine
something that is not true.	

- I. Imagine that you were one of the scientists who conducted the above experiment. In your notebook, write a brief conclusion that describes what you learned from the experiment about children with autism.
- J. Self-Assessment Review: Go back to page 113 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

Writing and Discussion Topics

With a partner or a small group, share ideas about the following topics. Then have each person write a paragraph about one of the topics.

- 1. Why might it be difficult to be friends with an autistic person? What would be some of the challenges?
- 2. The first reading is called "The Autism Puzzle." Why is this a good title?
- 3. What are some facts you learned about autism?

Sea of Life

In this unit, you will

- learn about humans' impact on oceans and important deep-sea discoveries.
- review identifying definitions.
- increase your understanding of the target academic words for this unit.

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. How often do you eat fish?
- 2. Do you ever visit the ocean to go fishing or to relax on a beach?
- 3. How do oceans benefit people?

Read

6 6

This article is part of a series of articles about our changing oceans.

SAVING THE OCEANS

he oceans of the world **occupy** over 70% of the earth's surface. They provide food for billions of people, serve as places of recreation, and facilitate the transportation of passengers and cargo.

For all of human history, people regarded the oceans as an indestructible and infinite resource.
 Until recently, humans had little impact

on the oceans. However, as the earth's population increases, human activity will

ultimately destroy the oceans unless immediate steps are taken.

OVERFISHING

Overfishing is one major threat. Fish are being taken out of the oceans faster than the remaining fish can reproduce. A big fish—tuna, cod, shark,

- or swordfish—yields many pounds of delicious seafood when it reaches maturity. However, to meet the increasing demand for these fish, commercial fishermen began catching small, immature fish. In the **process**, they almost
- destroyed the species. Ocean scientists estimate that 90% of these big fish are now gone from the oceans, and about 30% of all fished species have been destroyed.

_A commercial fishing operation

OCEANS AS A SOURCE OF FOOD

Of the earth's seven billion people, over one billion rely on fish as a source of protein. Billions more eat fish frequently because of its health benefits and its good taste. Throughout the world, food from the sea provides between 5% and 10% of the total food supply. But when fish disappear from the oceans, they will also disappear from our dinner plates. The **impact** on those who rely on fish could be malnutrition or even starvation.

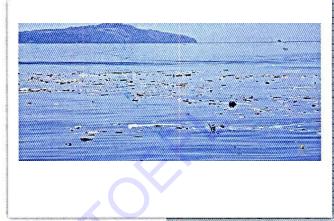

HOW HUMANS IMPACT OCEANS

Humans are **impacting** ocean life not only by what they take out of the oceans, but also by what they put into the oceans. Carelessly discarded cans, bottles, plastic cups, and baby diapers find their way into the stomachs of fish, often killing them. Toxic chemicals and industrial trash are also discarded into the oceans, either accidentally or thoughtlessly. Such **conduct** pollutes

the water and kills sea life. Spills from a single oil tanker can **contribute**

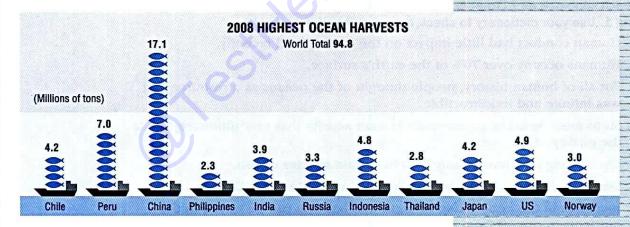

polluted oceans. In the United States,

200,000 tons of oil to the already

Trash that has ended up in the ocean

an estimated 15,000 tons of automobile oil **annually** washes off roads into rivers and streams and **ultimately** into the sea.

Along with the harmful oil, however, run-off also carries tons of nutrients in the form of plant matter, fertilizers, animal waste, and garbage that can be **traced** to cities, farms, factories, and forests. Poisonous algae and bacteria (microscopic plants and animals) in the ocean feed on the nutrients. As the run-off increases, the **aggregation** of algae and bacteria increases, further **eroding** the marine environment. Small fish that feed on the algae and bacteria are sickened or killed by the poisons they contain. When larger fish feed on the smaller ones, they too are

sickened by the poisons. **Ultimately,** humans who eat the flesh of poisoned fish will be sickened, too.

STEPS THAT CAN SAVE THE OCEANS

Are healthy oceans **compatible** with an industrialized world?
What can be done to **terminate** the steady destruction of the
oceans? Among other steps, countries can set limits on the
number of fish that fishermen can legally catch. Governments
can also create sea reserves, areas where fishing is **temporarily**banned until the fish population increases. Commercial
enterprises can develop open-ocean aquaculture to grow fish in
underwater cages miles from land. And individuals can refuse to
buy fish in restaurants and markets if the species is threatened.

Governments can also protect the sea by enacting strict controls on ocean dumping. They can demand that oil tankers have higher safety standards. They can **process** run-off water to remove toxic substances. Individuals can properly dispose of leftover household and garden chemicals so they do not add to the toxic run-off into the oceans.

Scientists agree that it's not too late to save the oceans, but we must begin at once to take the necessary steps.

Reading Comprehension

Mark each sentence as T (True) or F (False) according to the information in Reading 1. Use your dictionary to check the meaning of new words.

- 1. Human conduct had little impact on the oceans until recently.
 2. Humans occupy over 70% of the earth's surface.
- 3. For all of human history, people thought of the oceans as a resource that was infinite and indestructible.
- ___ 4. Steps must be taken to terminate human activity that may ultimately erode the quality of the oceans.
- ___ 5. Overfishing may temporarily benefit certain species of fish.
- ___ 6. Discarding trash into the oceans greatly contributes to pollution.
- 7. Increases in the aggregation of algae and bacteria can be traced to the nutrients in run-off from cities, farms, factories, and forests.
- ___ 8. Oil tankers annually spill 200,000 tons of oil into the oceans.
- ___ 9. It isn't possible to process run-off water to remove toxic substances.
- ___10. Healthy oceans are compatible with an industrialized world if necessary steps are taken to protect the oceans.

READING SKILL

Reading Statistical Tables

LEARN

Articles about scientific topics frequently contain statistics that support the information in the text. The table in Reading 1, for example, compares the amount of fish collected, or harvested, by several nations of the world to support the information about overfishing.

Numerical information in tables is often reduced for clarity. The table in Reading 1 eliminates the many zeros in the numbers by telling the reader that amounts are in million tons. So, for Chile, the number 4.2 really means that Chile harvested 4,200,000 tons of fish. Shortened numbers are read differently from complete numbers. Chile's harvest is read "four point two million tons."

Numbers in tables are also often rounded up or down. The actual number of fish might be 4,198,314 tons, for example, but that number is rounded up to 4.2 million tons.

APPLY

- A. Complete the tasks with a partner. Use the information in the table in Reading 1.
 - 1. In the order of their fish harvests, read all of the country names and their fish harvests out loud. Use shortened numbers, such as "Chile—four point two million tons."
 - 2. From biggest harvest to smallest, write all of the complete numbers, such as 4,200,000. Then, read them out loud.
- **B.** What can you infer from the information in the table? Mark a statement *I* if you can infer that it is true. Mark a statement *N* if you cannot infer that it is true.
- N a. The United States harvested more fish in 2008 than in 2007.
- ____ b. Fishing is an important industry in these countries.
- ___ c. About half of the top countries are in Asia.
- ___ d. Indonesia harvested more fish than Norway.
- ____ e. The numbers do not include fish caught in rivers and lakes.
- ___ f. All the fish is eaten by people within the country that harvests it.
- ___ g. China harvested about 18% of the world total in 2008.
- ___ h. Canada did not harvest fish in 2008.

REVIEW A SKILL Identifying Definitions (See p. 69)

Find definitions in Reading 1 for the words nutrients and algae.

- e. They can't hold any more.
- F. With a partner, use the target vocabulary to complete this article on the impact of global climate change.

annual	contributed	impact	traced
compatible	erosion	process	ultimately
	Control of the second		BANKAL BANKA B

Today there are 20,000 to 25,000 polar bears worldwide. This represents a decline of 21% over the last 20 years that can be directly (1) _______ to global climate change. As the average (2) ______ ocean temperature in the Arctic rises, the bear population declines. The bears' way of life is not (3) ______ with a warm climate because they depend on sea ice for summer hunting. The (4) ______ of global climate change has caused an (5) _____ of the polar bear environment. It has (6) ______ to weight loss in the males, falling reproduction rates in the females, and lower survival rates among newborn cubs. If the overall warming (7) _____ of global climate change continues at its present rate, the polar bears will (8) _____ disappear.

Vocabulary Activities STEP II: Sentence Level

When people or things are *compatible*, they get along well or work together well. The negative form is *incompatible*. The noun forms are *compatibility* and *incompatibility*.

Ahmed and Hakim were successful business partners because they were **compatible**.

Electrical appliances are often incompatible with foreign power systems.

CORPUS

- **G.** Work with a partner. Imagine that one of you has an old computer. That person goes to a computer store to buy some new equipment and software for it. The other person is a clerk in a computer store. Create a short conversation that includes the words compatible, incompatible, compatibility, and incompatibility in at least two questions and two answers between the two people.
 - A: Is this printer compatible with my computer?
 - B: Actually, incompatibility is often a problem with these older models.

The word *impact* has two meanings. It can refer to a strong force hitting something, or more abstractly, to the strong effect something has or creates. Both meanings have a noun and verb form.

We felt the **impact** of the explosion a mile away. The world economy **impacts** all our lives.

- **H.** In your notebook, rewrite each sentence two ways, using *impact* once as a noun and once as a verb.
 - 1. The shortage of fish has affected the fishing industry.

The shortage of fish has had an **impact** on the fishing industry. The shortage of fish has **impacted** the fishing industry.

- 2. Her new job affected the whole family.
- 3. The collision had a different effect on each of us.
- 4. The new law will change the way people pay their taxes.

To contribute to something means to add or give something to a larger activity.

The adjective form is a contributing + factor/cause/element/etc.

High winds **contributed** to the accident.

High winds were a **contributing** factor to the accident.

To contribute means to give money or assistance, usually to a charity. The noun form is contribution.

I contribute annually to Save Our Oceans.
I send a contribution to the Red Cross, too.

Collocations (words that go together): to make/send a contribution

In your notebook, rewrite the following sentences to include a form of contribute.

In April 2010, an explosion of an oil rig caused a massive oil spill in the Gulf of Mexico. BP owned the rig.

- 1. BP admitted to mistakes that helped cause the oil spill.
 - BP admitted to mistakes that contributed to the oil spill.
- Oil rose to the surface of the ocean. Strong winds made the oil spread over 4,000 square miles.
- 3. BP gave \$20 billion to build a fund to help pay for damages and clean-up.
- 4. Thousands of volunteers gave money and time to help rescue sea animals.

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. Some people claim that we know more about the moon than we know about our oceans. Do you agree?
- 2. What is the value of exploring the ocean floors?
- 3. Who should pay for exploring the oceans? Why?

Metric conversions for measurements used in Reading 2:

1 inch = 2.54 centimeters

1 pound = 0.45 kilogram

1 foot = 0.3 meter

1 knot = 1.85 km/hour

1 mile = 1.6 kilometers

Read

This article about underwater exploration appeared in a science magazine.

Exploring the Deep Ocean

Alvin can dive to ocean depths of 20,000 feet—nearly four miles down. Alvin can rest on the ocean bottom or hover at middle depths for up to ten hours, taking photographs and performing underwater experiments. Alvin is amazing. Many of the 150 to 200 dives Alvin makes **annually** result in underwater discoveries of unusual sights never before seen.

FACTS ABOUT ALVIN

Alvin is not a man. Alvin is a deep-sea submersible craft capable of carrying up to three **occupants**. It is owned and operated by the Woods Hole Oceanographic Institution on the east coast of the United States. Alvin was built in 1964, but it has been upgraded and

The deep-sea submersible, Alvin

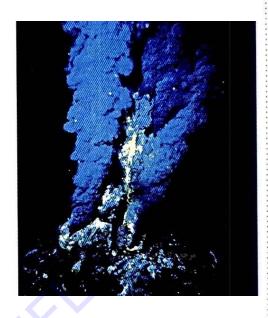

reconstructed many times since then. Alvin's titanium hull, or outside shell, is built to withstand the **impact** of the immense pressure of the deep ocean. Alvin weighs 37,400 pounds and is 23 feet 4 inches long. It has a six-mile range and a top cruising speed of two knots. Five hydraulic thrusters propel the craft, and lead-acid batteries power the electrical system.

Inside is an **infinite** variety of the latest electronic equipment, including a gyrocompass, a magnometer, and a computer **terminal**.

Alvin allows researchers to **conduct** underwater biological, chemical, and geological studies. Special lamps shine light into the black water so observers can see the wonders of the underwater environment. Cameras are mounted on the outside to take underwater photographs, and two external "arms" enable researchers to collect underwater samples.

ALVIN'S AMAZING DISCOVERY

One day in 1977, Alvin contributed to an amazing discovery. On that day, Alvin was transporting scientists on a routine study. The craft was one and a half miles below the surface of the sea near the coast of the Galapagos Islands. As they looked through the three 12-inch portholes, the scientists were temporarily stunned to see a strange underwater landscape littered with what looked like chimneys. The chimneys were discharging clouds of black smoke into the surrounding water. Clustered around the chimneys was an aggregation of odd creatures that lived totally cut off from the world of sunlight. The scientists were looking at hydrothermal vents and the strange sea creatures that exist near them—an entire system of life based not on

A hydrothermal vent, or "chimney"

STRANGE SEA CREATURES

sunlight, but on energy from the earth itself.

vents. Among the chemicals pouring out of the vents is hydrogen sulfide, a gas that is poisonous to most land-based life. However, bacteria in the seawater near the vents feed on this gas and other dissolved chemicals and minerals pouring from the vents. Then tiny animals feed on the bacteria, and these tiny animals ultimately become food for still larger animals. Giant red and white tube worms eight feet tall cluster near the vents and dominate the scene. Tiny shrimps and white crabs feed on the worms while giant clams rest in the sand. In an environment that seems incompatible with life, these creatures are thriving.

Ocean life growing near the vents

WHAT IS IN THE FUTURE?

Since the first vent was discovered in 1977, hundreds of other vents have been located in oceans around the world. In 2008, a cluster of five vents was discovered in the Atlantic Ocean between Greenland and Norway. Some of the sites are inaccessible, so scientists have not been able to study them all. However, scientists are planning to **trace** the development of vents by revisiting some they studied earlier. They want to find out if the vents will **erode** or remain active over time and if the odd creatures will change.

Reading Comprehension

Mark each statement as T (True) or F (False) according to the information in Reading 2. Use your dictionary to check the meaning of new words.

- ___1. Alvin makes between 150-200 dives annually.
- ____2. Alvin is a man who temporarily helped researchers conduct underwater studies aboard a submersible craft.
- ____3. Alvin's occupants have an infinite variety of electronic equipment available.
- ___4. Alvin contributed to the discovery of the Galapagos Islands in 1977.
- ____5. Near vents, aggregations of giant tube worms, shrimps, and crabs exist in an environment that seems incompatible with life.
- ____6. Scientists plan to revisit some of the vents in order to trace their development.
- ____7. Scientists will terminate their study of vents because some vents are inaccessible.

Vocabulary Activities STEP II: Sentence Level

The word conduct has different meanings in its noun and verb forms.

As a verb, *conduct* (pronounced con-DUCT) refers to something that you organize and carry out. It can also mean to lead an activity or group. This meaning has no other word forms.

Scientists conducted several underwater experiments.

She has conducted a number of choirs.

Collocations (words that go together):

an experiment

an investigation

a test

a meeting

an orchestra

a class

a tour

a search

a survey

a demonstration

a project

a discussion

The noun (pronounced CON-duct) is a more formal word for behavior.

This is clearly a case of improper professional conduct.

CORPUS

E. Match the people in the first column with an activity in the second column and the purpose or topic of their activity in the third column. Write complete sentences in your notebook using different forms of the verb conduct.

A visiting professor conducted a class on the future of sea exploration.

1. a visiting professor

a survey

playing his Symphony in F

2. detectives

a class

for the missing murder weapon

3. marketers

an experiment

to identify future customers

4. a famous composer

a search

the future of sea exploration-

5. ocean scientists

a local orchestra

on poisonous algae

	Word Form Chart		
Noun	Verb	Adjective	Adverb
occupancy occupant	occupy	occupied occupying	
occupation	A CONTRACTOR OF THE PROPERTY O	occupational	occupationally

The word occupy has several meanings.

To have possession of a particular physical space:

Do you know who occupies that apartment?

Hotel rates are based on double **occupancy**; there is an extra charge for a third person.

To fill a space, a period of time, or one's thoughts:

Studying occupied my weekends until I graduated.

Politically, to take over a country or area by force and run it:

A foreign army once occupied this country. The occupation began in 1850.

The noun form occupation refers to the work that a person does.

Everyone in my family has the same occupation—we're all farmers.

A police officer has to face many occupational hazards.

If something is occupied, it is in use. If a person is occupied, then she is busy.

The bathroom was occupied, so I waited my turn.

I am occupied all day with meetings.

- F. In your notebook, rewrite the following sentences to include the given form of occupy.
 - 1. There is a computer inside Alvin. (occupies)

A computer occupies space inside Alvin.

- 2. Dr. Lee works as an ocean scientist. (occupation)
- 3. Alvin has room for three people. (occupants)
- 4. Scientists spend most of their time looking out of the view ports. (occupies)
- 5. Giant tube worms live in an underwater environment without sunlight. (occupy)

Process refers to change. A *process* can refer to a natural event that occurs in gradual steps or a series of actions directed toward a particular result.

The process of tree growth can be traced through its rings.

How did an author ever write a book without a word processor?

From the processing plant, the processed fish is transported to markets.

Process can also refer to checking information, fees, or other materials submitted in order to achieve something.

The university processes thousands of applications for admission.

The phrase *in the process* can suggest two different ideas. In one context, it means a person has started a complex procedure but has not completed it yet.

Helen is in the process of finishing her essay for her college application.

In other contexts, it describes how one action results in something unexpected.

I was cooking dinner, and in the process I burned my thumb.

- **G.** In your notebook, rewrite each sentence to include the form of *process* in parentheses. Be prepared to read your sentences aloud and discuss them in a small group.
- 1. Scientists observed how vents are formed. (the process of)
 Scientists observed the process of vent formation.
- 2. Vents are formed when seawater seeps down into the earth's crust. (the process of . . . begins)
- 3. The seawater is heated to over 750° F. As it heats, it expands. (in the process)
- 4. As it rises through the cracks, the hot water dissolves chemicals from the rock. (in the process of)
- 5. Some of the minerals harden and form a rim around the vent. (in the process)
- H. Self-Assessment Review: Go back to page 129 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

Writing and Discussion Topics

With a partner or a small group, share ideas about the following topics. Then have each person write a paragraph about one of the topics.

- 1. Describe some of the ways that oceans contribute to the economies of countries around the world.
- 2. One result of global warming will be that polar ice will melt. What impact will this have on our world?
- 3. Describe some of the ways that oceans are used for recreation. Could any of these contribute to a depletion of sea life? How?

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. How many people do you know who wear glasses? What would their lives be like if they didn't own a pair of glasses?
- 2. What does it mean to "give someone a hand"? How can people give nature a hand to keep their bodies healthy?
- 3. How has science helped people have healthier bodies?

Read

This article highlights some of the ways that humans have managed to overcome the obstacles that nature put in their way.

Giving Nature a Hand

or most of human history, humans have had to live with the body that nature gave them. They lacked the knowledge to improve eyes that couldn't see clearly, or help ears that couldn't hear.

Such disabilities were more than an inconvenience for early humans; they were a threat to their existence. A person with impaired vision might not be able to hunt or work with tools, for example. Over time, the

incentive to survive led people to develop devices

EARLY WAYS TO IMPROVE VISION

10 that would fix these impaired conditions.

During his 12th-century travels through China, Marco Polo supposedly saw people using eyeglasses. Soon, eyeglasses came into common use in Italy. The **objective** of the earliest lenses was to help people see things that were close up so they could do tasks like carving or sewing. Soon after, lenses to help people see distant objects became common. In the 18th century, the two types of lenses were combined in one pair of bifocal lenses so individuals who were both farsighted and nearsighted needed just one pair of eyeglasses.

Early glasses were held in the hand or clipped on the nose, held there by the **tension** of the stiff wire they were made from. Modern framed glasses, **suspended** from the ears by earpieces, were uncommon until the 19th century.

IMPROVING VISION TODAY

Nowadays, other options are available. For example, about 2 percent of the people in the world opt for contact lenses, which lie on the surface of the eye. Fortunately, corneal implants and laser surgery may one day eliminate the need for corrective devices altogether.

WAYS TO IMPROVE HEARING

No evidence exists of an early device to enhance hearing, but it probably did exist. It was likely a hollow, coneshaped animal horn with the point cut off. Held with the tip by the ear, the horn could be directed toward a voice, for example, so sound waves from the voice could be focused into the ear.

In the 20th century, battery-operated hearing aids became common. The components included a case that contained a battery and a sound-amplification device. A wire attached the device to a disc that was inserted into the ear. Today, thanks to electronics, tiny devices that fit behind the ear contain both energy cells and an amplifier. They provide not only better amplification, but also better discrimination between various sounds. There is now a surgical alternative to improve hearing without an external device. A medical evaluation can determine whether this alternative—a cochlear implant—might be right for someone with a hearing loss.

An early hearing aid

REPLACING TEETH

Tooth loss was common among our early ancestors due to accidents, infection, and disease. Being toothless affected people's ability to eat and speak clearly. It also made them physically unattractive. The earliest known false teeth, or dentures, date from the 15th century, when rich people were willing to spend a large **sum** of money for uncomfortable false teeth carved from ivory, animal teeth, or wood. When the process of making rubber was perfected in 1851, dentists immediately **advocated** its use as a base material for dentures. It was soft, so it would be comfortable. It could be molded to fit individual mouths, and it could securely hold artificial teeth. It was also cheap, making dentures affordable to everyone.

Today, dental implantation is available for people who need to replace one or several teeth. Fixed into the jawbone with a titanium screw, an implanted tooth becomes a permanent replacement rather than a removable dental device.

The exploration of an ancient Mayan burial site in Honduras
uncovered the tomb of a young woman, **confined** there for 1,400
years. Her jawbone contained three tooth-shaped pieces of seashell embedded
into the bone in spots where three of her natural teeth were missing. Was the
dental implant a punishment **imposed** on her, or was it a **voluntary**procedure? Were the Mayans the first humans to give nature a hand with
dental implants?

Reading Comprehension

Mark each statement as T (True) or F (False) according to the information in Reading 1. Use your dictionary to check the meaning of new words.

- ___ 1. Survival is a strong incentive to fix impairments.
- ___ 2. The objective of the earliest eyeglasses was to help people do close-up tasks.
- ___ 3. Early eyeglasses were secured to the ears by tension or suspended from the nose.
- ___ 4. A large proportion of people are choosing to have corneal implants to eliminate the need for corrective devices.
- ___ 5. A penalty was imposed on people for using animal horns as hearing aids.
- ___ 6. A medical evaluation may determine that a person's hearing would improve with a cochlear implant.
- ___ 7. Better sound discrimination is possible in modern hearing aids.
- ___ 8. Dentists advocate the use of corneal implants as an alternative to dentures.

READING SKILL

Distinguishing Fact from Opinion

LEARN

As you read, it is important to recognize the difference between a fact and an opinion.

information that can be proven to be right or wrong

OPINION a statement that you cannot prove to be either right or wrong

Opinions often contain value words such as best, worst, beautiful, awful, funniest, or most interesting. Compare these two statements:

It is raining. The weather is awful.

You can prove the first statement by looking out of the window. The second statement is someone's opinion of the weather, so you cannot prove it is right or wrong.

APPLY

A.	With a partner, decide whether each statement is a fact or an opinion.
	Write Fact or Opinion on the line.
1	1. Humans cannot live without oxygen to breathe.
<u> </u>	2. Good vision is more important than good hearing.
d e	3. Humans have five toes on each foot.
_	4. People with big ears can hear better.
	5. Long eyelashes are pretty.
-	6. Type O is the most common blood type.

- B. Write one fact and one opinion about devices to improve hearing. Write one fact and one opinion about devices to improve vision. Read your sentences aloud in a small group and let the others decide which are facts and which are opinions. Discuss any statements that you disagree about.
- C. Look again at Reading 1. Scan the article to find one sentence that states an opinion. (Hint: It's about dentures.)

REVIEW A SKILL Identifying Time and Sequence Words (See p. 84)

Scan Reading 1. What words are used to identify the present time in the development of each type of device?

Vocabulary Activities STEP I: Word Level

The adjective *objective* is related to facts and opinions. A text or observation is considered objective if it only deals with information that is based on facts, not emotions. The opposite is *subjective*, meaning based on personal opinions.

OBJECTIVE It is raining.

SUBJECTIVE The weather is awful.

Objectivity is the noun form and objectively is the adverb form.

Readers sometimes question the objectivity of a news article.

Newspapers try to report the news objectively, without personal opinion.

The noun *objective* has a different meaning. It is a formal alternative for *goal* or *aim*.

The inventor's **objective** was to create contact lenses for animals.

CORPUS

A. With a partner, match the medical device on the left with its *objective*. Take turns making sentences describing the connections.

The **objective** of dentures is to substitute for missing teeth.

- ___ 2. hearing aids
- ___ 3. eyeglasses
- ___ 4. cochlear implants
- ___ 5. contact lenses
- ___ 6. dental implants

- a. to improve declining eyesight
- b. to attain improved hearing
- c. to substitute for missing teeth

- **B.** Imagine that these sentences appeared in a newspaper article. With a partner, cross out the subjective words so that the statements become an objective report of the news.
- 1. At a public meeting yesterday, our popular mayor advocated suspending the ridiculous city tax on sunglasses.
- 2. The audience applauded wildly after his convincing speech.
- 3. The administration made a terrible decision that affected many people when it foolishly imposed this tax.
- 4. Last year the tax generated only the tiny sum of \$63.00.
- 5. After many long and boring comments from angry citizens, the meeting finally ended at 8:00.
- C. Read this paragraph about ways of straightening teeth. Use the target vocabulary in the box to complete the sentences. Use the words in parentheses to help you.

Tension refers to how tightly something is stretched. It can describe the forces acting on objects or the emotional forces acting on people.

The dentist increases the **tension** in my braces a little more each week.

Don's been so **tense** since he lost his job. He's been having **tension** headaches.

The atmosphere was **tense** as the doctor removed the bandages from the patient's eyes.

In grammar, tense refers to the time of a verb.

The past tense form of "keep" is "kept."

- **D.** With a partner, think of things that might make these people feel tense. What is the cause of the tension?
 - 1. someone getting on an airplane
- 4. someone going to a job interview
- 2. the hostess of a large party
- 5. a teacher on her first day of school
- 3. someone who cannot hear
- 6. a new parent
- E. An incentive is something that encourages a person to do something. With a partner, match the incentive with the action that will make it possible. Take turns making sentences with the matches.
- a. getting dentures

Having a nice smile is an Incentive for getting braces.

- ___ 2. being able to see clearly
- b. exercising every day
- ___ 3. being able to hear conversations c. getting braces
- ___ 4. being able to chew food
- d. giving up smoking
- ___ 5. having big muscles
- e. wearing a hearing aid
- ___ 6. improving your health
- f. wearing glasses

Vocabulary Activities STEP II: Sentence Level

The word sum has several uses, all related to the idea of a total amount of something. In math, for example, the sum is the result you get when you add numbers together.

The **sum** of 6 + 2 + 3 is 11.

It is also the total value of a group of things.

A team is only as good as the **sum** of its players.

It can refer to an amount of money.

Most insurance pays you a large sum when disaster strikes.

The phrase sum up means to state the main points of a text or conversation.

The doctor summed up the situation in three words: "You need glasses."

A summation is a formal review of the main points of something, written or spoken.

The jury listened carefully to the lawyer's three-hour **summation**.

P	overty imposes many mits on people. One is

	1. Some people cannot se	ee things at a distance.	

The word *discriminate* has several different meanings related to the idea of differentiation—or noticing differences between things.

The law should not discriminate between famous and ordinary people.

Mrs. Clifford is very discriminating. She only serves the best quality foods.

To discriminate one thing from another means to be able to see, hear, smell, touch, or feel the difference.

I can't discriminate one perfume from another. They all smell the same to me.

He has trouble with color discrimination and can't tell lime green from olive green.

To discriminate against a person or a group of people is to treat them unfairly.

In past decades, employers often discriminated against women.

Racial discrimination is still common in many places.

It is often difficult to tell which meaning of *discriminate* or *discrimination* is being used. Here are some helpful hints.

When discriminate or discrimination means "to recognize differences,"

- it is nearly always used with between or with from.
- two or more similar things are mentioned.

When discriminate or discrimination means "to treat people unfairly,"

- it is nearly always used with against.
- a particular person or a group of people is mentioned.
- a particular type of discrimination is named: for example, age discrimination.

- **H-** Rewrite these sentences in your notebook to include a form of *discriminate*. Read your sentences in a small group. Did you convey the correct meaning in each of your sentences?
 - 1. Society is unfair to people who are fat.
 - 2. People who are colorblind usually cannot tell red from green.
 - 3. It is against the law for employers to treat someone unfairly because of his race.
 - 4. Immigrants often face unfair treatment in their new countries.
 - 5. Movie actors wear contact lenses because studios won't hire actors who wear glasses.
 - 6. Lemons and limes taste the same to me.

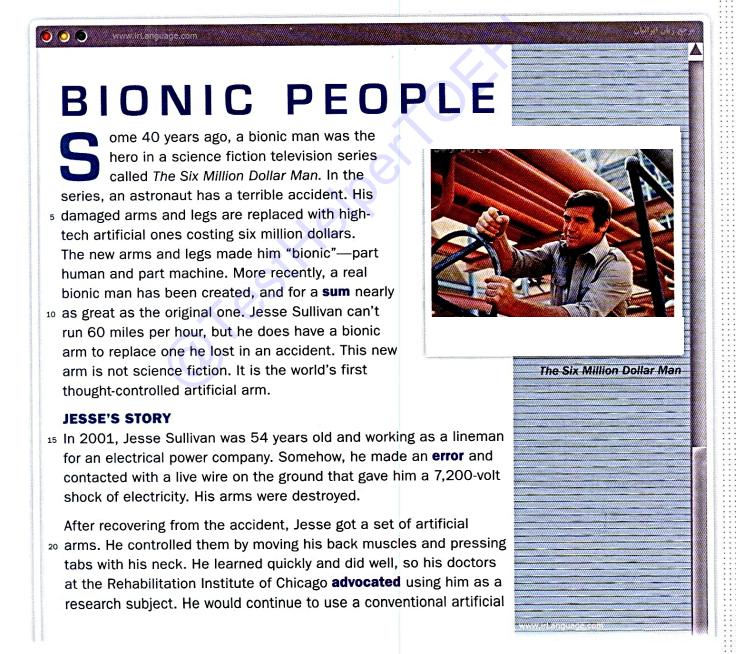

Before You Read

Read these questions. Discuss your answers in a small group.

- 1. Eyeglasses, hearing aids, and false teeth are common devices that assist people who have physical limitations. What other devices do you know of that help people's bodies function?
- 2. Have you ever seen people with artificial arms or legs? What could they do?
- 3. How do you think artificial limbs will change in the future?

Read

The title of this article refers to a 1970s science fiction television series, *The Six Million Dollar Man.*

right arm, but his new left arm would be a 12-pound Neuro-²⁵ Controlled Bionic Arm. Instead of using his body to move it, he would use his brain.

Jesse underwent surgery to prepare for this. The **objective** was to isolate the healthy nerves that once controlled movement in Jesse's left arm. These nerves were reattached to muscles in Jesse's chest. Eventually the re-routed nerves would grow into the chest muscles. Finally, electrodes were attached to Jesse's chest and connected to his artificial arm. Now, when Jesse **tenses** these chest muscles, it creates a tiny electrical signal.

The signal activates a computer in the left arm that does what Jesse's brain tells it to do. The movement is as **voluntary** and as immediate as it would be in a real arm.

The brain not only gives signals to the missing arm, it receives them as well. When a doctor touches Jesse's chest in various spots, it feels to Jesse as if the doctor is touching his thumb, for instance, even though his hand and arm are missing.

Eventually he will be able to feel what the bionic hand is touching and to **discriminate** between sensations of heat and cold.

This bionic arm is **suspended** from a plastic framework that fits around Jesse's upper body. It has six motors and consists of parts from around the world. The hand was made in China, the wrist in Germany, and the shoulder in Scotland. The six motors move the bionic arm's shoulder, elbow, and hand as a unit. Jesse uses his arm to help him put on socks, shave, eat, and do other personal and household chores just by thinking about them.

CLAUDIA'S STORY

- In 2004, Claudia Mitchell became the second person to use a thought-controlled artificial arm. That year the 24-year-old woman lost her left arm in a motorcycle accident. While she was recovering from her accident, she worried about her future. She was very brave. She did not want the accident to impose
- restrictions on her or **confine** her to her house. She saw no **alternatives** until she read a magazine article about Jesse Sullivan and his bionic arm. The article gave her the **incentive** to try to get her own bionic arm. She said to herself, "I've got to have one of those."
- 65 Her doctors **evaluated** her and agreed to make her into a bionic woman. After surgery, Claudia was fitted with a 10-pound

Jesse Sullivan

artificial arm that she controls with her brain. She mastered the use of her new arm and entered college.

Today a disproportionate amount of research into brain-controlled artificial arms is focused on implanting sensors in the brain to link the brain to the arm. Dr. Todd Kuiken, who heads the neural engineering program at the Chicago Institute, rejects this approach. He says of the technique used with Jesse and Claudia, "The exciting thing about this technique is we are not implanting anything

Reading Comprehension

80 into (the) body."

Mark each statement as T (True) or F (False) according to the information in Reading 2. Use your dictionary to check the meaning of new words.

- __ 1. Jesse's doctors made an error and charged him a sum of six million dollars.
- ___ 2. The objective of Jesse's surgery was to isolate the healthy nerves that once controlled the left arm and reattach them to chest muscles.
- ___ 3. When Jesse tenses his chest muscles, he activates a computer.
- ___ 4. Someday Jesse's hand will be able to discriminate between heat and cold.
- ___ 5. Claudia worried that her accident might impose restrictions on her life or confine her to her house.
- ___ 6. She saw an alternative when she read about Jesse in a magazine article.
- ___ 7. The article gave Claudia the incentive to meet Jesse Sullivan.
- ___ 8. A disproportionate amount of research is focused on bionic arms.

READING SKILL

Distinguishing Fact from Opinion

APPLY

- A. Read these statements. Decide whether each one is a fact or an opinion.

 Write Fact or Opinion on the line. Compare answers with a partner.

 1. The Six Million Dollar Man was a science-fiction TV show.

 2. Bionic is a confusing term for people with artificial limbs.

 3. It must be strange to have someone touch your chest and feel it in your hand.

 4. Claudia is very lucky that she has a bionic arm.

 5. Claudia's bionic arm is very heavy.
- B. Look again at Reading 2. Scan the article to find one sentence that states an opinion. (Hint: It's about Claudia.)
- C. In your notebook, write two facts and two opinions about the people in Reading 2. Read your sentences aloud in a small group and let the others decide which are facts and which are opinions. Discuss any statements that you disagree about.

Vocabulary Activities STEP I: Word Level

- A. With a partner, list some alternatives for these situations.
 - 1. Your uncle was in a car accident and both of his legs were injured. Suggest some alternate ways for him to travel to his job.
 - 2. Your grandmother's eyesight is very poor. She likes stories about famous people, but she can't see well enough to read. What alternatives can you suggest so she can still enjoy these stories?
- **B.** Confine can mean to keep someone or something in a particular place. It can also refer to controlling or setting the limits of something. With a partner, match the type of business in the first column to what it confined (center column) and the type of limit (last column). In your notebook, take turns making sentences.

This restaurant confined its menu to Mexican food.

Type of Business	What It Confined	Type of Limit
1. a restaurant	its broadcasting	girls under 18
2. a library	its children's books	Mexican food
3. a private school	its repairs	900 words
4. a clothing store	its menu	items under \$20
5. an auto repair shop	its articles	Japanese cars
6. a radio station	its student body	a cozy corner
7. a magazine	merchandise	ten hours a day

Voluntary describes an action that is done willingly, without being required to do it.

The adverb form is voluntarily.

Involvement in the study is strictly **voluntary**. You don't have to do it to graduate. The participants **voluntarily** donated their time to help the researchers.

The noun and the verb have the same form: volunteer.

Volunteers at the local hospital play games with the sick children.

Amy always volunteers to help out when they are shorthanded.

- C. With a partner, decide which of these actions are voluntary and which are required.
 - 1. giving your seat on a bus to an old person
 - 2. straightening crooked teeth with braces
 - 3. wearing glasses to improve your vision
 - 4. getting a passport to travel overseas
 - 5. using a bed net to prevent malaria
 - 6. getting a license to drive a car
 - 7. paying for groceries at a market
 - 8. visiting a sick patient in a hospital

An *advocate* is a person who speaks or writes publicly in favor of a particular position or cause. *Advocacy* is the noun form of this action. The verb is also *advocate*.

My uncle is an advocate for disabled people. He advocates for them.

His advocacy resulted in new laws to help the disabled.

CORPUS

D. Imagine that the city wants to build a new hospital. They asked doctors at the current hospital to volunteer ideas for the new hospital. Each doctor is an advocate for his or her own specialty. With a partner, match the doctor with what he or she might advocate. Take turns making sentences with the information. Check your dictionary for the meaning of new words.

The surgeon is an advocate of doubling the number of operating rooms.

The surgeon advocates doubling the number of operating rooms.

1. pediatrician	a. doubling the number of operating rooms
2. pharmacist	b. installing reclining chairs for new mothers
3. obstetrician	c. building a modern kitchen for the cafeteria
4. nutritionist	d. building a playroom for the sick children
<u>a</u> 5. surgeon	e. purchasing new X-ray machines
6. radiologist	f. adding computers to keep track of medicine

Vocabulary Activities STEP II: Sentence Level

To suspend something means to hang something, either permanently or temporarily.

Jesse's new arm was suspended from his shoulder by a plastic frame.

To suspend an activity is to stop it temporarily.

The lab will suspend research on the vaccine until a new director is hired.

To suspend a person is to dismiss them from a job, school, project, etc. temporarily, usually as a punishment. Suspension is the noun form.

Hannah was suspended from school for a week for bad behavior. During her suspension she wasn't allowed to watch TV or go online.

- E. Rewrite these sentences using a form of suspend. Compare your sentences with a partner.
 - 1. The biology lab technician was dismissed for a week for being careless.
 - 2. He hung hot lamps too close to the dishes of bacteria we were studying.
 - 3. We had to stop our experiment until we could grow new bacteria.
 - 4. The technician was not paid during the time he was not working.
 - 5. When he returns, we'll show him the proper way to hang the lamps.

	Word Fo	rm Chart	
Noun	Verb	Adjective	Adverb
		(dis)proportional	(dis)proportionally
proportion		(dis)proportionate	(dis)proportionately

A proportion is concerned with the relationship among the parts that make up a whole. Like a ratio, it can compare one part to another part in terms of number. It can also compare parts in terms of importance, size, degree, or other factors.

The largest proportion of undergraduates is made up of women.

The two adjective forms are interchangeable, as are the two adverb forms.

An enormous TV took up a disproportionally large area of the room.

Each roommate had a proportionate amount of space in the closet.

When two parts are in proportion, this means they are of the correct sizes relative to each other. For instance, in an accurate drawing of a person, the ears will be larger than the eyes—but they are supposed to be. Out of proportion is the opposite.

The artist has drawn the eyes and ears in proportion.

But look how big the mouth is. It's out of proportion with the rest of the head.

- F. The information in this activity has been taken from the first nine units of this book. In your notebook, restate the information using a form of *proportion*. Compare only their relative size or importance (no statistics necessary). Be prepared to read aloud and discuss your sentences in a small group.
 - 1. The oceans of the world occupy over 70 percent of the earth's surface.
 - The oceans of the world occupy a large **proportion** of the earth's surface.
 - 2. Food from the sea provides between 5 percent and 10 percent of the total world food supply.
 - 3. Of the earth's seven billion people, over one billion rely on fish as a primary source of protein.
 - 4. Ambition seems to coincide most often with middle-class status.
 - 5. Celebrities as a group are more narcissistic than other people.
- 6. Kids with autism are predominantly male, with boys outnumbering girls by a ratio of 4 to 1.
- 7. About 90 percent of the world's malaria deaths occur in sub-Saharan Africa.
- 8. As the rainforest disappears, so will the native people.
- 9. Hundreds of new gas stations were built along the highways, complemented by new fast-food restaurants.
- 10. Fast-Food Franchises in 2008: McDonald's 30,000; Burger King 11,550.
- **G.** Self-Assessment Review: Go back to page 145 and reassess your knowledge of the target vocabulary. How has your understanding of the words changed? What words do you feel most comfortable with now?

Writing and Discussion Topics

With a partner or a small group, share ideas about the following topics. Then have each person write a paragraph about one of the topics.

- 1. Some people consider eyeglasses one of the most important inventions in human history. Do you agree or disagree? Why?
- 2. What devices do you know of that assist people who are blind? What devices do you know of that assist people who are deaf?
- 3. It is estimated that Claudia's bionic arm cost \$4 million. Do you think this is a good investment for research dollars? Why or why not?

Oxford 3000™ words

The Academic Word List in Context

SECOND EDITION

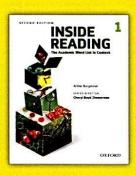

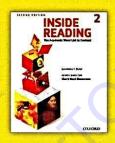

INSIDE READING

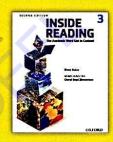

Develop reading skills and acquire the Academic Word List

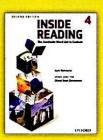

- > Explicit reading skills provide the foundation for effective, critical reading
- > High-interest readings from academic content areas motivate students
- > Corpus-based examples from the Oxford English Corpus teach real-life English

Oxford iTools

iTools are for use with an LCD projector or interactive whiteboard. With iTools you can:

ENGAGE

Authentic videos and whole-class vocabulary activities build language proficiency

CONNECT

Audio synched with readings and print-and-go worksheets strengthen reading skills

ASSESS

Customizable Unit, Mid-term, and Final Tests evaluate student progress

Authentic video available on iTools and the Student Website

About the Series Director

Cheryl Boyd Zimmerman is a professor of TESOL at California State University, Fullerton. She specializes in second-language vocabulary acquisition, an area in which she is widely

published. She teaches graduate courses on second-language acquisition, culture, vocabulary, and the fundamentals of TESOL, and is a frequent speaker on topics related to vocabulary teaching and learning.
